MULTI ASSET ALLOCATION FUND

“ The most important thing you can have is a good strategic asset allocation mix with a balanced, structured portfolio that does well in different environments. We don't know that we're going to win. We have to have diversified bets ”

– Ray Dalio, American billionaire investor

- Asset allocation involves dividing your investments among different assets, such as stocks, bonds, cash, gold & other commodities
- A target asset allocation keeps changing at different times in a person's life and depends on one's current financial situation, investment horizon, and risk tolerance level

Time Horizon:

What is the time horizon available to achieve your financial goals

Risk Tolerance:

This defines the Limits or Boundaries of the Risks you can take

Financial Situation:

What is your Current Net Worth? Assets you can Allocate for your Goals

A multi asset strategy emphasizes on a mix of growth and income oriented assets including traditional stocks, bonds and complementary income sources such as commodities and units of REITs (Real Estate Investment Trusts) that can possibly achieve better investment outcomes

- Multi Asset Funds can be a **powerful and flexible tool to achieve your investment goals**
- Works on the **principle of diversification** by spreading money across different investments
- Historically, **stocks, bonds, and commodities have not moved up and down at the same time**
- Factors that may cause one asset class to perform poorly **may improve returns for another asset class**
- One should **invest in various asset classes** so that if one is losing money, the others make up for those losses
- Potential to provide **competitive total return** with a focus on **downside risk management**

Equity

Potential to provide alpha

Provides relative stability
and accrual income

Debt

Commodity

Hedge against inflation and
geo-political risk

Yield enhancement and
diversification strategy

REIT

- Every investor needs a healthy mix of assets in their portfolio
- Most investors lack the knowledge or resources to track, understand, and modify the proportion of each asset class in the portfolio to suit their individual investment needs

Every investor needs a healthy mix of assets in their portfolio

Most investors lack the knowledge or resources to track, understand, and modify the proportion of each asset class in the portfolio to suit their individual investment needs

Performance of any asset class is unpredictable and varies with every market cycle

Timing the market for various asset classes is difficult for investors and involves research and knowledge

Investors tend to invest on momentum and fail to notice bigger trends thereby increasing portfolio risk

Under or over diversification is a leading cause of suboptimal returns bringing volatility to portfolios

Combining low or negatively correlated assets reduces risk and facilitates broader participation in opportunities

A go-anywhere portfolio allows nimble switching between capital growth and capital preservation strategies

Multi asset allocation is a fundamental investing principle that helps investors **maximize profits** and **minimize risk**

Equity
(10-80% of portfolio)

Long term growth potential
Higher risk-reward

Fixed Income
(10-80% of portfolio)

Reasonable return
Less volatile than equity

Gold & Silver ETFs
(10-80% of portfolio)

Reasonable return
Inflation hedge

Commodity ETFs
(0-30% of portfolio)

Reasonable return
Inflation hedge

REITs & InvITs
(0-10% of portfolio)

Rental income
Inflation hedge

DIVERSIFICATION

Our multi asset strategy is built along **dynamically managed exposure** to multiple asset classes to build a **risk-aware portfolio** while geared to **capitalize on opportunities**

Fund Positioning

- For investors wishing to **benefit from a combination of long term growth and income strategies** by investing in instruments across equity, debt, commodities, and REITs
- Investors with a **long-term horizon (3 years and above)** and aiming for reasonable returns with lower volatility over the long term
- Investors who **wish to participate in the upside potential of all asset classes** through dynamic portfolio rebalancing

Fund Strategy

- The scheme can **invest 10-80 each in equity, debt (including cash), gold and silver ETFs, 0-30% in Exchange Traded Commodity Derivatives, and 0-10% in units of REITs and InvITs**
- The scheme has **flexibility to invest** in companies across market caps, and other asset classes to **optimize risk-return payoffs**
- Our **money managers construct an unconstrained portfolio** and **balance asset classes to achieve a number of investment outcomes**, such as growth and income, while minimizing risk
- Our signature **VLRT Framework and Predictive Analytics tools dynamically manages** known risks and identify opportunities

Unconstrained in Search of Opportunity

Diversified across traditional and non-traditional asset classes, and sectors constantly seeking appropriate balance of risk and return. Unconstrained investment strategy searches out compelling growth, income, and hedging opportunities across asset classes

Assets with Low Correlation

With a careful selection of assets with low correlations, this fund can potentially reduce portfolio volatility. Rigorous research and analysis of historical correlations enable our money managers to construct portfolios that offer more stable returns over time

Competitive Performance

Proven track record of delivering competitive returns across market cycles. By embracing the power of our multi-asset allocation and dynamic rebalancing strategies, investors can navigate the complexities of the investment world with confidence

Flexible Asset Allocation

Tactical asset allocation to navigate different market cycles and the flexibility to change exposure as longer term themes evolve sets the tone for pursuit of broad unbiased opportunities

Access to Multi Strategy

A full range of portfolio building blocks across asset classes, indices, factors, and alpha seeking strategies. The VLRT Framework and Predictive Analytics tools allow us to assess opportunities and risks through multiple lenses

Downside Risk Focus

Equipped with a risk-first mind set, we have displayed consistent track record of providing downside risk focus during periods of elevated market volatility

Multi Investment Basket

Invests in several asset classes and cultivates a diversified investment strategy, backed by analysis, insights, technology, and tools, which are instrumental to achieving long-term investment success

Adaptive Asset Management

Allocating a portion of one's portfolio to multiple assets allows investors to participate in a potential upside while mitigating associated risks. Adapts to changing markets through our 'Dynamic Style of Money Management'

Strong Risk Management Foundation

Spreading investments across stocks, bonds, cash, commodities, and real estate minimizes the impact of any one investment's performance on the overall portfolio and protects against market volatility and significant losses

Convenience and Simplicity

Instead of individually managing and securing a diverse set of assets, investors enjoy a single point access to many asset classes. This simplifies the investment process, saves time, and reduces administrative burden

No Missing Out

Investors can reduce the chance of missing out a rally in any asset class. As various asset classes move at different points in time, the money manager rebalances the portfolio to optimize the fund's risk–return profile

Expertise in Cycles Analytics

The fund adapts to changing market conditions, with our experienced money managers actively adjusting the portfolio. This approach aims for consistent returns and effective navigation through market cycles

Investment Process

Global Risk Appetite Analysis and Global Liquidity Analysis to determine the flow of money across asset classes, regions and countries

Indian Risk Appetite Analysis and Domestic Liquidity Analysis to determine whether it is a "Risk On / Risk Off" Environment

Money Flow Analysis can help identify stocks at inflection points that are experiencing a shift in perception

The VLR components of our VLRT framework spring into action and help us shortlist stocks

Lastly, it comes down to "Timing" – a function of all our analytical factors

quant
Port-
folio

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

“Analysis Adds Up”

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes**, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team** – each with **diverse sets of capabilities and experiences**
