

DINAMIC ASSET ALLOCATION

(An Open Ended Dynamic Asset Allocation Fund)

FUND

LIFE IS LIKE

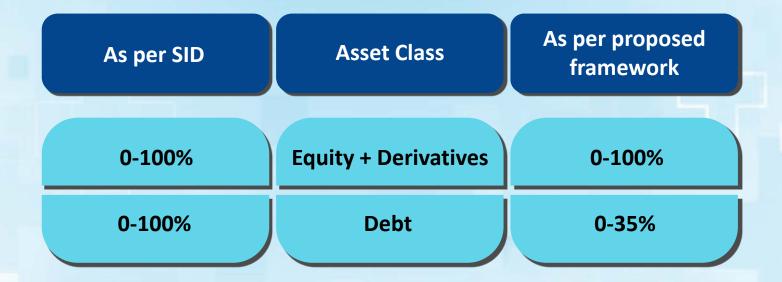

allocation truly dynamic

- To avail Equity Taxation Minimum 65% equity exposure will maintained
- Derivatives instruments will be used to hedge equity exposure up to 100%
- Suitable for traditional long-term investors
- Nil Exit Load

quant DAAF

positioning

- The <u>unique feature of the scheme stems from its mandate to dynamically rebalance equity exposure</u> (0 to 100%) and debt exposure (0 to 35%), in line with our view on Risk-On or Risk-Off environment, to earn superior risk-adjusted returns. quant money managers have full flexibility and can even hedge up to 100% equity exposure by using derivative instruments in extreme risk-off environment
- quant DAAF aims to capture upside in the bull phase and limit the downside in the bear phase and thus reducing the volatility of the overall portfolio
- The scheme provides the widest scope for traditional investors who are prepared to invest for long-term and willing to take call on money managers, who can take calls in both normal as well as extreme environment to generate superior risk-adjusted returns
- As an Adaptive Asset Allocator, we try to gauge prevailing macro environment and try to understand the intensity of both Risk Appetite and Liquidity for various asset classes and accordingly rebalance the portfolio dynamically.
- When both Risk Appetite and Liquidity are at elevated levels, we dynamically increase our equity exposure Similarly, when Risk Appetite and Liquidity are at exhausted levels, we will increase debt exposure substantially
- Our money managers will take prudent steps to allocate towards high quality debt instruments dynamically across maturities. Similarly, equity allocation will be managed dynamically across market caps
- Our time trusted risk-mitigation VLRT Framework and Predictive Analytics indicators will be used to dynamically maximize the opportunities across the portfolio. We have demonstrated the same in the past and emerged as an outlier in most of the categories in which we operate

quant DAAF investment process

building a dynamic portfolio

Why is Dynamic Asset Allocation needed?

In a dynamic world and highly volatile markets, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

quant DAAF will dynamically readjust asset allocation on the basis of our "VLRT + Q2" (VLRT with Quantifiable Quality)

Framework and Predictive Analytics indicators, for superior risk-adjusted returns. The scheme is unconstrained – i.e., no market cap bias (equity) or maturity bias (debt)

Equity Universe Nifty 500

Debt Universe Bonds, G-sec, Money Markets

Global Risk Appetite Analysis and Global Liquidity Analysis to determine the flow of money across asset classes

Indian Risk Appetite Analysis and Domestic Liquidity Analysis to determine whether it is a "Risk-On / Risk-Off" Environment

Risk On Environment – Increase Equity Exposure

Risk Off Environment – increase Debt Exposure

"VLRT + Q2"
VLRT with Quantifiable Quality

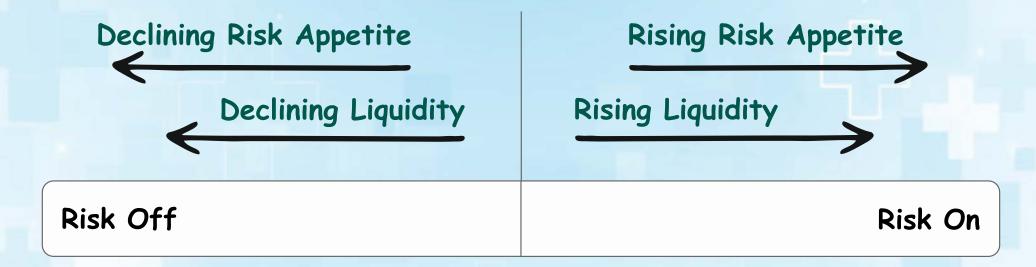

Lastly, it comes down to "Timing" – a function of all our analytical factors

> quant DAAF Portfolio

quant DAAF investment scenarios

adaptive asset allocation

Debt Exposure (0-35%)

Equity + Derivatives Exposure (0-100%)

active management for unpredictable markets

adaptive alpha strategy across equity, fixed income and derivatives

Brings in maximum possible diversification within asset classes into a single portfolio

Proactively rebalances portfolio to adapt to changing macro environment

Moderates portfolio volatility by limiting extreme outcomes and optimizing inflection points

quant DAAF - riding with dynamism

multi-dimensional research

multi asset, multi manager | multivariant analytics

"Analysis Adds Up"

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing across asset classes, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between investment managers, research analysts and analytics team - each with diverse sets of capabilities and experiences

qGR's VLRT investment framework dynamic money management

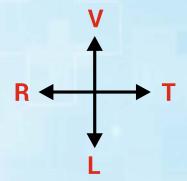

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant.

Our unique analytical framework for enabling 'predictive

Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform

A diverse set of variables and participants are continuously interacting with each other in myriad ways In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT]

Being Relevant with 'predictive analytics'

Note: Data as on 06 March '24. Past performance may or may not be sustained in future. Returns less than 1 year are simple annualised and above 1 year are CAGR. *BM – Benchmark of the scheme.

quant I money managers

Sandeep Tandon | Founder & Chief Investment Officer

Sandeep is the founder & chief investment officer of the quant Group and has a vast experience of over 27 years in the capital markets. His journey in the money management business started in FY 1992-93 with GIC mutual fund (a JV partner with George Soros in India) where he was a trainee. He later joined IDBI Asset Management (now Principal Asset Management), where he was a founding member and was part of the core team that initialized the asset management business. He played a key role in devising, conceptualizing and marketing one of India's most successful mutual fund schemes: IDBI I-NITS 95. Furthermore, Sandeep worked in pivotal positions at several reputed financial services firms including ICICI Securities (a JV partner with J P Morgan in India), Kotak Securities (a J V partner with Goldman Sachs in India) and REFCO (erstwhile global derivatives firm). He has also worked at the Economic Times Research Bureau (a research wing of Bennett, Coleman and Company Limited)

Sandeep's credentials as a Global Macro Strategist are well established. He has channeled his vast experiences, interests and novel thinking into build the predictive analytics framework and the dynamic VLRT investment framework of the quant group. It is these frameworks coupled with his deep understanding of various asset classes at a global level, including, credit, commodities, equities and now digital currencies that enable Sandeep in definitive identification of market inflexion points and arrive at conclusive micro and macro calls

Sandeep has a strong belief in quant Group's role as a knowledge partner in creating awareness about latest developments in investment philosophy and ideas, such as behavioral research. It is for this reason that he believes investor education is of utmost importance and the group, under his leadership, has undertaken many initiatives in this regard. Based on this belief Sandeep authored a book titled 'Being Relevant' which was published in May 2019. This book builds on research covering decades, even centuries of data points, distilled through quant's VLRT framework and predictive analytics indicators. The book further outlines the potential trajectory for the world in the coming decades that can help money managers and investors prepare for volatile times which will upend the conventional analytical methods and beliefs of the past decades

quant I money managers

Ankit Pande, CFA | Money Manager

Ankit has an experience of over 9 years in Indian equities and over 3 years in software products. He started his career in core banking software with Infosys' Finacle, nurturing the product with large banking clients in APAC and small and mid-sized banks in India. He then moved in to equity research, along the way picking up the (U.S. based) CFA charter and a masters in business administration from The Chinese University of Hong Kong in 2017, being placed on the school's Dean List. He won the Thomson Reuters StarMine Award for best stock picker in the IT sector in 2014 and is a lifetime member of the Beta Gamma Sigma academic honour society. Over 2015-2019, Ankit ventured into seed stage fund raising, equity sales & relationship management in APAC. In his spare time, Ankit likes to read books on business cycle theory, macroeconomics & geopolitics

Sanjeev Sharma | Money Manager

Sanjeev brings along a rich and diverse experience in the Capital Markets of over 18 years to his role of a Money Manager. He has obtained an M.Com, PG Diploma in Business Administration (Finance) and Certified Treasury Manager (Forex & Risk Management). He has been associated with various schemes of quant mutual fund since 2005. Sanjeev specializes in analysis of credit risk and is responsible for monitoring and assessing investment opportunities across asset classes. He has a deep understanding of macroeconomic policies and its impact on the credit markets. Over the years, Sanjeev has built formidable relationships with key treasurers in the industry. In his spare time, Sanjeev enjoys reading, listening to music and traveling.

Vasav Sahgal, CFA | Money Manager

Vasav is one of the youngest and most dynamic top rated Money Manager in the Mutual fund Industry. After clearing 3 levels of the CFA program, he started his journey with the quant Group as an investment analyst for equity as well as fixed income instruments. On a day to day basis, he is primarily responsible for equity asset allocation and credit research. Vasav is passionate about developing models using coding and has been deploying advanced data analytics in python for improved valuation analytics. Given his role, Vasav is the embodiment of our strategy – Adaptive Asset Allocation. In his spare time, Vasav enjoys drumming and reading financial literature extensively
