Mutual funds are subject to market risk, please read all scheme related documents carefully.

Investment Approach

Our 'momentum' thesis is mathematically built to **identify winners** on continuous basis

Rigorous **quantitative methodologies, risk-based analysis, and systematic portfolio construction** to achieve optimal investment returns

Our 'proprietary model' combines investor views and market equilibrium to **improve asset allocation decisions while ensuring skewness to our momentum strategy**

Flexibility to **invest across market caps and sectors**

Reasons to Buy

Investment in **companies with "positive momentum"** by buying securities on a price rise and selling at their peak

Great potential for **high profits over the short term**

Exploits emotional decisions and **reaps the potential benefits of the changes in stock prices** caused by emotional investors

Provides a **sustainable framework to generate alpha on a long term basis** as momentum investing is over a century old enabler for excess returns globally

VLRT Framework| Adaptive Money Management

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The **core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant.** Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform. **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**
