

Trust meets Technology

An open ended equity scheme investing
in banking and financial services related sectors

**“Ignoring technological change in a financial system,
based upon technology, is like a mouse starving to
death because someone moved their cheese”**

– Chris Skinner, Fintech expert

- The core innovation behind the VLRT Framework is the synthesis of various dimensions to identify inflexion points, long before the larger trend plays out and therefore at quant, we are inflexion point and cycles strategists, instead of momentum chasers. The difference in looking for inflexion points is that it allows us to position ourselves at the most opportune phases of the cyclical flow of markets
- Through Predictive Analytics platform, our Cycles Analytics framework works to identify cycles of various lengths and amplitudes, across asset classes and the inter-linkages and overlaps of these multifarious cycles are synthesized into the business cycle. A month ago, as we launched the 'quant Business Cycle Fund', the objective was to provide investors with a high risk appetite, a safe avenue through mutual funds to capitalise specifically on cycles
- We are today at an important juncture, as the VLRT multi-dimensional Framework clearly points out that a medium term bottoming of Risk Appetite is very near providing the impetus for a new business cycle. The last time the VLRT framework multi-dimensional variables were coming together to indicate such a turning point was in March-April 2020, post which there were strong resulting trends to the downside and upside respectively
- The advantage of taking a position in inflexion points is that the risk-reward ratio is the most favorable, which makes a significant difference to risk-adjusted performance. At the confluence of various cycles, the mathematics of market patterns starts working in favor of dynamic money managers like us
- As per the VLRT Framework, specifically Cycles Analytics, 2023 is the culmination of several cycles including the war, and financial crisis cycles. The renewed hype around de-dollarization, which we have been talking about since 2019, is similarly due to long-term monetary and currency cycles
- Post Q3 of FY23, markets may embark on a multiyear bull run as global Risk Appetite Analytics for various countries and multi asset classes will bottom out. Liquidity Analytics have already bottomed out as global tightening cycle has peaked out in Q4 of 2022. To ride this wave, and the resulting business cycle, we will launch thematic funds which are strongly correlated with cyclical upturns

Banking:

Compared to the world's developed nations, 40% of the world's total digital transactions happen in India

- Technological innovations have led to marked improvements in efficiency, productivity, quality, inclusion and competitiveness in extension of financial services, especially in the area of digital lending
- Digital modes of payments have grown by leaps and bounds over the last few years
- Digitalization of Agri-finance was conceptualized jointly by the Reserve Bank and the Reserve Bank Innovation Hub (RBIH)
- Innovative plan to introduce Central Bank Digital Currency (CBDC) or the 'Digital Rupee'

Financial Services:

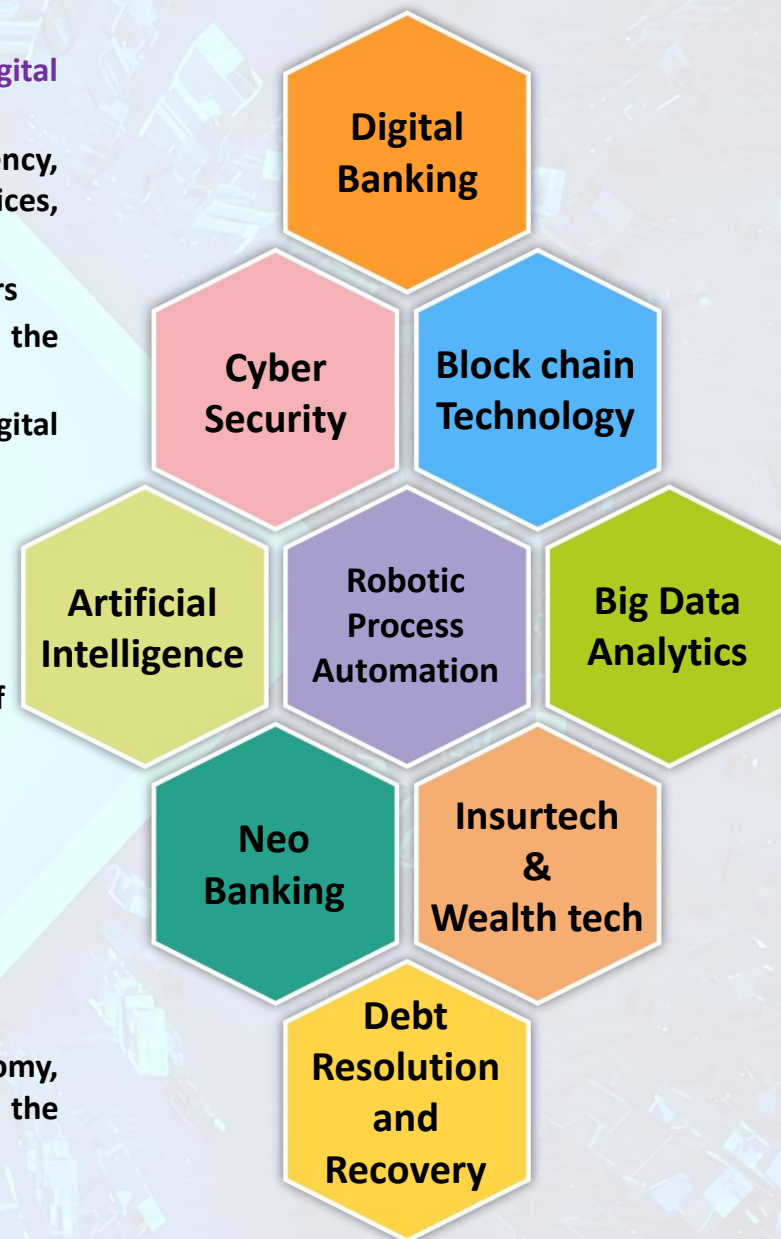

Financial services share in India's market capitalisation increased to 24% in FY21 from ~6% in FY01

- With over 2,100 Fintechs operating currently, India is positioned to become one of the largest digital markets with rapid expansion of mobile and internet
- Low mutual fund penetration of 5-6% reflects latent growth opportunities
- Emerging digital gold investment options

Insurance:

India ranked 10th in life insurance, 14th in non-life insurance in the world

- The recent pandemic has emphasized the importance of healthcare on the economy, and health insurance would play a critical role in the effort to strengthen the healthcare ecosystem
- Insurance market in India is expected reach US\$ 222 billion by 2026
- Investment corpus in Indian insurance sector might rise to US\$ 1 trillion by 2025

Fund Positioning

- For **investors willing to participate in the potential growth of the Indian Banking & Financial Services sector** which has a high correlation with growth of the Indian economy
- Investors with a long term horizon and willing to participate in sectoral **themes emerging due to digital revolution i.e. ‘when finance meets technology’**

Fund Strategy

- The scheme will **invest in BFSI companies that are expected to benefit from financial inclusion and evolving digital technologies.** These include Banks, NBFCs, Insurance, Fintech Platforms, AMCs, Wealth Management, Exchanges, Rating Agencies etc
- Being an inflection points strategist, our **money managers will construct a focused or diversified portfolio based on the macro environment**
- **Will actively hedge our portfolio, if it is Risk-Off environment for BFSI sector**
- **VLRT, our risk mitigating investment framework, and Predictive Analytics tools will be used to dynamically manage the known risks and opportunities across the portfolio**

- **Growing Indian Economy:**

India is one of the fastest-growing economies globally, with a large and dynamic consumer base making it an attractive investment opportunity

- **Demographic Advantage:**

India has a young and growing population, with a rising middle class that is increasingly participating in financial services

- **Robust Banking Sector:**

India's banking sector is well-regulated and has witnessed significant reforms in recent years. The sector is characterized by a mix of public and private banks, offering a diverse range of services and products

- **Expanding Insurance Market:**

The insurance industry in India is expanding rapidly, driven by increasing awareness, rising income levels, and government initiatives

- **Government Support and Reforms:**

The Indian government has implemented various reforms and initiatives to promote financial inclusion, digital payments, and ease of doing business

- **Technological Advancements:**

India is witnessing significant technological advancements in the BFSI sector, with the rapid adoption of digital banking, fintech innovations, and mobile payment solutions

- **Portfolio Diversification:**

By diversifying across different sectors, you can potentially reduce risk and enhance overall portfolio performance

■ **Enhanced Access and Convenience:**

Digitalization has significantly improved access to financial services. Smartphones and internet connectivity has brought financial services closer to the previously underserved segments of the population

■ **Digital Payments and Cashless Transactions:**

Unified Payments Interface (UPI) and digital wallets have made cashless payments more accessible and convenient

■ **Fintech Innovation:**

Fintech firms have introduced innovative products like peer-to-peer lending, robo-advisory platforms, digital insurance, and mobile banking solutions

■ **Data Analytics and Personalization:**

Digitalization has enabled data analytics and personalized offerings enhancing customer satisfaction, customer loyalty, and business growth

■ **Streamlined Processes and Cost Efficiency:**

Automated processes, such as online account opening, loan application, and KYC verification, have simplified and accelerated customer interactions

■ **Risk Management and Security:**

Advancements in risk management and security measures with robust authentication mechanisms, encryption techniques, and real-time fraud detection systems have improved security standards and enhanced the identification and mitigation of risks

Investment Process

Global Risk Appetite Analysis and Global Liquidity Analysis to determine the flow of money across asset classes, regions and countries

Indian Risk Appetite Analysis and Domestic Liquidity Analysis to determine whether it is a "Risk On / Risk Off" Environment

Money Flow Analysis can help identify sectors at inflection points that are experiencing a shift in perception

The VLR components of our VLRT framework spring into action and help us shortlist stocks

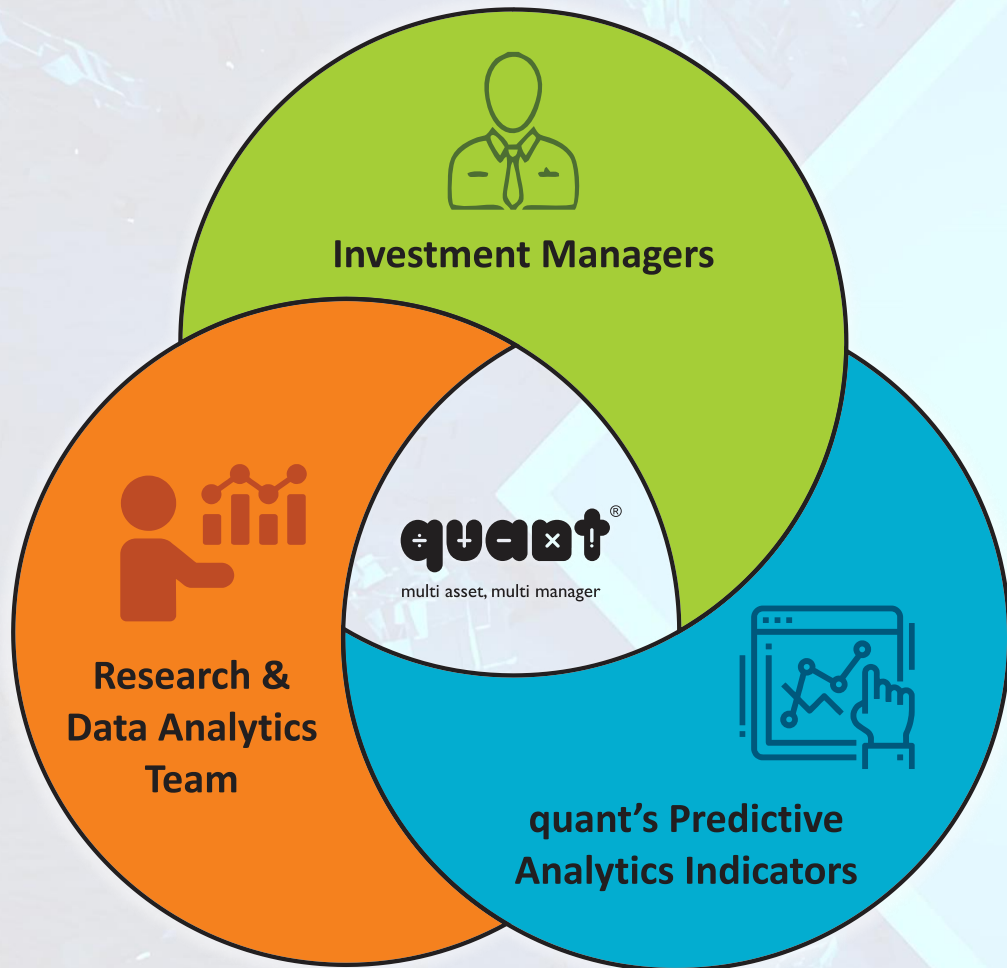

Lastly, it comes down to "Timing" – a function of all our analytical factors

quant
Port-
folio

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

“Analysis Adds Up”

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes**, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team** – each with diverse sets of capabilities and experiences
