Investment Approach

Build a portfolio of **companies across major industries** and economic sectors with **acceptable risk/reward balance**.

Debt investments in investment grade papers to primarily **generate income** and **minimize return volatility**.

Ongoing review of relevant market, industry, sector and economic parameters.

Stock selection process uses **unconstrained approach**, allowing exploration of better returns potential.

Reasons to Buy

Suitable for investors who are **focused on absolute returns** rather than relative returns.

Equity investment with a safety net of minimum 20% debt investments.

Large cap focused portfolio helps **reduce impact on portfolio** during bouts of extreme volatility.

Investment **track record of over 20 years**.

VLRT Framework| Adaptive Money Management

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The core engine that drives us and sets us apart is a **robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant**. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverse set of variables and participants are continuously interacting with each other in myriad ways**.

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT]**.
