	<p>As per clause 12.24.1 of Master Circular, the cumulative gross exposure through equity, debt, derivative positions (including fixed income derivatives), repo transactions and Real Estate Investment Trusts (REITs), Infrastructure Investment Trusts (InvITs), other permitted securities/assets and such other securities/ assets as may be permitted by SEBI from time to time shall not exceed 100% of the net assets of the Scheme.</p> <p>Portfolio Rebalancing</p> <p>Short Term Defensive Consideration:</p> <p>Subject to SEBI (MF) Regulations the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute and that they can vary substantially depending upon the perception of the Investment Manager, the intention being at all times to seek to protect the interests of the Unit holders. As per clause 1.14.1.2.b of SEBI Master Circular on Mutual Funds dated June 27, 2024, as may be amended from time to time, such changes in the investment pattern will be for short term and for defensive consideration only.</p> <p>In the event of change in the asset allocation, the fund manager will carry out portfolio rebalancing within 30 calendar days or such other timeline as may be prescribed by SEBI from time to time.</p> <p>Portfolio Rebalancing (in case of passive breaches):</p> <p>As per clause 2.9 of SEBI Master Circular on Mutual Funds dated June 27, 2024, as may be amended/ clarified from time to time, in the event of change in the asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the fund manager is required to carry out portfolio rebalancing within 30 Business Days.</p> <p>In case the portfolio is not rebalanced within the period of 30 Business Days, justification in writing, including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if it so desires, can extend the timeline for rebalancing up to 60 Business Days from the date of completion of mandated rebalancing period. In case the portfolio of the investment strategy is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall follow the requirements specified under the aforesaid circular including reporting the deviation to Trustees at each stage</p>	
Investment Strategy	<p>The scheme will be a diversified equity fund which will invest predominantly in equity and equity related securities with focus on riding business cycles through dynamic allocation between various sectors and stocks at different stages of business cycles in the economy.</p> <p>Business cycles in an economy are typically characterized by the fluctuations in economic activity measured by real GDP growth and other macroeconomic variables.</p>	

	<p>A business cycle is basically defined in terms of periods of expansion and contraction. During expansion, an economy experiences an increase in economic activity as evidenced by real GDP growth, industrial production, employment, personal income etc. whereas during contraction, the pace of economic activity slows down. The business cycle can be effectively used to position one's investment portfolio. The business cycle is a critical determinant of equity sector performance over the intermediate term. The scheme would aim to deploy the business cycle approach in investing by identifying economic trends and investing in the sectors and stocks that are likely to outperform at any given stage of business cycle. For example, during period of expansion, the scheme would aim to predominantly invest in stocks of companies in the cyclical sectors as they tend to outperform the broader market during expansionary phase. Similarly, during period of contraction the scheme would look to invest in defensive sectors stocks or sectors that are less sensitive to changes in overall economic activity.</p> <p>Equity Strategy: The scheme would follow the top down approach of portfolio construction to identify the stage of business cycle, through domestic and global risk appetite and liquidity analytics, to arrive at a risk on/risk off assessment for sectors and stocks. The portfolio will be constructed on the basis of various broad factors such as prevailing market conditions, domestic and global economic scenarios, business and consumer sentiment, risk indicators, and a host of proprietary indicators (corporate, geopolitical, socio-cultural, economic, regulatory etc.) forming part of our Predictive Analytics suite. Coupled with our signature VLRT Framework, as our established risk mitigation tool, the data will be translated to put forth different scenarios that will highlight relevant sectors and stocks for portfolio construction. The scheme will follow a portfolio diversification approach across industries/sectors/stocks/market capitalizations at different stages of business cycles in the economy, depending on prevailing opportunities. The scheme will favour companies that offer the best value</p> <p>relative to their respective long-term growth prospects, returns on capital, and management quality.</p> <p>Fixed Income Strategy: The scheme proposes to invest in a diversified portfolio of high quality debt and money market instruments to generate regular income. The fund manager will allocate the assets of the scheme taking into consideration the prevailing interest rate scenario & the liquidity of the different instruments. The portfolio duration and credit exposures will be decided based on a thorough research of the general macroeconomic condition, political and fiscal environment, systemic liquidity, inflationary expectations, corporate performance and other economic considerations.</p> <p>The scheme may invest in equity derivatives instruments to the extent permitted under and in accordance with the applicable Regulations, including for the purposes of hedging, portfolio balancing and optimizing returns. Hedging does not mean maximization of returns but only attempts to reduce systemic or market risk that may be inherent in the investment.</p> <p>quant Business Cycle Fund shall aim to provide long term growth by investing at least 80% of its net assets in equity and equity related instruments (including equity ETFs) selected on the basis of business cycle. This fund may also invest up to 20% of its net assets into debt & money market instruments (including debt ETFs), up to 20% into Gold & Silver ETFs or up to 10% in REITs & InVITs. Investments in Foreign Securities shall not be more than 20%.</p>
--	--

	<p>Subject to the Regulations, the securities mentioned in “Where will the Scheme invest” above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of varying maturity. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offers or negotiated deals.</p> <p>The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per the guidelines and regulations applicable to such transactions. Further the Scheme intends to participate in securities lending as permitted under the Regulations. Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time.</p> <p>The fund manager may, from time to time, review and modify the Scheme’s investment strategy if such changes are considered to be in the best interests of the unitholders and if market conditions warrant it.</p> <p>No assurance can be given that the fund manager will be able to identify or execute such strategies.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific risk factors are summarized below: The Scheme will be investing in equity & equity related instruments, preference shares, fixed income securities and REITs/InvITs. The Scheme is also subjected to risk factors associated with perpetual debt instruments, securities lending & short selling, Tri-Party Repo, Securitized Debt, Repo in Corporate Debt, derivatives, Credit Default Swap, Mutual Fund Schemes, Structured Obligation (SO) & Credit Enhancement (CE) rated securities and segregated portfolio as detailed in the SID.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
