<b>Investment Strategy</b>	<p>ESG represents factors viz. Environmental (such as impact of business on natural resources), Social (such as business having social impact) and Governance (being the way in which the company is run).</p> <p>Quality companies with a competitive advantage, sustainable business model and visibility of earnings growth are the best avenues for long term wealth generation. ESG factors can complement traditional tools of evaluating and identifying quality businesses and thus improve the overall understanding of the company.</p> <p>Typically, it is seen that the companies that have strong ESG metrics are companies that are well governed and treat their responsibilities to the environment and society seriously and as a result are likely to avoid negative external shocks that can impact their business models.</p> <p>The investment strategy of the Scheme will be to invest in a basket of securities based on combining existing traditional fundamental, bottom-up financial analysis along with a rigorous analysis on the environmental, social and governance aspects of the company. The ESG analysis will be based on a comprehensive ESG framework adopted from some of the global best practices. The ESG process will be executed at various levels.</p> <p>Sector level screening: The scheme will exclude sectors/themes that are deemed harmful from a societal perspective. We will avoid investment in companies operating in those industries and maintain that exclusion on an ongoing basis. For example we will not invest in companies involved in Cluster Munitions, Anti- Personnel Mines, and Chemical and Biological Weapons. We will not hold any security that is involved in the production, stockpiling, transfer and use of these weapons.</p> <p>Stock level screening: Apart from sector exclusion list, we will not invest in stocks which throw up ESG red flags as a part of our review, even if the company is from a sector that is not a part of exclusion list.</p> <p>Portfolio Construction: We believe that evaluating a company from an ESG perspective requires a detailed qualitative approach that should complement our existing fundamental based investment process workings rather than a simplistic standalone scoring based inclusion/exclusion matrix for individual stocks. We intend to be active owners of the companies in which we invest and to reflect environmental, social and governance (ESG) value drivers within our investment process by following below steps.</p> <p>Step 1: Initial detailed ESG assessment of every company at the time of its inclusion in the investment universe will be carried out. The assessment will be based on a detailed sector- specific questionnaire that will be completed by the analyst in discussion with the company. Thus every company will undergo a detailed ESG due diligence in addition to the fundamental ground work before entering the universe.</p> <p>Step 2: Ongoing detailed assessment and evaluation of ESG issues or concerns will be carried out periodically to ensure that changes to the operating environment are</p>

	<p>captured. In case of any concerns on ESG front indicating any risk that may be detrimental to the long term shareholder value or in case of no evidence of any steps taken to strengthen safety measures, may lead to exclusion of the security from the universe.</p> <p>Step 3: In case of any specific ESG issue facing the company, a detailed review of the same to be carried out by the analyst and the impact discussed with the company management.</p> <p>Step 4: Active engagement with the company management, ownership in terms of improved disclosure of ESG matters and voting on proxy items keeping ESG aspect in mind.</p> <p>While the more traditional financial indicators and the analysis of business strategy form the basis of investment decisions, ESG factors may impact the investments in two ways – first through size of position given its impact on the inherent risk to our financial forecasts and secondly through our view of the ultimate long term value of company based on its readiness to face some of these issues, from both an upside and downside perspective. We will primarily focus on the longer term impact of ESG issues rather than unduly weighting factors which are currently occupying market attention.</p>
<b>Risk Profile of the Scheme</b>	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p> <p>Scheme specific risk factors are summarized below:</p> <p>The Scheme will be investing in equity &amp; equity related instruments, preference shares, fixed income securities and REITs/InvITs. The Scheme is also subjected to risk factors associated with perpetual debt instruments, securities lending &amp; short selling, Tri-Party Repo, Securitized Debt, Repo in Corporate Debt, derivatives, Credit Default Swap, Mutual Fund Schemes, Structured Obligation (SO) &amp; Credit Enhancement (CE) rated securities and segregated portfolio as detailed in the SID.</p> <p>For details on risk factors and risk mitigation measures, please refer SID.</p>
