Investment Approach

Generate alpha by identifying sectors and securities at their inflection points, **early identification of potential outperformers**, and **construct a dynamic portfolio**.

Invest minimum 80% in large caps and 20% from the Nifty 500 universe in a dynamic manner to generate alpha.

Ability to generate extra alpha by writing call options (max 20% of portfolio value) and hedge portfolio on inflection points to **combat market volatility effectively**.

“Predictive Analytics” helps in **creating a balanced portfolio and achieve outperformance** even in rapidly changing macro environment.

Reasons to Buy

Lower volatility and downside protection.

Businesses having **superior core competencies and distinctive advantages** that keep them ahead of the curve.

Highly liquid securities, thus enabling investments at **low impact costs**.

Proven track record and large contributors to India's past & future growth.

VLRT Framework| Adaptive Money Management

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The core engine that drives us and sets us apart is a **robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant**. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform. **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**
