Investment Strategy	<p>The Scheme will dynamically allocate its net assets to equity and equity related securities and debt instruments. The portfolio construct of the Scheme will be dependent on various factors such as the prevailing market conditions, economic scenarios, global events as deciphered using our VLRT Investment Framework and Predictive Analytics. The equity exposure is thus dynamically managed and is increased when various factors are favourable towards equity as an asset class or is brought down when the factors are not favourable.</p> <p>The scheme's philosophy is detailed below as per VLRT Investment Framework and Predictive Analytics</p> <p>The scheme utilizes the VLRT Investment Framework to generate alpha by identifying sectors and securities at their inflection points, enabling sector rotations, early identification of potential outperformers and constructing a dynamic portfolio between equity and debt. The framework is composed of four elements: Valuation Analytics, Liquidity Analytics, Risk Appetite Analytics and Timing, with 1/3 weightage given to the first three components. This approach allows for superior risk management and better timing of investments. Our fund managers specialize in one component of the framework and investment decisions are made through a focused discussion between managers with diverse capabilities and experiences. Since September 2019, the fund managers have been using a Dynamic Style of Money Management, adapting the investment strategy based on the current market environment. They also use market timing indicators as a risk mitigation strategy. This approach to investing ensures diversification and safeguarding of investor wealth by studying and investing in multiple asset classes, including equity and debt.</p> <p>Subject to the Regulations, the corpus of the Scheme can be invested in any (but not limited to) of the following securities: Equity and Equity related instruments, Debt securities (including securitized debt) and money market instruments, Derivatives, foreign securities including ADR/GDR/Foreign equity and overseas ETFs / mutual fund units, Repo in Corporate Debt, securities lending, Mutual Fund units including ETFs.</p> <p>Money Market instruments includes (but not limited to) Commercial Paper, Commercial Bills, Certificates of Deposit, Treasury Bills, Bills Rediscounting, Triparty Repo, Government securities having an unexpired maturity of less than 1 year, alternate to Call or notice money, Usance Bills and any other such short-term instruments as may be allowed under the Regulations prevailing from time to time.</p>

	<p>The portion of the Scheme's portfolio invested in each type of security may vary in accordance with economic conditions, interest rates, liquidity and other relevant considerations, including the risks associated with each investment. The Scheme will, in order to reduce the risks associated with any one security, utilize a variety of investments.</p> <p>The Scheme may also invest in ADRs / GDRs / Foreign securities/ Foreign Debt/ overseas ETFs Securities / mutual fund units as permitted by Reserve Bank of India and Securities and Exchange Board of India.</p> <p>Subject to the Regulations, the securities mentioned in "Where will the Scheme invest" above could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of varying maturity. The securities may be acquired through Initial Public Offerings (IPOs), secondary market operations, private placement, rights offers or negotiated deals.</p> <p>The Scheme may also enter into repurchase and reverse repurchase obligations in all securities held by it as per the guidelines and regulations applicable to such transactions. Further the Scheme intends to participate in securities lending as permitted under the Regulations. Investment in overseas securities shall be made in accordance with the requirements stipulated by SEBI and RBI from time to time.</p> <p>The Fund Manager of the scheme may, from time to time, review and modify the Scheme's investment strategy if such changes are considered to be in the best interests of the unitholders and if market conditions warrant it. No assurance can be given that the fund manager will be able to identify or execute such strategies.</p>
