Investment Approach

Minimum 80% will consist of instruments, issued and guaranteed by Central/State Governments

Take duration calls basis the underlying interest rate view and will actively manage interest rate risk

Aims to play across the interest rate curve by investing in government securities across different maturities to generate capital gains

Aims to identify government securities across maturities, which offers an optimal blend of duration and reasonable yield

Reasons to Buy

Ideal for risk-averse investors with a short to medium-term investment horizon

Gilt funds are a great choice to add more diversification and stability, especially in an equity heavy portfolio

Zero credit risk as the government generally fulfills its obligations unlike corporate bonds

Investments are government-backed, where chances of any significant capital loss are close to none

VLRT Framework | Adaptive Money Management

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

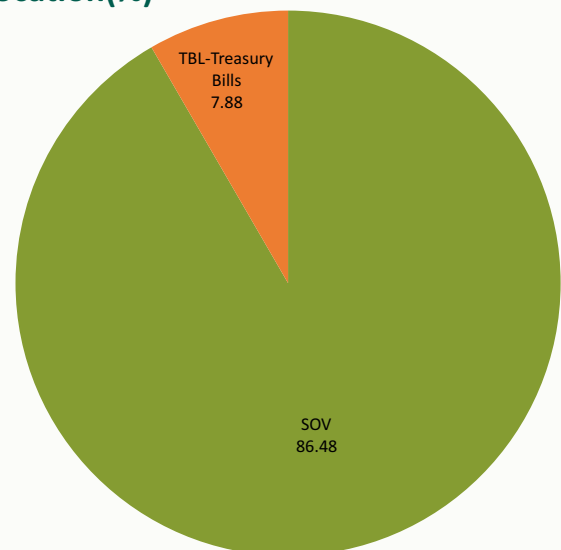

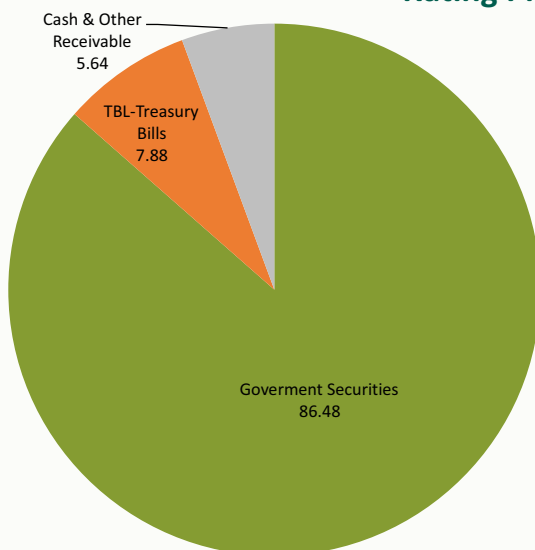

The core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform. A diverse set of variables and participants are continuously interacting with each other in myriad ways.

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].
