**CONSUMPTION**  
An open ended equity scheme following consumption theme **FUND**

*Mathematics of human behavior*

“

Consumption is the sole end and purpose of all production

”

– Adam Smith, Scottish Economist & Philosopher

quant<sup>®</sup>  
**CONSUMPTION**  
FUND

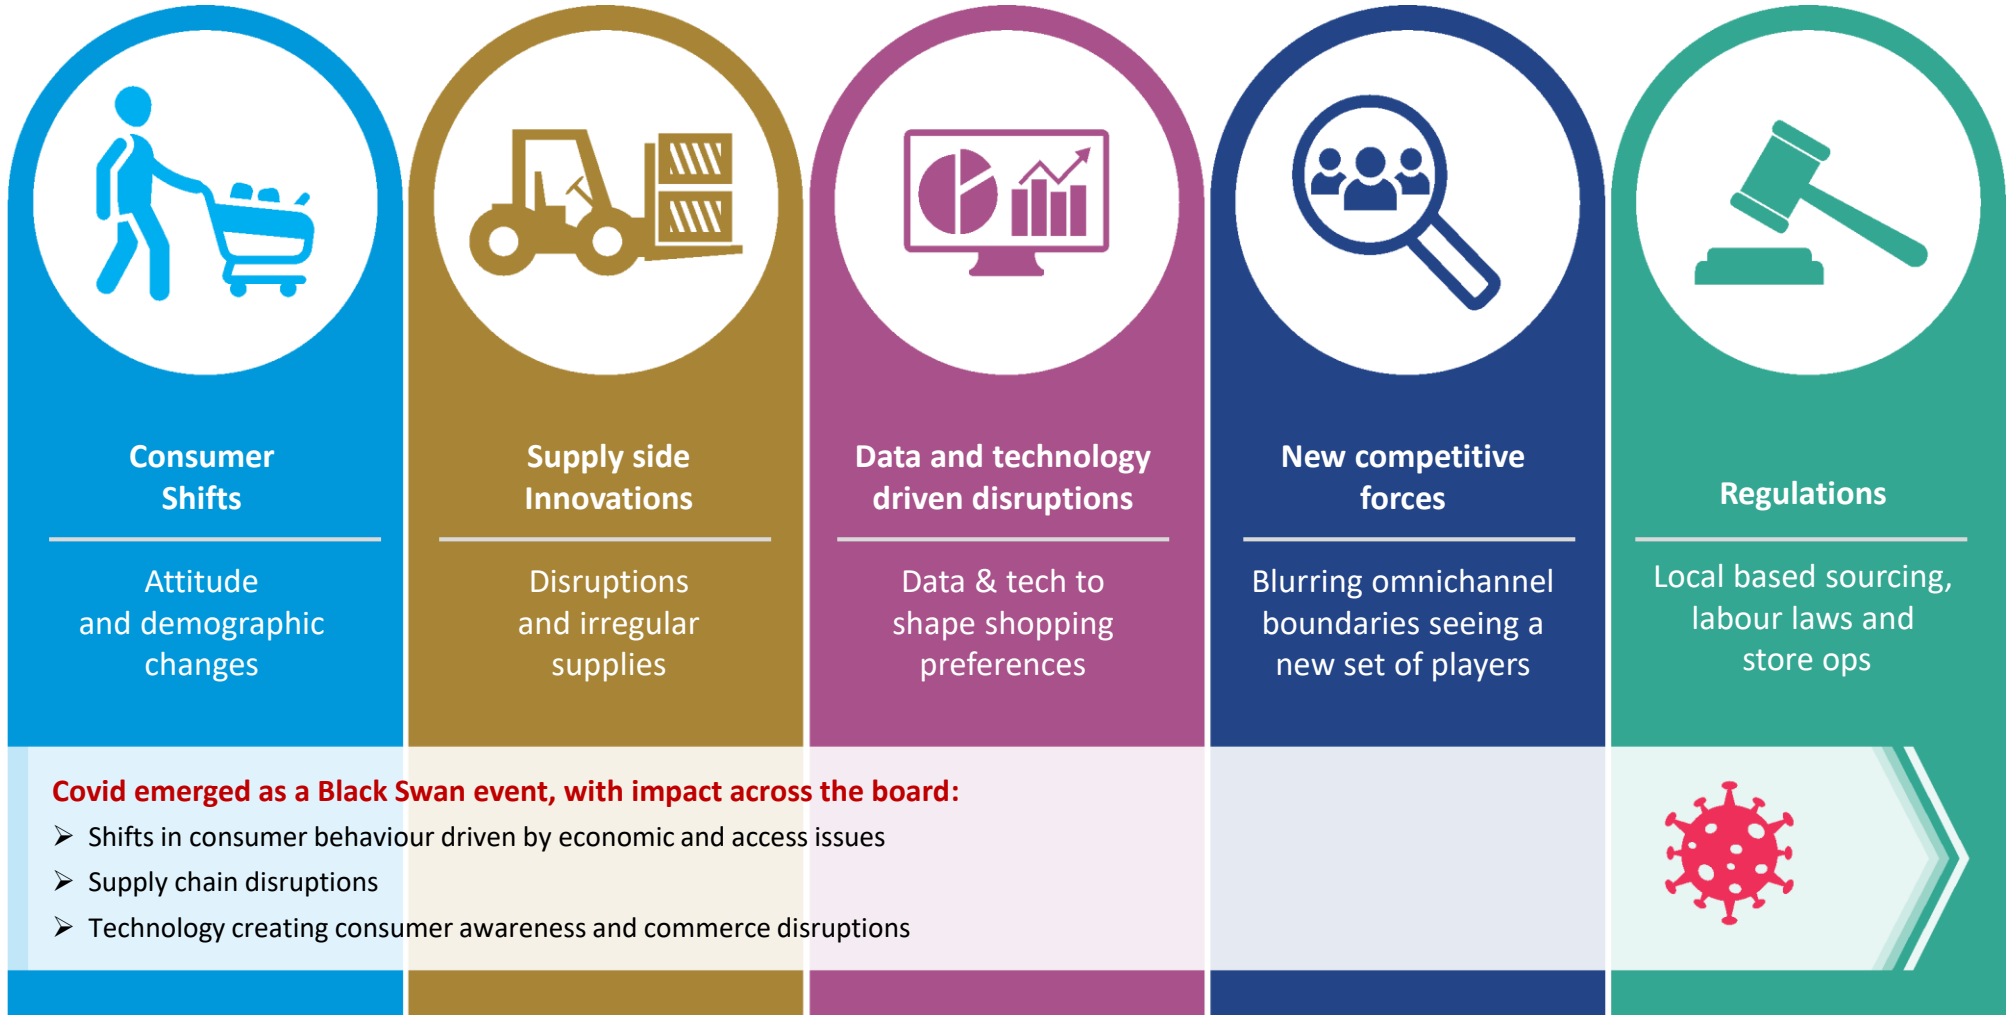

- The core innovation behind the VLRT Framework is the synthesis of various dimensions to identify inflexion points, long before the larger trend plays out and therefore at quant, we are inflexion point and cycles strategists, instead of momentum chasers. The difference in looking for inflexion points is that it allows us to position ourselves at the most opportune phases of the cyclical flow of markets
- Through our Predictive Analytics platform, our Cycles Analytics framework works to identify cycles of various lengths and amplitudes, across asset classes and the inter-linkages and overlaps of these multifarious cycles synthesized into the business cycle. Few months ago, as we launched the 'quant Business Cycle Fund,' the objective was to provide investors with a high risk appetite, a safe avenue through mutual funds to capitalise specifically on cycles
- We are today at an important juncture, as the VLRT multi-dimensional Framework clearly points out that a medium term bottoming of Risk Appetite is very near providing the impetus for a new business cycle and Liquidity Analytics are supportive for past many months. The last time the multi-dimensional variables of the VLRT framework were coming together to indicate such a turning point was in March-April 2020, post which there were strong resulting trends to the downside and upside, respectively
- The advantage of taking a position in inflexion points is that the risk-reward ratio is the most favorable, which makes a significant difference to risk-adjusted performance. At the confluence of various cycles, the mathematics of market patterns starts working in favor of dynamic money managers such as us
- As per the VLRT Framework, specifically the peaking of Volatility Expansion Phase 2018-23, and now as 2023 has passed, this phase will be remembered as the culmination of several cycles including the war, and financial crisis cycles and 2024 will be less volatile compared to past five years
- To ride this wave, and navigate through the resulting business cycle, we have launched series of thematic funds, which are strongly correlated with cyclical upturns; **quant Consumption Fund is one of the best opportunities to capitalise on the India growth story, as our Predictive Analytics is endorsing a structural uptrend and the consumption theme opportunity could span decades**

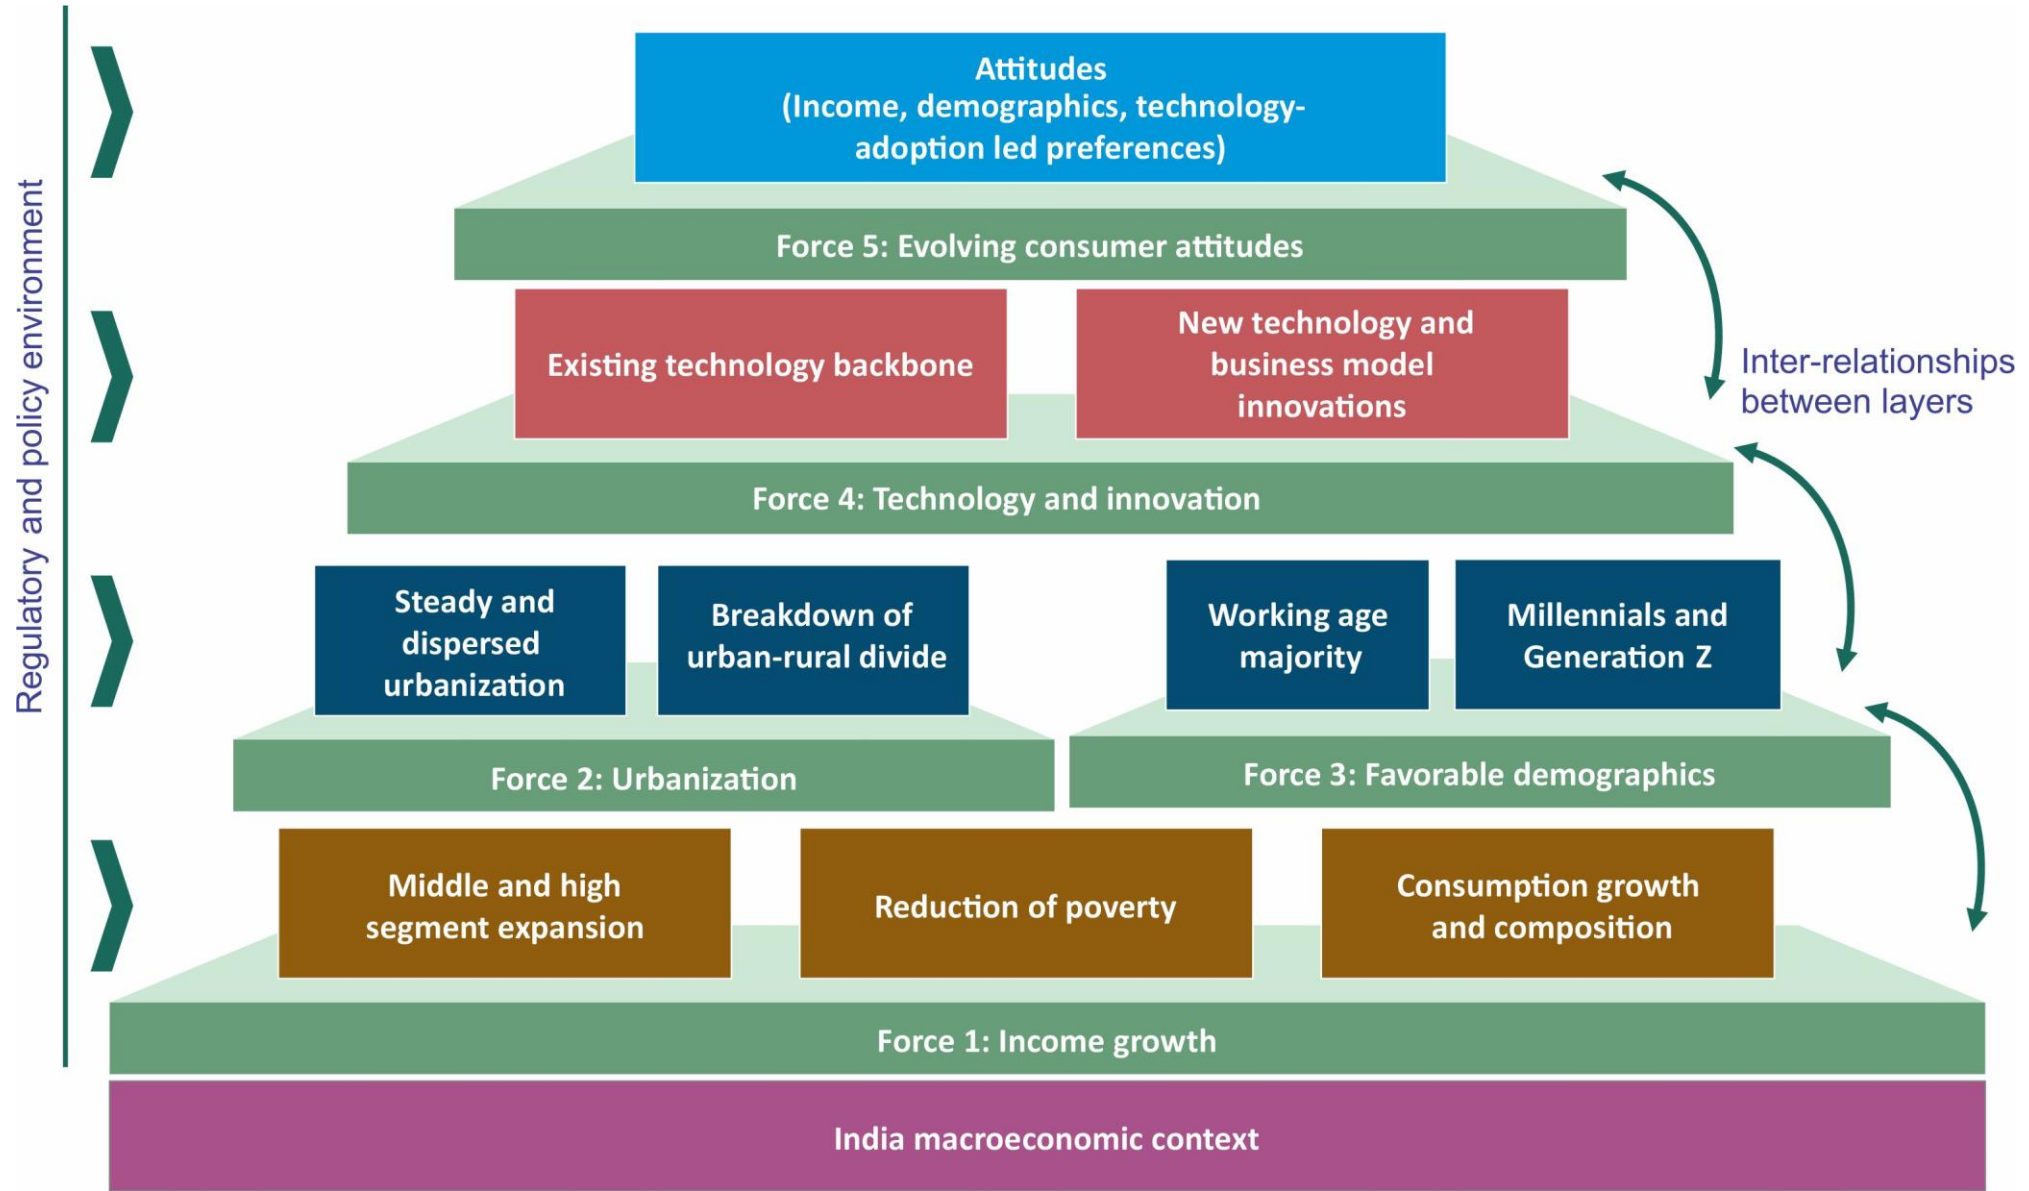

**Quest for Quality:** Despite the cost-of-living crisis consumers value quality over quantity and are re-evaluating their spending habits. Companies are investing in **high quality and premium offerings** to entice consumers and foster brand loyalty

**Ethical Spending:** Sustainability is at the forefront of decision-making. Ethical spenders buy from eco-friendly brands. Brands are **investing in sustainability and offering competitive pricing** to capitalize on the modern and socially conscious consumer

**Trust in Data Sharing:** Targeted ads and customized online content are no longer an irritant for consumers. Consumers want ads catered to their interests, location, and lifestyle preferences. Companies now develop **tailored campaigns as a powerful way to attract new customers**

- Consumption spend of Indian households has evolved over the last two decades with share of categories like **health, clothing and footwear increasing from basic categories like food**
- Many **new categories and channels of spending accelerated** during this time
- Covid-19 brought **changes in the spending patterns and long-term lifestyle of consumers**

### **Empowered Customers**

Growing information empowers consumers in their decision making and they demand more value from products and services

### **Adaptive Models**

To reach these demanding customers, companies are revamping sales and distribution channels and technology

### **Strategic Partnerships**

Companies are driving growth, by importing knowledge and technologies through licensing and partnerships

### **Innovation Mind-set**

Increasing awareness of consumers' needs, investing in R&D, and unlocking new solutions, new business models, and new approaches

### **Increased Accountability**

Alignment of top management and board with accountability for growth, integrity, sustainability and social impact as core values of the organisation

- **Burgeoning millennial population:** Higher spends on better experiences, quality products and reputed brands
- **Increasing women workforce:** Increase in family income and rise in discretionary spending
- **Growing wallet share:** Categories like personal grooming and personal gadgets are seeing increased consumers' wallet share
- **Growth of malls:** Rise in number of malls offering international and domestic brands
- **Growth of online markets:** Online retailers deliver to remote Tier III & IV markets creating awareness of acclaimed brands

Exhibiting strong YoY growth from April-September 2023

## Rise in Digital Payments

## Increase in Domestic Air Passenger Traffic

## Increasing Housing Sales and Launches

## India's PMI Manufacturing was higher than that in major economies

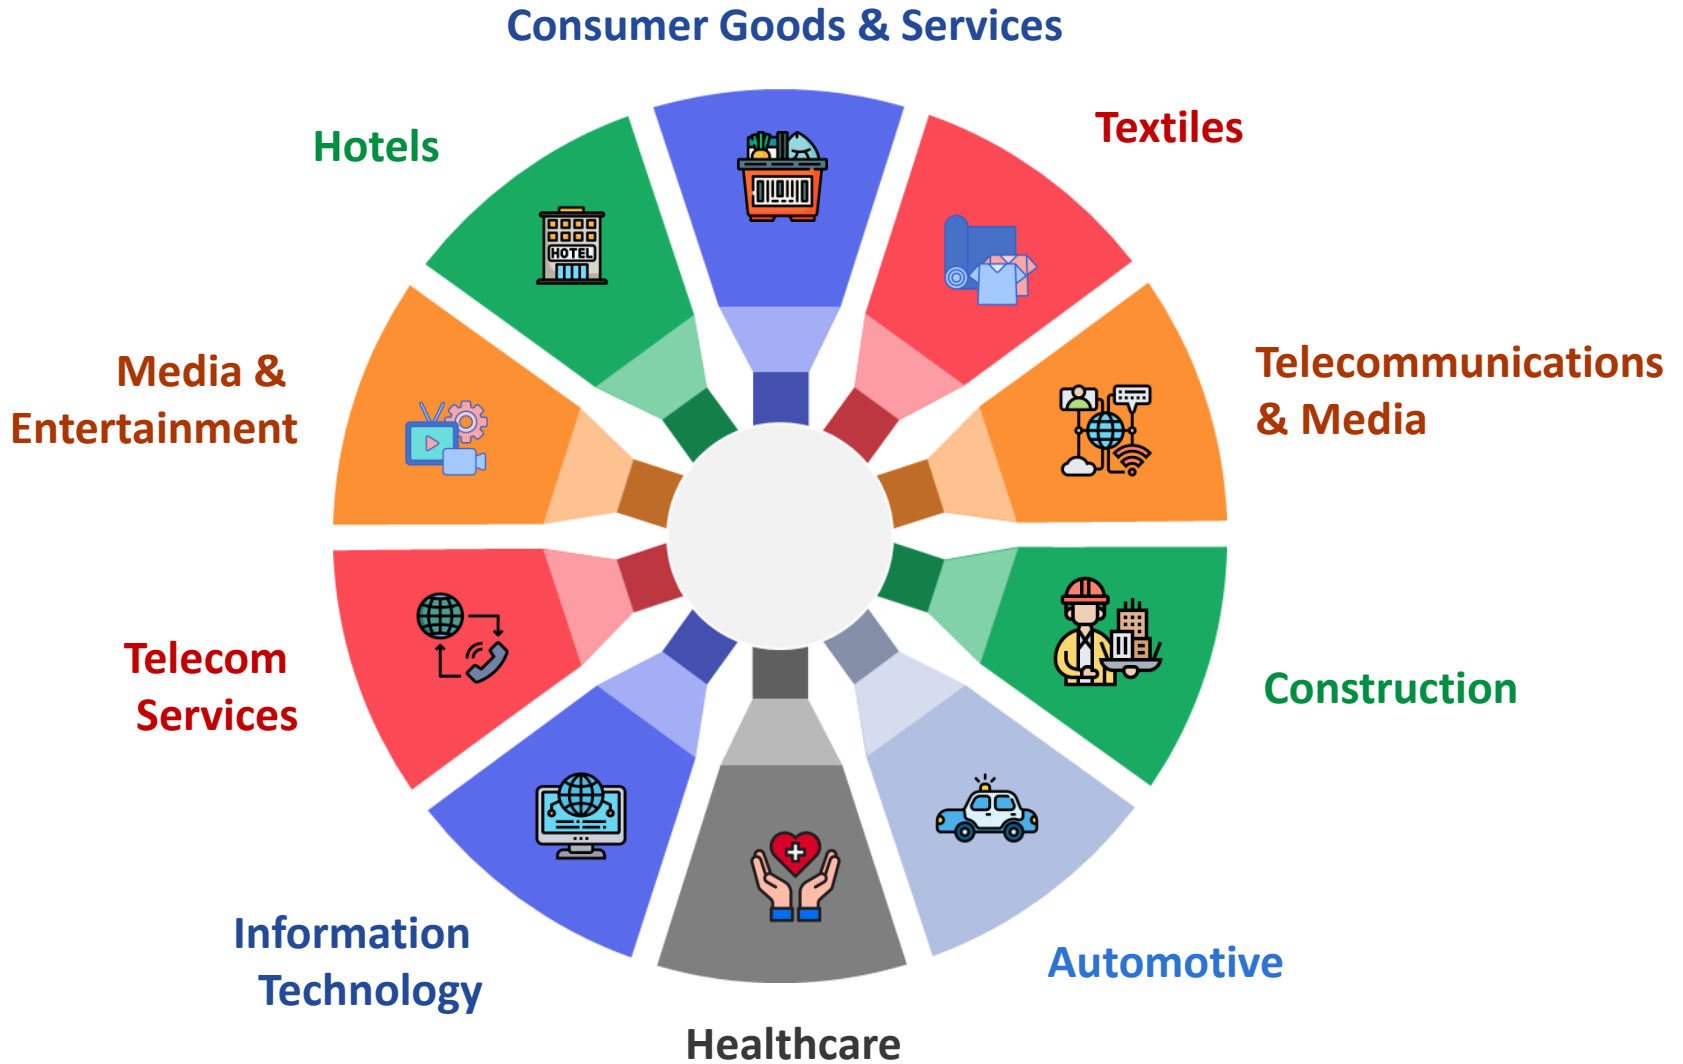

### Rising Tractor Sales

### Rising Bank Credit to Agriculture sector

The scheme will primarily invest in companies which benefit from the Indian consumption story. Since consumption is a multi-decade opportunity and is expected to play out for several decades to come, the fund aims to actively identify and invest in companies, which are most likely to benefit from increased consumer spending and affluence

### Fund Positioning

- Fund objective is to benefit out of economic imbalances in markets and **participate in the cyclicality of sectors and stocks** to generate superior risk-adjusted returns, being **suitable for investors with a long term horizon**

### Fund Strategy

- The scheme will tilt exposure to a select 6-8 consumption themes and **concentrate mostly on 3-4 core emerging themes** most of the time, that are expected to be on the cusp of a growth cycle, as evaluated through macro economic analytics and changing human behavioral patterns
- The scheme can **invest 80-100% in equity and related instruments of companies engaged in consumption led sectors; remaining 0-20% can be invested in other sectors, exploiting a range of investment opportunities within the concept of a focused portfolio**
- The business cycle approach is to identify sectors through our **Predictive Analytics model**, which provides a multi-dimensional framework of sector allocations across business cycles
- Through **Money Flow Analytics**, quant money managers will **invest in sectors and companies that are expected to benefit from the given phase of the economy**
- Maximum sector exposure will be capped at 33.33% purely from risk mitigation perspective
- Sector allocation will be **managed dynamically across market caps, providing another level of diversification**
- Our time trusted **risk-mitigation VLRT Framework and Predictive Analytics indicators will be used to dynamically manage the known risks and opportunities** across the portfolio

**The Growth Story**

With India poised to become the third-largest consumer market globally by 2030, investing in quant Consumption Fund emerges as a compelling opportunity. This offers a long-term horizon for investors and holds a unique advantage by straddling both cyclical and defensive sectors

**Changing Dynamics and Consumer Behaviour**

India's favourable demographics, increased women's participation in the workforce, and growing influence of technology and social media contribute to rising consumer spending. Aspirational Indians are now spending more, moving their consumption from unorganized to organized markets, favoring premium categories and often relying on credit. This presents a multi-decade investment opportunity

**Riding the Prosperity Wave**

As India's consumer market surges, your investment is in sync with the nation's economic highs offering a chance to ride the waves of prosperity. Our adaptive portfolio will be dynamically rebalanced as per our Cycles Analysis and will be continually exposed to emerging growth opportunities within the consumption space

**Aligned with Daily Choices**

Your investments align with the daily preferences and habits of millions, tapping into the pulse of what people buy and use in their daily lives. As demand for goods and services increases, the price of those goods and services usually rises as well with a positive impact on the investments made in these companies

**Top Performing Picks**

The portfolio will consist of investments in some of the best companies driving India's consumption story. With a strategic focus on consumer-facing companies, the fund can potentially outperform offering a chance for your investment to stand out

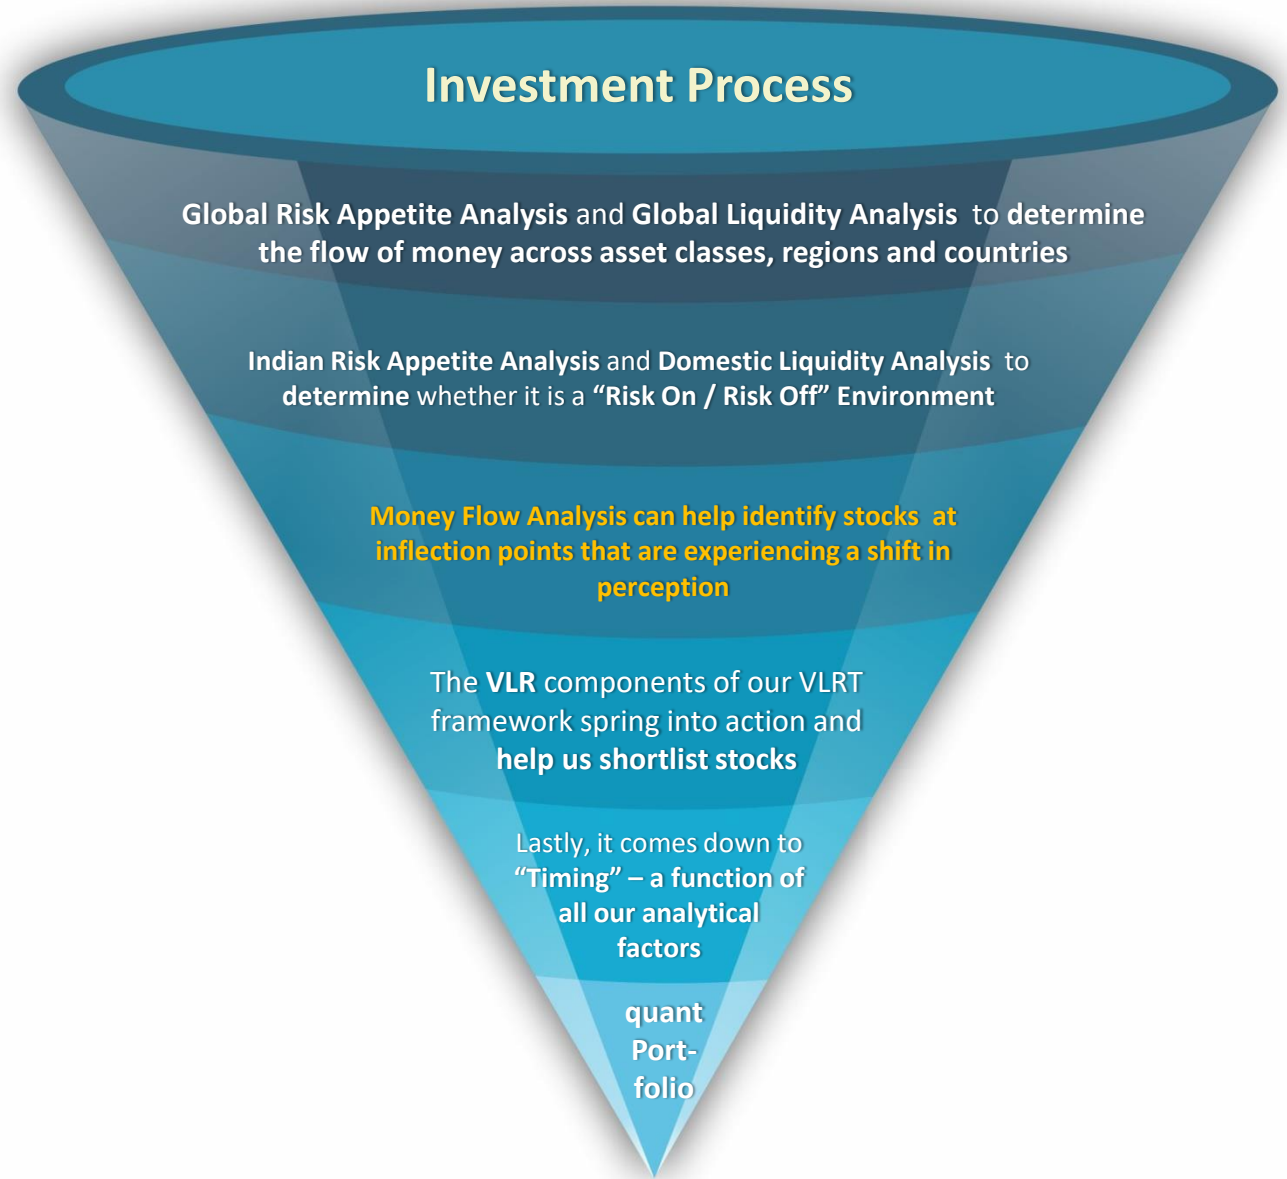

**Opportunities for Diversification**

Even with a focus on specific consumption driven sectors, you enjoy a level of diversification within that sector, allowing for a balanced exposure to different consumer-driven industries

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

**In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach**

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

## “Analysis Adds Up”

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes**, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team** – each with diverse **sets of capabilities and experiences**
