Investment Approach

Combination of **multi-dimensional research and predictive analytics** to zero down on the **true picture of intrinsic value**.

Distinguish **temporary cycles from permanent shifts**, allowing for better selection of value stocks.

Under-owned and under-researched stocks exhibiting future growth potential are picked for evaluation and filtered for selection.

Stock selection process uses **unconstrained approach**, allowing exploration of better returns potential.

Reasons to Buy

Ideal for investors desiring to **participate in the value unlocking process** of fundamentally strong companies.

High conviction research process that goes beyond the normal factors of evaluation and identification of value stocks.

Dynamic money management to smoothen returns when value factors are underperforming.

Quantification of investors' overreactions to **identify neglected stocks that show immense potential for a value rebound**.

VLRT Framework| Adaptive Money Management

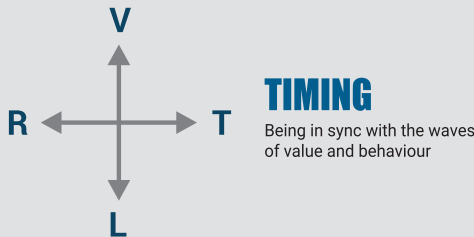

Being Relevant with 'predictive analytics'

VALUATION ANALYTICS

Knowing the difference between price and value.

RISK APPETITE ANALYTICS

Perceiving what drives market participants to certain actions and reactions.

TIMING

Being in sync with the waves of value and behaviour

LIQUIDITY ANALYTICS

Understanding the flow of money across asset classes.

The **core engine that drives us and sets us apart is a robust and differentiated investment framework that enables us to see beyond the horizon and stay relevant**. Our unique analytical framework for enabling 'predictive analytics' encompasses all available asset classes and sectors, formulating a multi-dimensional research perspective.

Why multi-dimensional?

The markets are a complex, dynamic system. There is no one formula or strategy or perspective that can consistently outperform. **A diverse set of variables and participants are continuously interacting with each other in myriad ways.**

In the face of this uncertainty and complexity, instead of limiting ourselves to any one school of thought **we have found consistent success by studying markets along four dimensions: Valuation, Liquidity, Risk Appetite, and Time [VLRT].**
