## INVESTMENT PHILOSOPHY

active

absolute

unconstrained

In a dynamic world that is continuously changing due to technology and increasingly volatile geopolitics, passive investment strategies can no longer outperform. Alpha belongs to active strategies that can invest in sync with the dynamics at play.

Being relevant comes by staying active.

We believe consistent outperformance requires complete freedom from looking at the world relatively. It is why we design investment strategies with an absolute objective irrespective of market conditions. With this absolute objective, comes clarity of thought.

Being relevant requires an absolute focus on returns.

Embedded within our processes and systems is the conviction that the surest way to success in investing is through cultivation of a multitude of opinions and perspectives. By bringing together this diversity of ideas within our investment framework, we aim to unearth every possible opportunity in any set of circumstances.

Being relevant means having an unconstrained perspective.

## CORE BELIEF

### *Fundamental is the atman, Liquidity the prana, Sentiments the maya*

One of the oldest scriptures and philosophy in the world is the Vedic philosophy. These scriptures are a comprehensive effort to describe all aspects of the universe and human existence. To undertake this gigantic task, they rely on three core ideas - Atman, Prana and Maya. These ideas are the inspiration for our perspective on investment research and money management.

FUNDAMENTAL  
IS THE **atman**

'Atman' is the 'true' or 'absolute' self of a person, beyond all names and subjective judgements that the world and the person choose to apply on themselves. In that sense, real assets and profit-generating capacity of all economic entities and participants are the 'fundamentals' underlying every kind of market. **Without the Atman, an individual cannot exist. Similarly, without fundamentals, value cannot persist.**

LIQUIDITY  
THE **prana**

'Prana' refers to universal energy in all its forms. It is the vibrational force that makes every electron and atom vibrate and move. For markets, the dynamic flow of money which we study as liquidity, enables participants to undertake economic activity and create an ecosystem. **While Prana enables life, liquidity imparts a 'value' to assets and organisations.**

SENTIMENTS  
THE **maya**

'Maya' depicts the illusion of this world as subjectively experienced by all humans. Each person imagines the world to be in a peculiar way, based on their own opinions and perceptions, and lives accordingly. 'Price' is the illusion market participants assign to every economic unit, according to their subjective ideas of the present and the future, based on a myriad assumptions, experiences and predictions. **Maya is the intricate illusion of this universe created by our minds and price is the ever-changing perception of economic value created by investors.**

## INVESTMENT PRINCIPLES

### MEASURABLE IS RELIABLE

#### Measurable is reliable

For success in investing, discipline is of more importance than any other attribute of the investment process. Our battle-tested suite of proprietary valuation, liquidity and risk indicators along with extensive financial modelling ensure that we consistently deliver superior results.

### QUANTAMENTAL INVESTING

#### Quantamental investing

While measurable is reliable, we also believe the economy and markets cannot be captured completely by models and indicators. Human judgement that comes from years of trading and investing experience has immense value. For optimal results, our decision-making seeks to find the harmony between objectivity and subjectivity.

### MULTI ASSET MANAGER

#### Multi-asset, multi-manager

We believe that safeguarding investor wealth is paramount. Apart from reducing risk by investing across asset classes, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between investment managers with a diverse set of capabilities and experience.

### MONEY FLOWS FROM ONE ASSET CLASS TO ANOTHER

#### Money flows from one asset class to another.

Money is a form of economic energy - the quantification of human effort. As the world evolves, a dynamic set of ideas continuously lead the change. Money flows and grows with these pioneering ideas. Identifying them and the specific assets that benefit is the surest and most consistent method for generating wealth.

### TIMING IS EVERYTHING

#### Timing is everything

In our framework, time is a critical aspect of investing as the three dimensions of Valuation, Liquidity and Risk interact and move together in cycles across different periods. Alpha generation is optimised only by sanguine identification of the extremes.

## quant Global Research (qGR) PREDICTIVE ANALYTICS | ACTIONABLE INDICATORS

Market moves are highly dependent on the aptitude and appetite of market participants. To address this, we at qGR track several proprietary indicators which **measure market sentiments from different perspectives**. Extreme euphoria or fear can be gauged by many of these indicators, **helping us to deduce how players are positioned and how they react to a particular situation**. Once we understand investor behavior through these indicators, we can identify times when players are being irrational or making illogical decisions or showing signs of exuberance/paranoia.

qGR objectively follows this paradigm, ever enhancing domain knowledge with technology as an enabler, to develop tools and techniques, and translating them into **indicators that have accurately been able to identify cross asset and cross market inflexion points**.

qGR predictive analytics indicators are **identifiers of inflexion points and opportunities in the complex investing environment**. They provide clarity during difficult times when there are many questions that entail event and polity risk.

# quant Liquid Fund

The Liquid Fund has delivered a return of ~8.72% and outperformed its benchmark by ~111bps in the period March 24, 2020 – January 31, 2022. With a track record of zero default in the investments since inception, we believe in superior risk adjusted returns

All dividends are on face value of ₹ 10 per Unit. Please log on to [www.quantmutual.com](http://www.quantmutual.com) for record date-wise listing of dividends declared.

<p><b>Sharpe Ratio</b></p> <p>Sharpe Ratio is a risk to reward ratio, it measures portfolio returns generated in excess to the investment in risk-free asset, for per unit of total risk taken. While, positive Sharpe ratio indicates, portfolio compensating investors with excess returns (over risk-free rate) for the commensurate risk taken; negative Sharpe ratio indicates, investors are better off investing in risk-free assets.</p> <p><b>Beta</b></p> <p>Beta of a portfolio is a number indicating the relation between portfolio returns with that of the market index i.e. it measure the volatility, or systematic risk, of a portfolio in comparison to the market as a whole.</p> <p><b>Modified Duration</b></p> <p>A formula that expresses the measurable change in the value of a security in response to a change in interest rates. Modified duration of portfolio can be used to anticipate the change in market value of portfolio for every change in portfolio yield.</p> <p><b>R Squared</b></p> <p>It is a statistical measure of how closely the portfolio returns are correlated with its benchmark.</p>	<p><b>Standard Deviation</b></p> <p>A statistical measure that defines expected volatility/risk associated with a portfolio. This explains the variation/deviation from the average returns delivered by the portfolio. A higher standard deviation means higher volatility (risk) and a lower standard deviation means lower volatility</p> <p><b>Risk Free Return</b></p> <p>The theoretical rate of return of an investment with safest (zero risk) investment in a country.</p> <p><b>Total Expense Ratio</b></p> <p>Total expenses charged to scheme for the month expressed as a percentage to average monthly net assets.</p> <p><b>Average Maturity</b></p> <p>Weighted average maturity of the securities in scheme.</p> <p><b>Portfolio Yield (Yield To Maturity)</b></p> <p>Weighted average yield of the securities in scheme portfolio.</p>

## How to read factsheet

<p><b>Fund Manager</b></p> <p>An employee of the asset management company such as a mutual fund or life insurer, who manages investments of the scheme. He is usually part of a larger team of fund managers and research analysts.</p> <p><b>Application Amount for Fresh Subscription</b></p> <p>This is the minimum investment amount for a new investor in a mutual fund scheme.</p> <p><b>Minimum Additional Amount</b></p> <p>This is the minimum investment amount for an existing investor in a mutual fund scheme.</p> <p><b>Yield to Maturity</b></p> <p>The Yield to Maturity or the YTM is the rate of return anticipated on a bond if held until maturity. YTM is expressed as an annual rate. The YTM factors in the bond's current market price, par value, coupon interest rate and time to maturity.</p> <p><b>SIP</b></p> <p>Systematic Investment Plan (SIP) works on the principle of making periodic investments of a fixed sum. It works similar to a recurring bank deposit. For instance, an investor may opt for an SIP that invests ₹500 every 15th of the month in an equity fund for a period of three years. NAV The NAV or the net asset value is the total asset value per unit of the mutual fund after deducting all related and permissible expenses.</p> <p><b>AUM</b></p> <p>AUM or assets under management refers to the recent / updated cumulative market value of investments managed by a mutual fund.</p> <p><b>Modified Duration</b></p> <p>Modified duration is the price sensitivity and the percentage change in price for a unit change in yield.</p>	<p><b>Rating Profile</b></p> <p>Mutual funds invest in securities after evaluating their creditworthiness as disclosed by the ratings. A depiction of the mutual fund in various investments based on their ratings becomes the rating profile of the fund. Typically, this is a feature of debt funds.</p> <p><b>Benchmark</b></p> <p>A group of securities, usually a market index, whose performance is used as a standard or benchmark to measure investment performance of mutual funds, among other investments. Some typical benchmarks include the NIFTY, Sensex, BSE200, BSE500, 10-Year Gsec</p> <p><b>Entry Load</b></p> <p>A mutual fund may have a sales charge or load at the time of entry and/or exit to compensate the distributor/agent. Entry load is charged at the time an investor purchases the units of a mutual fund. The entry load is added to the prevailing NAV at the time of investment. For instance, if the NAV is ₹100 and the entry load is 1%, the investor will enter the fund at ₹101. (Note SEBI, vide circular dated June 30, 2009 has abolished entry load and mandated that the upfront commission to distributors will be paid by the investor directly to the distributor, based on his assessment of various factors including the service rendered by the distributor).</p> <p><b>Exit Load</b></p> <p>Exit load is charged at the time an investor redeems the units of a mutual fund. The exit load is reduced from the prevailing NAV at the time of redemption. The investor will receive redemption proceeds at net value of NAV less Exit Load. For instance if the NAV is ₹100 and the exit load is 1%, the investor will receive ₹99.</p>
