GILT  FUND

(An open ended debt scheme investing in
government securities across maturity)

Given our abilities and unique skillset, we are uniquely positioned to practice our **'Active | Absolute | Unconstrained'** style of money management in the Indian debt market.

GOVERNMENT BONDS

*Trusted choice
 for every portfolio*

Minimum 80% of the portfolio will consist of instruments, issued and guaranteed by Central/State Governments.

Scheme will take duration calls basis the underlying interest rate view and will actively manage interest rate risk.

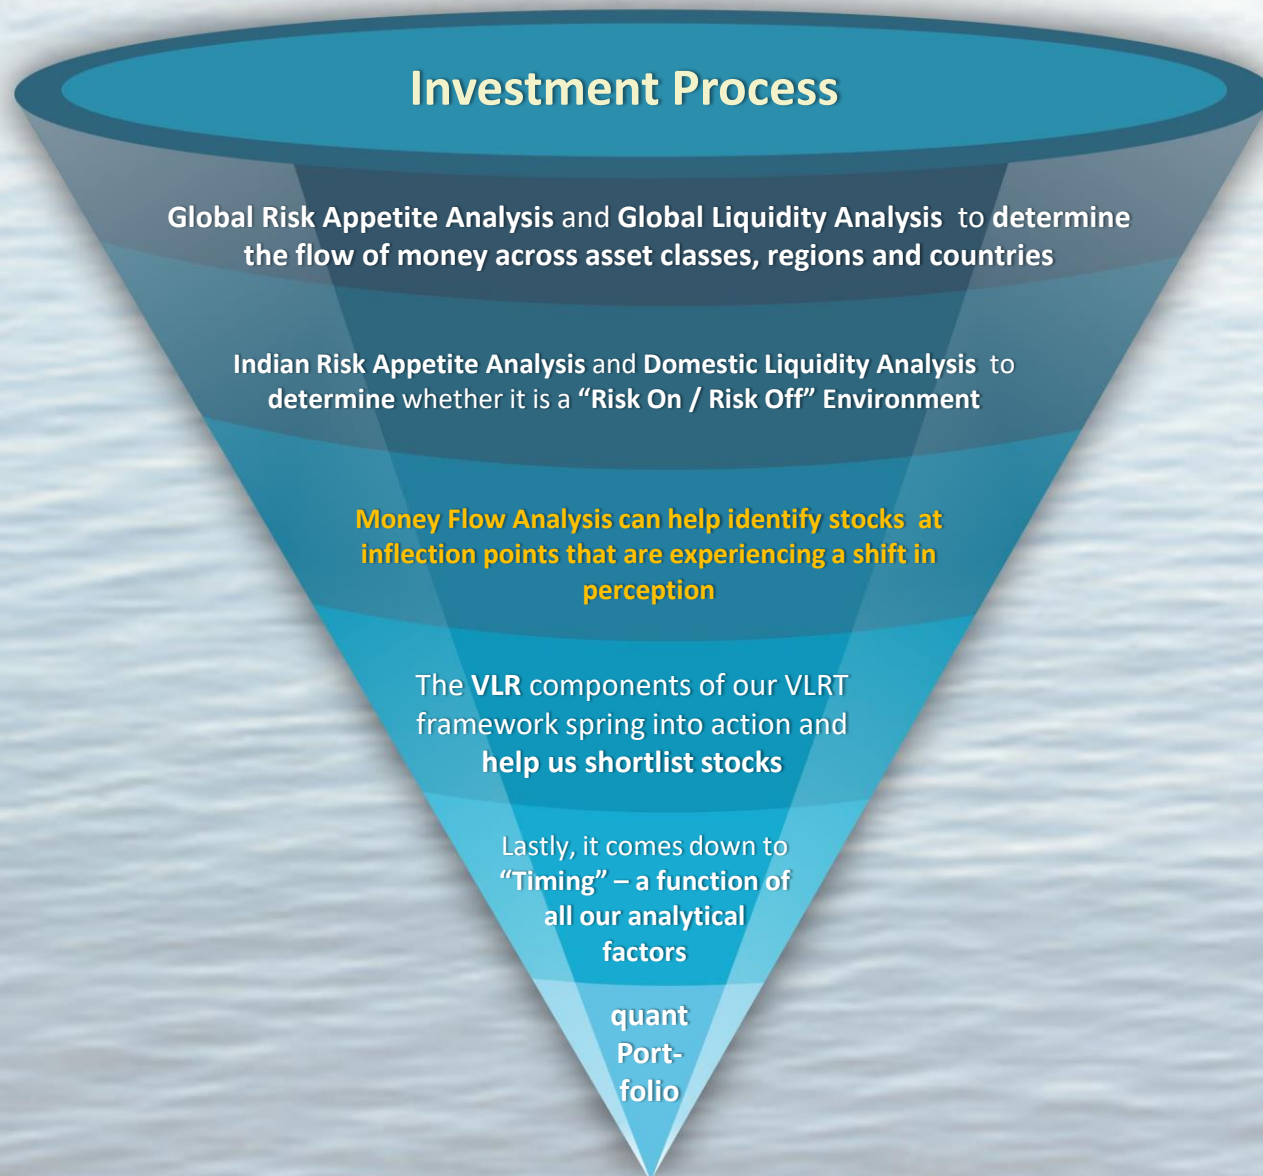

Aims to play across the interest rate curve by investing in government securities across different maturities to generate capital gains.

OUTLOOK:

1. Our Predictive Analytics models are showcasing that the world liquidity indicators are bottoming out and quantitative tightening (QT) impact of maximum tightness phase has also globally peaked out. Hence, we conclude that rising interest rate cycle in US (10-year Treasury Bill) has already peaked out in October 2022; both from near-term and from medium-term perspective .
2. At qGR we believe that an economic trough has reached and economic activities will gather momentum in 2023. Next year will not be as bad as 2022 for the global asset classes, because the liquidity cycle is bottoming out.
3. Chinese People's Bank (PBoC) has started easing. It has injected the largest liquidity booster to their market since 2020 as domestic economy remains weak due to the Covid lockdowns and more policy initiatives are expected from PBoC in 2023 also.
4. In fact, the majority of global economies are now feeling the pain of extra tightening and hence US dollar liquidity will be further eased in CY 2023.
5. Overall, our indicators are endorsing that economic momentum will pickup in 2023 and by second half of the year, this should propel global asset markets to a higher level. Apart from global central banks, including Fed actions, which were in focus in entire 2022; other economic parameters such as Commodities (down 9-30% from its peak), DXY (down 11% from its peak), SPX / NDX (up 15% from its bottom) are clearly indicating that something has changed. While media narrative is still very pessimistic, qGR's data analytics are showing a different picture.
6. The yield on the India 10-year treasury note, traditionally a proxy for our borrowing costs, has also peaked out both from near-term and from medium-term perspective. **The current high level of yield therefore offers an attractive entry point for investment in quant Gilt Fund.**

STRATEGY:

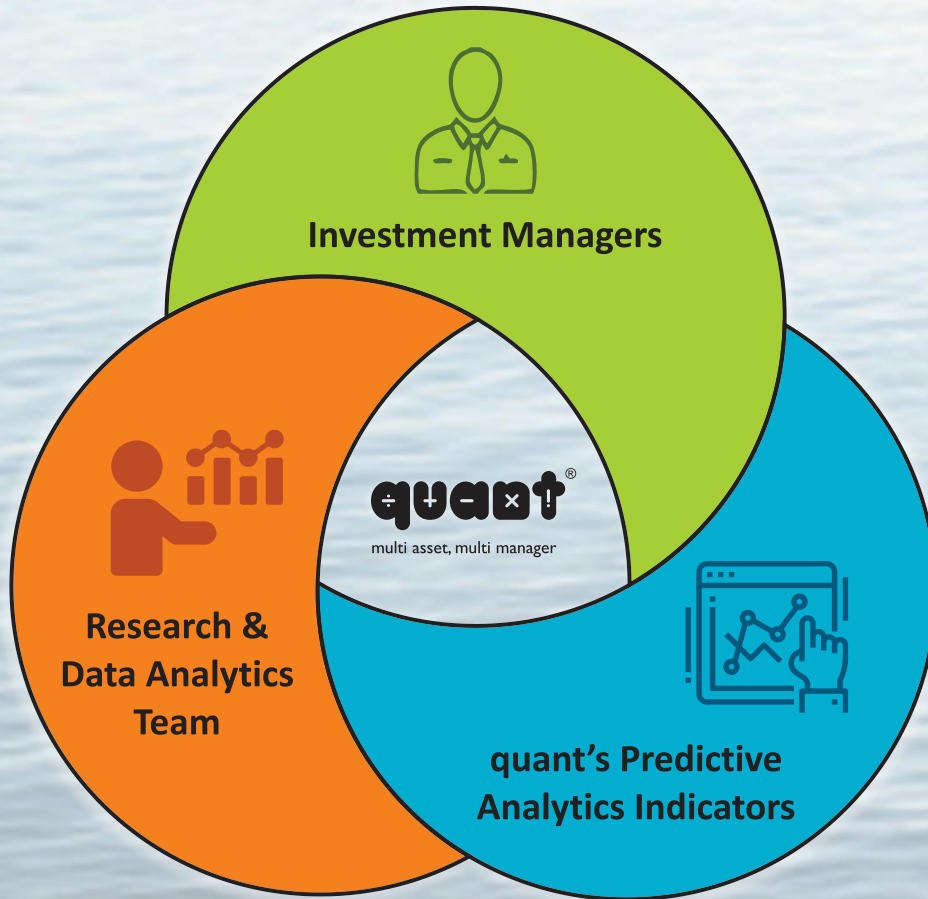

1. We will apply our **time tested and well demonstrated philosophy of 'Dynamic style of Money Management'**, aiming for better investment outcomes. The scheme will **dynamically maintain portfolio duration in line with the interest rate outlook**, i.e. high duration at peak interest rates and low duration when interest rates are relatively lower.
2. Aims to identify government securities across maturities, which offers an **optimal blend of duration and reasonable yield.**

quant pursues global research with a focus on financial markets and the real economy which includes the real economy and leveraged economy. We place a large emphasis on the role of participants' behavior. This idea has evolved into a multi-dimensional research perspective which is now formulated in our VLRT framework.

In a dynamic world, it is not just a choice but a necessity to adopt a multi-dimensional approach

The world is becoming non-linear and parabolic and to stay relevant, money managers must think with an unconstrained mind, actively update their methods and earnestly search for absolute returns, considering all markets and asset classes

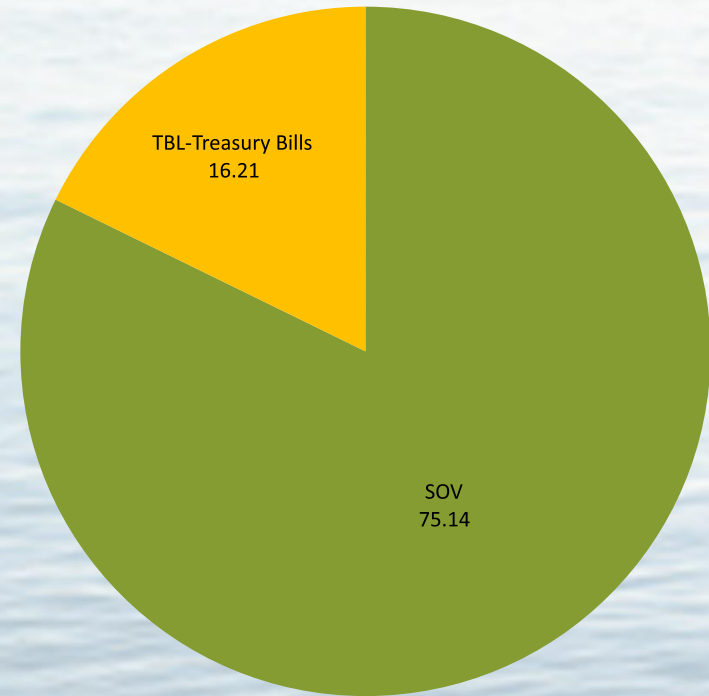

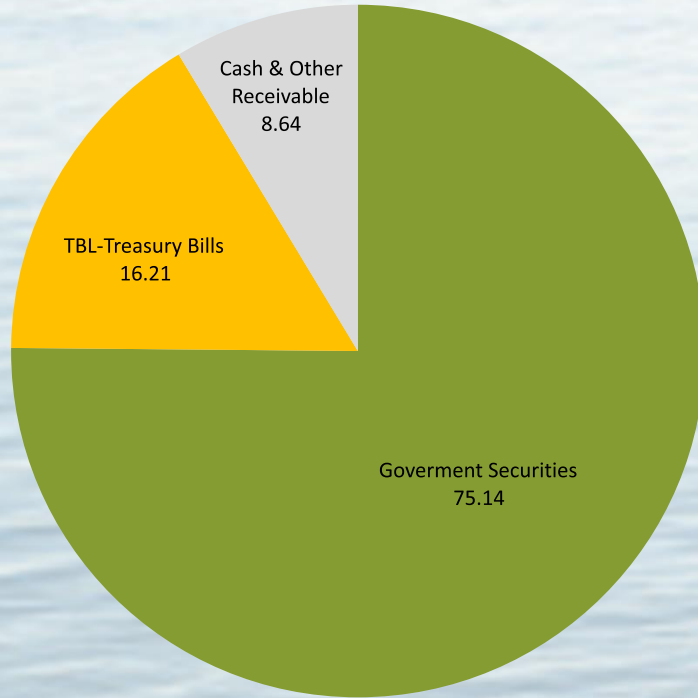

“Analysis Adds Up”

We believe safeguarding investor wealth is paramount. Apart from reducing risk by investing **across asset classes**, we take diversification to another dimension by ensuring every investment decision comes from a focused discussion between **investment managers, research analysts and analytics team** – each with diverse **sets of capabilities and experiences**

**Sandeep Tandon | Founder & Chief Investment Officer**

Sandeep is the founder & chief investment officer of the quant Group and has a vast experience of over 30 years in the capital markets. His journey in the money management business started in FY 1992-93 with GIC mutual fund (a JV partner with George Soros in India) where he was a trainee. He later joined IDBI Asset Management (now Principal Asset Management), where he was a founding member and was part of the core team that initialized the asset management business. He played a key role in devising, conceptualizing and marketing one of India's most successful mutual fund schemes: IDBI I-NITS 95. Furthermore, Sandeep worked in pivotal positions at several reputed financial services firms including ICICI Securities (a JV partner with J P Morgan in India), Kotak Securities (a J V partner with Goldman Sachs in India) and REFCO (erstwhile global derivatives firm). He has also worked at the Economic Times Research Bureau (a research wing of Bennett, Coleman and Company Limited)

Sandeep's credentials as a Global Macro Strategist are well established. He has channeled his vast experiences, interests and novel thinking into building the Predictive Analytics framework and the dynamic VLRT investment framework of the quant group. It is these frameworks coupled with his deep understanding of various asset classes at a global level, including, credit, commodities, equities and now digital currencies that enable Sandeep in definitive identification of market inflexion points and arrive at conclusive micro and macro calls.

Sandeep has a strong belief in quant Group's role as a knowledge partner in creating awareness about latest developments in investment philosophy and ideas, such as behavioral research. It is for this reason that he believes investor education is of utmost importance and the group, under his leadership, has undertaken many initiatives in this regard. Based on this belief Sandeep authored a book titled 'Being Relevant' which was published in May 2019. This book builds on research covering decades, even centuries of data points, distilled through quant's VLRT Framework and Predictive Analytics indicators. The book further outlines the potential trajectory for the world in the coming decades that can help money managers and investors prepare for volatile times which will upend the conventional analytical methods and beliefs of the past decades

**Sanjeev Sharma | Money Manager**

Sanjeev brings along a rich and diverse experience in the Capital Markets of over 18 years to his role of a Money Manager. He has obtained an M.Com, PG Diploma in Business Administration (Finance) and Certified Treasury Manager (Forex & Risk Management). He has been associated with various schemes of quant mutual fund since 2005. Sanjeev specializes in analysis of credit risk and is responsible for monitoring and assessing investment opportunities across asset classes. He has a deep understanding of macroeconomic policies and its impact on the credit markets. Over the years, Sanjeev has built formidable relationships with key treasurers in the industry. In his spare time, Sanjeev enjoys reading, listening to music and traveling
