SMALL-CAP FUND

(An open ended equity scheme investing in small cap portfolio of equity shares)

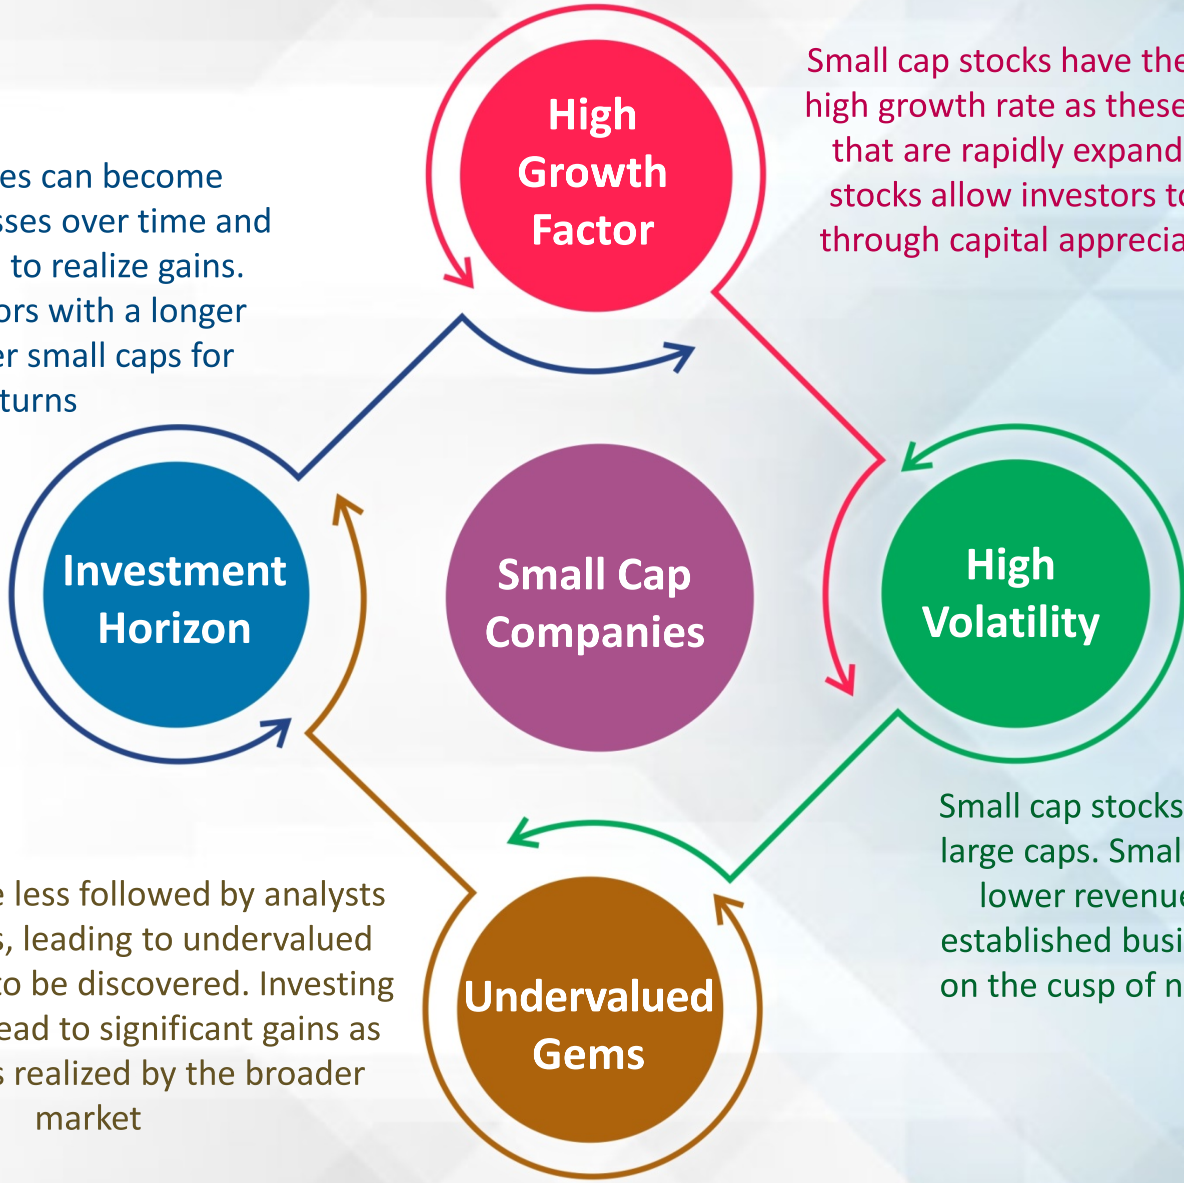
Inspired to think BIG

quant

SMALL-CAP FUND

> Waiting helps you as an investor and a lot of people just can't stand to wait. If you didn't get the deferred-gratification gene, you've got to work very hard to overcome that

– **Charlie Munger,** American billionaire investor



Small cap stocks have the potential for a high growth rate as these are businesses that are rapidly expanding. Small cap stocks allow investors to build wealth through capital appreciation over time

Small cap stocks are more volatile than large caps. Small sized companies have lower revenue streams than large established businesses, but are usually on the cusp of new growth trajectories

Small caps are less followed by analysts and investors, leading to undervalued gems waiting to be discovered. Investing in these can lead to significant gains as their value is realized by the broader market

Small cap companies can become medium-sized businesses over time and one must be patient to realize gains. Market savvy investors with a longer horizon can consider small caps for higher returns

Firms ranked from 251st onwards by full market capitalisation

why are they preferred

Growth Potential over Large Caps

Small caps typically outperform large caps over a longer period of time due to small cap stocks having a higher growth potential

Organic Price Growth

Large institutions generally avoid small cap stocks. This allows the stock to move on the strength of its own merits. So, the chances of organic price rise are higher in such companies

Choice of Sectors

Small cap stocks offer higher diversification choices across different industrial sectors like IT, banking/financial, automotive, FMCG, and more

Less Correlated to Index

Small cap stocks tend to be less correlated to the index stocks, making them a better diversification bet from a long term perspective

Potential Multi Baggers

Small cap stocks are more suitable for long term investors with a perspective of 5-7 years at least, as they take considerable time to witness significant growth and achieve economies of scale

spotting early potential

quant SMALL-CAP FUND

- Small cap funds invest in opportunities in the small cap space of the equity markets. Companies with solid financials, i.e. strong cash flows, higher revenues, and profit after tax are strong contenders
- Small cap companies may operate in a niche segment and enjoy significant entry barriers giving them advantages over rivals
- Money managers can diversify small cap stocks across sectors to achieve your investment goals
- With an opportunity to earn higher returns over time, its important to include companies with strong corporate governance
- Many small cap companies are run by good managements ensuring stability in the industry and the potential to grow into medium sized companies
- Merger and acquisition activity provides another opportunity for small-cap investors

A small cap strategy invests primarily in smaller sized companies selling at a significant discount to their intrinsic value. Measures that are important in considering an investment candidate include the company's ability to generate free cash flow over the long term, earn an appropriate return on capital invested, and allocate capital efficiently

What we prefer

- Companies in niche businesses
- Focus on higher growth prospects
- Reasonable valuations & competitive ROI
- Companies with competitive edge
- Potential to transform into larger players
- Visionary management
- Healthy cash flows

What we avoid

- Overvalued and over-owned companies
- Overleveraged businesses
- Inconsistent cash flows
- Suspicious promoter actions
- Weak business plans or models
- Stressed financials
- Excessive risk taking

Our small cap strategy

High Growth + Attractive Valuation + Under-ownership

Fund Positioning

- For investors wishing to **supplement their portfolios with an investment in small but promising niche businesses, with sound fundamentals, exhibiting long term growth potential**
- Investors with a **long-term horizon (5 years and above) and aiming for enhancing returns from small cap equities**
- Investors with higher risk appetite who **wish to participate in small cap stocks of relatively lesser known companies having competitive advantages and high growth prospects**

Fund Strategy

- The scheme **invests minimum 65% in equity and related instruments of small cap companies**
- The scheme has **flexibility to invest maximum 35% in top 250 stocks by market capitalization (large & midcaps)** across industries to **optimize risk-return payoffs**
- Our **money managers construct an unconstrained portfolio** and **deftly rebalance the portfolio to achieve an optimum investment outcome** while minimizing risk
- Our signature **VLRT Framework and Predictive Analytics tools dynamically manages** known risks and identifies opportunities

Invests in Visionary Companies

Investments are made in lesser known businesses with promising growth prospects. As these companies grow in market size, investors stand a chance to grow their gains with the company

Attractively Priced

Small caps tend to get overlooked by investors due to lack of enough popular knowledge, as compared to large and mid caps, so they are often priced below their perceived fair value and can provide potentially solid returns

Portfolio Growth

Provides a chance to grow your wealth with the high growth potential of small cap companies that are just at the beginning of their growth journey and on the cusp of a new level of growth

Diversification Through Market Niches

Many small cap companies provide valuable opportunities to gain exposure to new and emerging businesses with strong potential to outperform their bigger rivals. Promising small cap companies are present in many sectors thereby providing diversification

Defensive Capability

The money manager can invest a maximum of 35% in large and midcap stocks, after assessing opportunities and risks through multiple lenses, providing defensive capability to the portfolio during volatility

Long Term Wealth Builder

Small caps with strong fundamentals will most likely grow over the long term. Investing before a bull run on the market and holding the stock for the long term, could possibly see a strong financial return

quant small cap fund | key scheme benefits

Growth Stories

Invests in small and promising companies in the nascent stages of their growth. The potential to outperform broader markets is what makes small cap investing so exciting for investors

Emphasis on Reasonable Valuations

The fund focuses on onboarding promising companies with sustainable business models and visionary management and exhibiting reasonable price and earnings multiples

Strong Risk Management Foundation

Spreading investments across sectors minimizes the impact of any one sector's performance on the overall portfolio and protects against market volatility and significant losses

Conviction Based Investing

Our focus is very clear on aiming to make above average returns (alpha), so we focus extensively on the company's financial performance and other parameters to onboard the next big growth story

No Missing Out

Investors can participate in the rally in the smallest and yet the highest growth potential segment of the equity market during bull phases

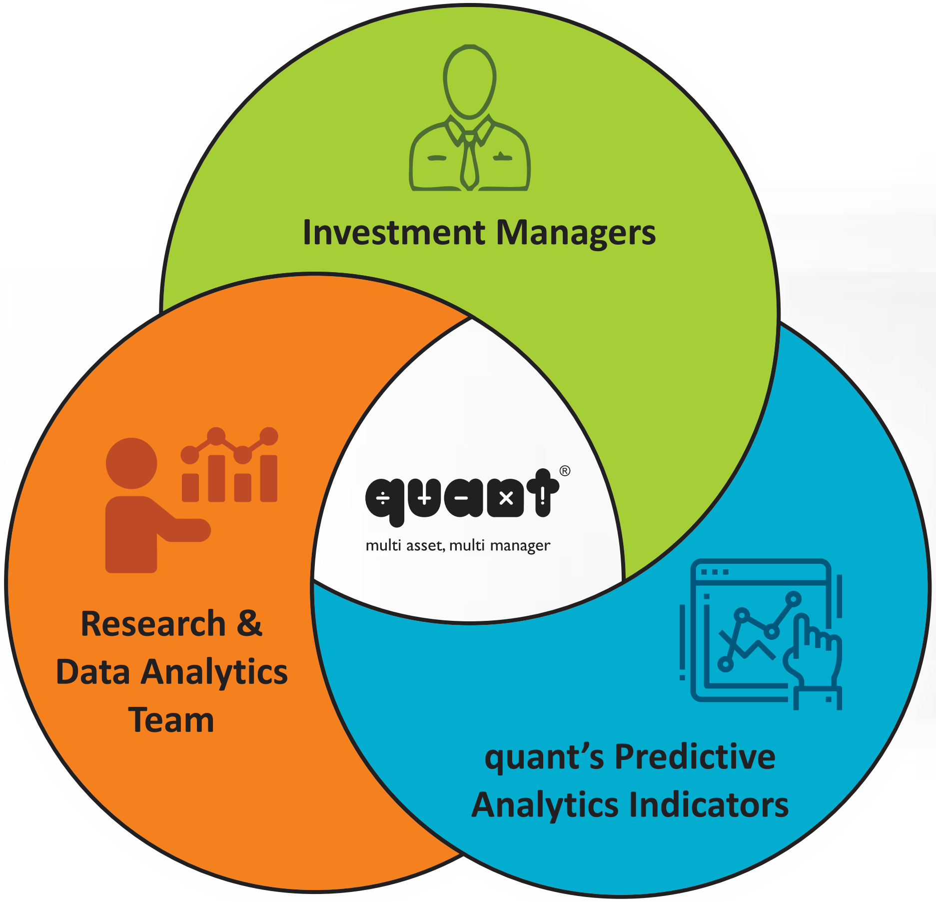
Dynamic Money Management

The fund adapts to changing market conditions, with our experienced money managers actively adjusting the portfolio. This approach aims for consistent returns and effective navigation through market cycles quant SMALL-CAP FUND

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes



"Analysis Adds Up"

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes,** we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team – each with diverse sets of capabilities and experiences**

VLRT framework | the 4 dimensions in motion | dynamic risk mitigation via effective market timing
