## Investment Approach

Invests majorly in stocks of Central & State PSUs from various sectors to exploit a range of investment opportunities

To benefit from Indian PSUs by unlocking opportunities from increased capex and reforms in critical economy building sectors

Concentrate mostly on 6-8 focused opportunities mostly, that are expected to be on the cusp of a growth cycle

Business cycle approach for a multi-dimensional framework of sector allocations across business cycles

## Reasons to Buy

- Government backing in PSUs offers a **relative sense of stability and reliability** making them an attractive option during market uncertainty
- Consistent **dividend distribution history of PSUs** potentially enhances the overall returns on investment
- Gradual and **sustainable long-term growth potential** is beneficial for investors who prioritize a steady appreciation of their investments
- **Diversifying beyond private companies** helps mitigate risks from sector-specific downturns providing a more resilient portfolio

## VLRT Framework | Adaptive Money Management

*Being Relevant with 'predictive analytics'*

### VALUATION ANALYTICS

Knowing the difference between price and value.

### RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

### TIMING

Being in sync with the waves of value and behaviour

### LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The core engine that drives us and sets us apart is a **robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant.** Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

#### Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**
