Dual Propellers – Predictive Analytics & Multivariate Models

quant Quantamental Fund is a quant-based thematic Fund and **uses only a subset of our VLRT Framework,** but the investment horizon of this scheme is managed from a near-term and medium-term perspective only. The investment process involves data analytics that processes the randomness from the interplay of multivariate factors including global macros.

It then **aims to build the best investment framework, using mathematical modeling via our Predictive Analytics tools** to decode that market randomness. The investment process keeps in mind that the risk needs to be mitigated in the near-term and medium-term by processing a vast amount of data points, something no human can match. **The money managers are tasked with monitoring and upgrading the model on a continuous basis** as data points are also evolving.

Multivariate Models based on time tested Predictive Analytics indicators

A select set of our Predictive Analytics indicators are used to create multivariate models based on which the investment team makes its decisions.

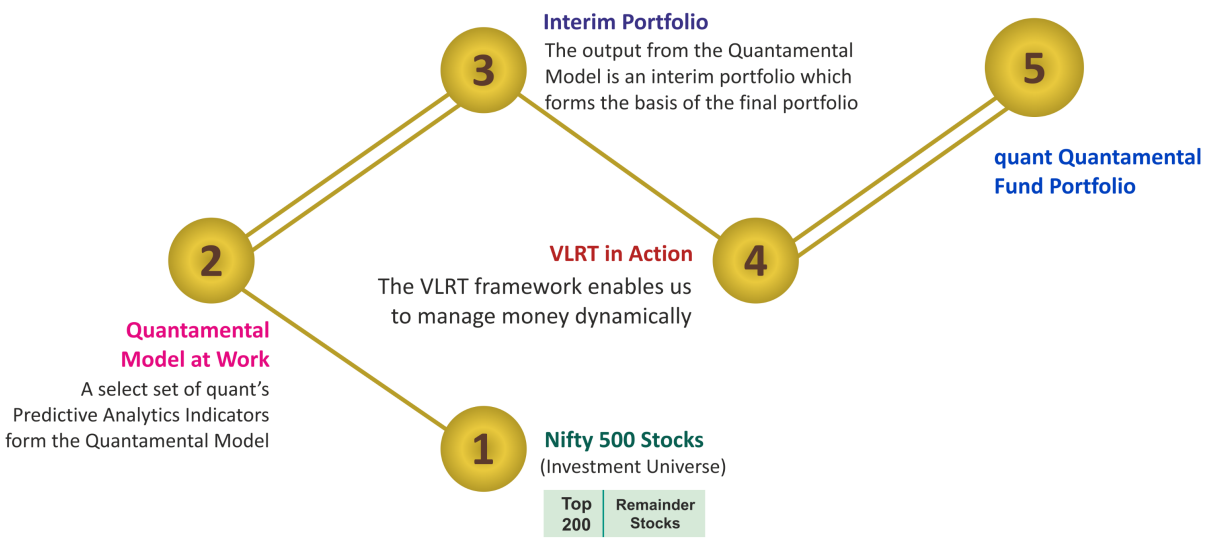

The underlying theme driving the relative allocation will be our 'quantamental' investment strategies. We believe that a **quantitative approach to money management yields optimal results when combined with the value of human judgement**; as rules or factors can behave differently when the entire market environment changes, such as our predictive analytics tools suggest.

Thus, our quantamental approach seeks to find the harmony between objectivity and subjectivity.

Portfolio Construction

The Fund invests in benchmark stocks from the Nifty 500 TRI, and quantitative methods are used to screen and choose best picks and make the stock selection universe smaller. These 200 stocks then go through our quantamental model for further shortlisting and inclusion into the portfolio. **The fund seeks to provide the best possible returns and capital preservation. The quantamental approach goes beyond purely factor-based, smart beta or algorithmic strategies.** We believe that a rules-based mechanical approach needs to be combined with the value of years of human judgement and experience to yield 'adaptive alpha' - the outperformance generated by an ability to adapt investment rules/factors to novel market phases.

Thus, we augment traditional quantitative and qualitative methods along with sentiments data - a deep knowledge of market structure dynamics, micro level stock selection and inflexion point identification between bouts of greed and fear through analysis of the larger, ever-changing macro environment.

Investment Approach

Selection of stocks from the NIFTY 500 TRI universe on the basis of **in-house 'quantamental' (quant based) models.**

Stock selection will be based on **stock price movement & financial/ valuation aspects.**

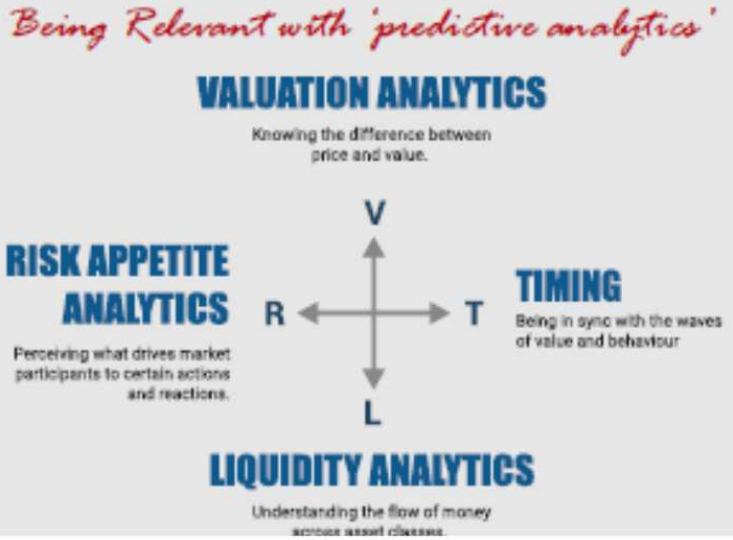

Debt investments in investment grade papers to primarily **generate income** and **minimize return volatility.**

Ongoing review of relevant market, industry, sector and economic parameters.

Reasons to Buy

- Quantification of factors **minimises the effect of cognitive biases** making investment decisions more effective.
- Suited for investors seeking **capital appreciation over the medium/long term.**
- Reap the benefits of **growing indian economy** and the financial markets.
- Stock selection process uses **unconstrained approach, allowing exploration of better returns potential.**

VLRT Framework| Adaptive Money Management

The core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes andsectors, formulating a multi-dimensionalresearch perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverseset of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**

Scheme Returns (as on October 30, 2026)

quant Quantamental Fund is a unique scheme designed to manage both short-term and medium-term risk efficiently. This approach not only reduces the risk but also generates alpha in the medium-term. This scheme is ideal for long-term investors with medium risk appetite. During October 2026, exposure to FMCG (+10.92%), Metals (+2.81%) and Healthcare (+0.81%) was increased while Oil & Gas (-8.58%), IT (-6.96%) and Financial Services (-1.14%) were reduced.

Lumpsum Performance (as on October 31, 2026)

Period	Scheme Return (%)	Benchmark Return (%)	NIFTY Return (%)	Value of ₹ 10,000 invested		
				Scheme	Benchmark	NIFTY
6 Months	-1.71%	-3.14%	-3.13%	9829	9686	9687
1 Year	2.53%	-7.35%	-9.45%	10253	9265	9055
3 Years	14.42%	10.03%	7.74%	14981	13321	12508
5 Years	18.11%	8.26%	6.70%	22984	14871	13830
Since Inception (May. 03,2021)	18.40%	11.49%	9.94%	25283	18171	16831

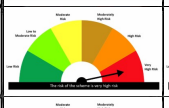

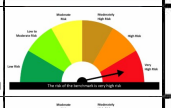

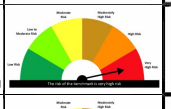

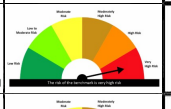

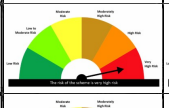

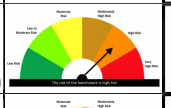

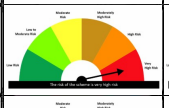

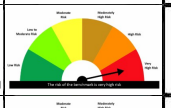

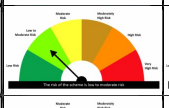

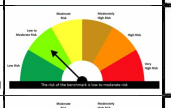

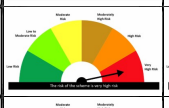

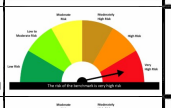

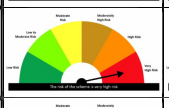

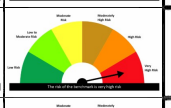

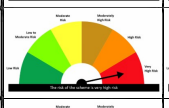

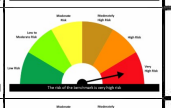

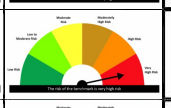

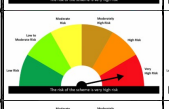

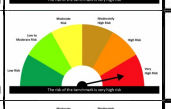

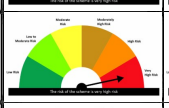

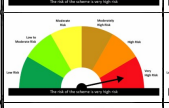

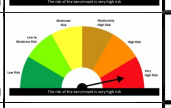

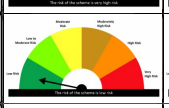

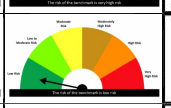

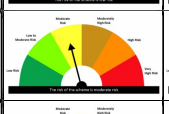

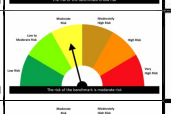

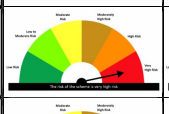

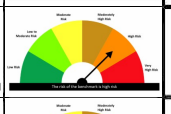

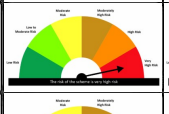

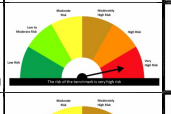

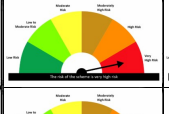

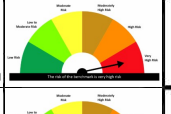

Past performance may or may not be sustained in future. The performance details provided herein are of existing plan (non-direct plan) - growth option. Different plans have different expense structure. For calculating returns since inception, NAV as on the date of allotment is taken. Face Value per unit is Rs. 10/-. Returns above 1 year are Compounded Annualised growth Rate (CAGR). Please refer to last page for performance of other schemes managed by the Fund Managers. Benchmark Returns are calculated using Total Return variant of respective benchmark index.

SIP Performance (as on October 31, 2026) (Rs. 10,000/- invested on the first business day of every month)

SIP Tenure	Investment Amount (Rs.)	Fund		Benchmark		Nifty	
		Market Value (Rs.)	SIP Returns (%)	Market Value (Rs.)	SIP Returns (%)	Market Value (Rs.)	SIP Returns (%)
