Investment Approach

Invests majorly in stocks of Central & State PSUs from **various sectors to exploit a range of investment opportunities**

To benefit from Indian PSUs by **unlocking opportunities from increased capex and reforms** in critical economy building sectors

Concentrate mostly on 6-8 focused opportunities mostly, that are expected to be on the cusp of a growth cycle

Business cycle approach for a multi-dimensional framework of sector allocations across business cycles

Reasons to Buy

Government backing in PSUs offers a **relative sense of stability and reliability** making them an attractive option during market uncertainty

Consistent **dividend distribution history of PSUs** potentially enhances the overall returns on investment

Gradual and **sustainable long-term growth potential** is beneficial for investors who prioritize a steady appreciation of their investments

Diversifying beyond private companies helps mitigate risks from sector-specific downturns providing a more resilient portfolio

VLRT Framework | Adaptive Money Management

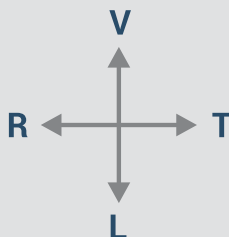

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The **core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant.** Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**
