LARGE AND MID-CAP FUND

(An open ended equity scheme investing in both large cap and mid cap stocks)

On the Path to Greater Things

quant
LARGE AND MID-CAP
FUND
"The future belongs to those who believe in the beauty of their dreams"
– Eleanor Roosevelt, Former US First Lady

large & mid cap companies | combination provides better risk adjusted returns

Large Cap

Low growth + Lower relative risk

- Well established
- Large market share
- High performance
- Profitable
- Least volatile during recession
- Highest liquidity

Mid Cap

Medium growth + Higher relative risk

- Well established
- Growing market share
- High performance
- Potential to out-run large caps
- More volatile than large caps
- High liquidity

Better Risk-Adjusted Returns

large & mid cap companies | why are they preferred

Diversification

Large and Mid Cap funds provide diversification by investing in a mix of large-cap and mid-cap stocks. This diversification helps spread risk across different market segments and industries, reducing the impact of underperformance in any single sector

Potential for Growth

By combining large-cap stability with mid-cap growth potential, these funds offer a balanced approach to capital appreciation

Risk Management

Large and Mid Cap funds can be less volatile compared to pure mid-cap funds because they include stable large-cap stocks in their portfolio. This can help manage downside risk during market downturns while still participating in the growth potential of mid-cap companies

Flexibility

These funds have the flexibility to adjust their allocation between large-cap and mid-cap stocks based on market conditions and fund objectives. Fund managers can capitalize on opportunities in both segments to enhance returns and manage risk effectively

Market Cycle Performance

Large and Mid Cap funds can perform well across different market cycles. In bullish phases, mid-cap stocks often outperform, while large-cap stocks provide stability. During market corrections, large-cap stocks can act as a defensive shield, balancing the portfolio's risk-return profile

large & mid cap funds | what makes them popular

LARGE AND MID-CAP FUND

It is a market cap focused allocation scheme to construct a long-term portfolio composing of both large and mid-cap companies.

This provides exposure to high growth potential of midcaps along with relatively lower volatility of large caps.

- Large & Mid Cap funds invest in opportunities across two broad segments of the market; i.e. they have a flexible focus between 35-65% each in Large and Mid Cap segments
- Flexibility allows the scheme to manage its overweight/underweight exposure to large and mid cap stocks dynamically
- Investing in a varying combination of large and mid cap stocks and sectors can be an attractive and flexible tool to achieve your investment goals
- Works on the principle of diversification by spreading money across more investment choices
- They can mitigate risk more effectively due to a wide choice and flexibility to navigate among them two big market segments
- Potential to provide competitive total return

Fund Positioning

- For investors wishing to **benefit from long term growth potential through range-bound and flexible investing between large and mid cap companies**
- Investors with a **long-term horizon (3 years and above) and aiming for reasonable returns from equities with lower volatility and risk mitigation over the long term**
- Investors who **wish to participate in the upside potential of mid cap stocks, while enjoying the relative stability of large cap stocks, through dynamic portfolio rebalancing**

Fund Strategy

- The scheme **has 35-65% allocation to both large and mid cap companies with the freedom to invest across sectors (within the large and mid cap space)**
- The scheme has **flexibility to invest between 0-30% across equity and equity related securities and debt**
- Provides **exposure to high growth potential of midcaps** along with relatively **lower volatility of large caps**
- Our investment framework, **VLRT enables dynamic money management and identification of tomorrow's potential winners** and **tactical allocation between large and mid caps depending on market movements**

quant Large & Mid Cap Fund | reasons to buy

Portfolio stability

Large-cap companies are often more stable and resilient during market volatility compared to mid-cap and small-cap companies. Investing in large-cap stocks can help reduce the impact of market fluctuations on the portfolio, providing a level of stability and risk mitigation

Growth Potential

Mid-cap companies, while carrying higher volatility, offer superior growth potential compared to large-cap companies. Investing in mid-cap stocks allows investors to benefit from the growth prospects of these companies, which may outperform over the long term and contribute to overall portfolio growth

Risk Adjusted Returns

Funds aims to generate higher returns than the market while managing risks effectively fund adapts to changing market conditions, with our experienced money managers actively adjusting the portfolio. This approach aims for consistent returns and effective navigation through market cycles

Tax Efficiency

With dynamic rebalancing of the portfolio between large and mid cap segments of the market, the scheme achieves tax efficiency that contributes to better total return as compared to rebalancing done on an individual portfolio

Diversification and Sector Rotation

Provides diversification to the portfolio through valuable opportunities across two broad market caps. The money manager will manage multiple rotations across market caps/companies/sectors in line with our Risk-On/Risk-Off view

Blend of Growth and Value

Provides both growth and value investing to investors due to its large and varied investment universe, thereby making it a suitable wealth creator in the long run

quant Large & Mid Cap Fund | key scheme benefits

Flexibility

Large and mid-cap funds offer fund managers the flexibility to adjust the portfolio allocation based on market conditions and opportunities. This flexibility enables them to capitalize on emerging trends or sectors, potentially enhancing returns

Sector Diversification

Investment in a mix of large-cap and mid-cap companies, provides diversification across different market segments. This diversification helps reduce risk by spreading investments across companies of varying sizes and sectors

Risk Managed Portfolio

Spreading investments across market capitalizations and sectors minimizes the impact of any one market cap or sector's performance on the overall portfolio and protects against market volatility and significant losses

Conviction Based Investing

Our focus is very clear on aiming to make alpha, so we focus extensively on onboarding promising companies with sustainable business models and visionary management and exhibiting reasonable price and earnings multiples

Tactical Wealth Creation

Investors can participate in the bull rally across the breadth of the market whenever it occurs and then return to relatively safer and stable positions in large cap companies when the tide turns

Dynamic Money Management

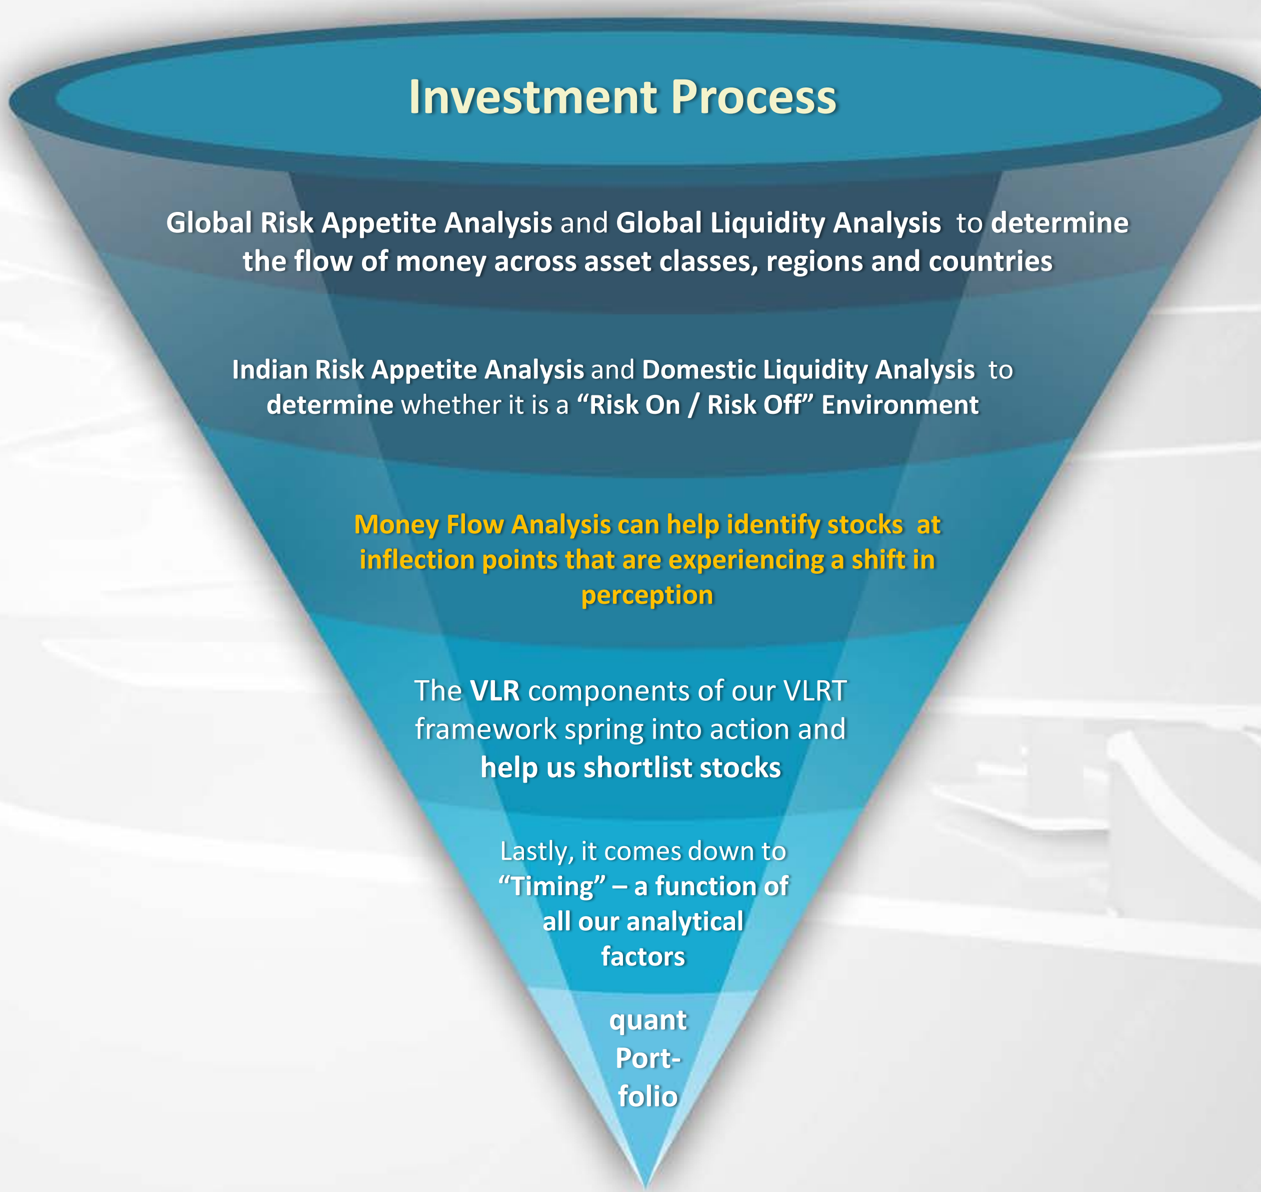
The fund adapts to changing market conditions, with our experienced money managers actively adjusting the portfolio. This approach aims for consistent returns and effective navigation through market cycles

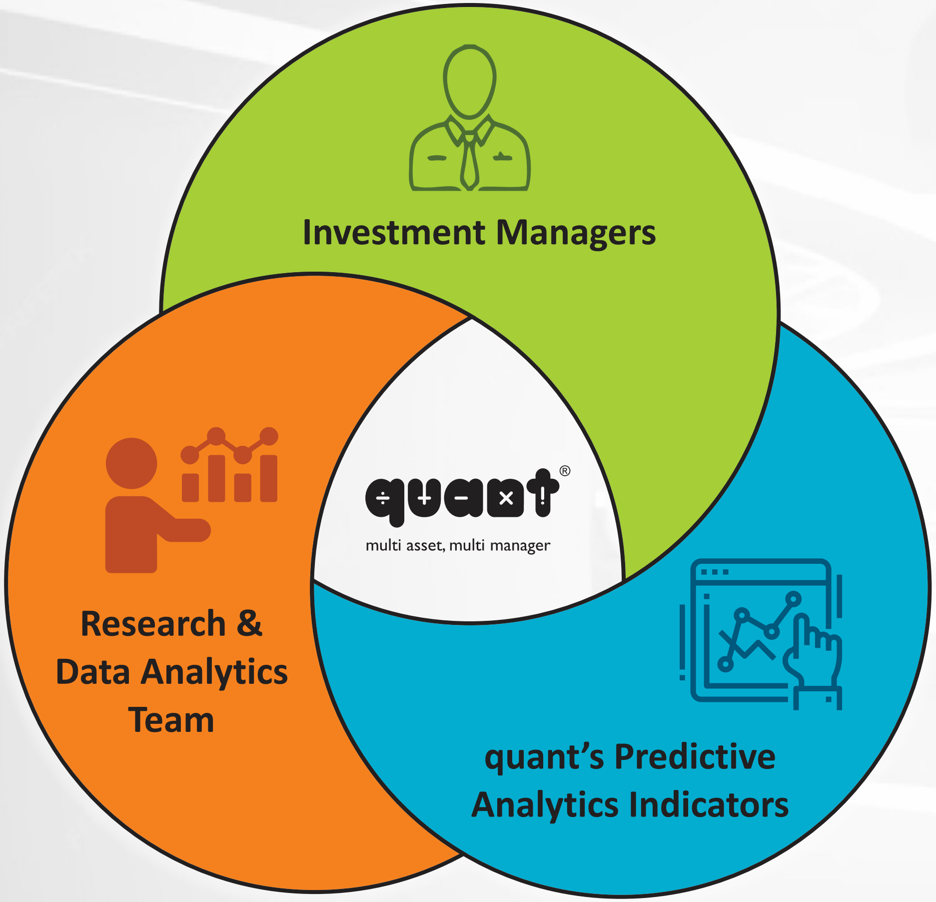
investment process | from macro to micro

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes





"Analysis Adds Up"

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes,** we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team – each with diverse sets of capabilities and experiences**

VLRT framework | the 4 dimensions in motion | dynamic risk mitigation via effective market timing
