Investment Approach

To **avail equity taxation** – minimum 65% equity exposure is maintained

Derivatives instruments will be used to **hedge equity exposure up to 100%**

Brings maximum possible **diversification in a single portfolio** and **moderates portfolio volatility** by limiting extreme outcomes and optimizing inflection points

Active rebalancing is done to adapt to macro environment

Reasons to Buy

- Recommended for traditional investors as it **works well across all market and economic cycles**
- Manages volatility through **tactical rebalancing** for **superior risk adjusted returns**
- Widest scope to **capitalize on extreme equity opportunities**
- Aims to **capture upside in bull phase & limit downside in bear phase**, reducing overall portfolio volatility

VLRT Framework| Adaptive Money Management

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The core engine that drives us and sets us apart is a **robust and differentiated investment framework** that enables us to **see beyond the horizon and stay relevant**. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform. **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**

Scheme Returns (as on September 30, 2026)

The unique feature of the scheme stems from its mandate to dynamically rebalance equity exposure (65% to 100%) and debt exposure (0 to 35%), in line with our view on Risk-On or Risk-Off environment. This approach brings diversification and moderates portfolio volatility by limiting extreme outcomes and optimizing inflection points. Active rebalancing is done to adapt to macro environment. This scheme is ideal for medium to low risk appetite investors. Equity exposure has decreased by more than 14% as of end-September 2026. The current portfolio construct has a large-cap skew. During the month, exposure to Power (+0.92%) and Metals (+0.61%) was increased while Capital Goods (-7.89%), Financial Services (-5.71%) and Realty (-2.35%) were reduced.
