The AMC will disclose the portfolio of the Scheme (alongwith ISIN) as on the last day of the month/ half year on the website of the Mutual Fund and AMFI within 10 days from the close of each month/ half year (i.e. 31st March and 30th September) respectively in a user-friendly and downloadable spreadsheet format. Further, AMC shall publish an advertisement, in an all India edition of one national English daily newspaper and in one Hindi newspaper, every half year disclosing the hosting of the half-yearly statement of its schemes portfolio on the website of the Mutual Fund and AMFI and the modes through which unitholder can submit a request for a physical or electronic copy of the statement of scheme portfolios.

The AMC will also provide a dashboard, in a comparable, downloadable (spreadsheet) and machine readable format, providing performance and key disclosures like Scheme's AUM, investment objective, expense ratios, portfolio details, scheme's past performance etc. on its website.

The AMC will make available the Annual Report of the Scheme within four months of the end of the financial year on its website and on the website of AMFI along with a link.

I. INTRODUCTION

A. RISK FACTORS

i. Standard Risk Factors:

- Investment in mutual fund units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the Scheme invests fluctuate, the value of your investment in the Scheme may go up or down.
- Past performance of the Sponsor/AMC/Mutual Fund does not guarantee future performance of the Scheme.
- quant ESG Equity Fund is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the Scheme beyond the initial contribution of Rs. 1 lakh made by it towards setting up the Fund.
- quant ESG Equity Fund is not a guaranteed or assured return scheme.

ii. Scheme Specific Risk Factors

Risks associated with ESG theme

- Evaluation of companies from ESG or sustainability perspective may exclude securities of certain issuers for non-investment reasons and therefore the Scheme may forgo some market opportunities available to schemes that don't use ESG theme. Stocks of companies with ESG practices may shift into and out of favor with stock market investors depending on market and economic conditions, and the Scheme's performance may at times be better or worse than the performance of schemes that do not follow ESG theme.

Risks associated with investments in Equity and Equity related instruments

- Equity and equity related instruments are volatile and prone to price fluctuations on a daily basis. The liquidity of investments made in the Scheme may be restricted by trading volumes and settlement periods. Settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases, due to settlement problems, could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme portfolio would result at times, in potential losses to the Scheme, should there be a subsequent decline in the value of securities held in the Scheme portfolio. Also, the value of the Scheme investments may be affected by interest rates, currency exchange rates, changes in law/ policies of the government, taxation laws and political, economic or other developments which may have an adverse bearing on individual securities, a specific sector or all sectors.
- Investments in equity and equity related securities involve a degree of risk and investors should not invest in the equity Schemes unless they can afford to take the risk of losing their investment.
- Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger liquidity risk in comparison with securities that are listed on the exchanges or offer other exit options to the investors / unitholders, including put options. The AMC may choose to invest in unlisted securities that offer attractive yields within the regulatory limit. This may however increase the risk of the portfolio. Additionally, the liquidity and valuation of the Scheme investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment.

Risks associated with investments in Fixed Income Securities

Interest-Rate Risk: Fixed income securities such as government bonds, corporate bonds, money market instruments and derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase.

The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.

Re-investment Risk: Investments in fixed income securities carry re-investment risk as interest rates prevailing on the coupon payment or maturity dates may differ from the original coupon of the bond.

Basis Risk: The underlying benchmark of a floating rate security or a swap might become less active or may cease to exist and thus may not be able to capture the exact interest rate movements, leading to loss of value of the portfolio.

Spread Risk: In a floating rate security the coupon is expressed in terms of a spread or mark up over the benchmark rate. In the life of the security this spread may move adversely leading to loss in value of the portfolio. The yield of the underlying benchmark might not change, but the spread of the security over the underlying benchmark might increase leading to loss in value of the security.

Liquidity Risk: The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.

Liquidity Risk on account of unlisted securities: The liquidity and valuation of the Schemes' investments due to their holdings of unlisted securities may be affected if they have to be sold prior to their target date of divestment. The unlisted security can go down in value before the divestment date and selling of these securities before the divestment date can lead to losses in the portfolio.

Credit Risk: This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.

Settlement Risk: Fixed income securities run the risk of settlement which can adversely affect the ability of the fund house to swiftly execute trading strategies which can lead to adverse movements in NAV.

Risk associated with Securitized Debt

The Scheme may invest in domestic securitized debt such as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are securitized debts where the underlying assets are receivables arising from various loans including automobile loans, personal loans, loans against consumer durables, etc. MBS are securitized debts where the underlying assets are receivables arising from loans backed by mortgage of residential / commercial properties.

At present in Indian market, following types of loans are securitized:

1. Auto Loans (cars / commercial vehicles /two wheelers)
2. Residential Mortgages or Housing Loans
3. Consumer Durable Loans
4. Personal Loans
5. Corporate Loans

In terms of specific risks attached to securitization, each asset class would have different underlying risks. Residential Mortgages generally have lower default rates than other asset classes, but repossession becomes difficult. On the other hand, repossession and subsequent recovery of commercial vehicles and other auto assets is fairly easier and better compared to mortgages. Asset classes like personal loans, credit card receivables are unsecured and in an economic downturn may witness higher default. A corporate loan/receivable, depend upon the nature of the underlying security for the loan or the nature of the receivable and the risks correspondingly fluctuate.

The rating agencies define margins, over collateralisation and guarantees to bring risk in line with similar AAA rated securities. The factors typically analyzed for any pool are as follows:

- a. Assets securitized and Size of the loan: This indicates the kind of assets financed with the loan and the average ticket size of the loan. A very low ticket size might mean more costs in originating and servicing of the assets.
- b. Diversification: Diversification across geographical boundaries and ticket sizes might result in lower delinquency
- c. Loan to Value Ratio: Indicates how much % value of the asset is financed by borrower's own equity. The lower this value the better it is. This suggests that where the borrowers own contribution of the asset cost is high; the chances of default are lower.
- d. Average seasoning of the pool: This indicates whether borrowers have already displayed repayment discipline. The higher the number, the more superior it is.

The other main risks pertaining to Securitised debt are as follows:

Prepayment Risk: This arises when the borrower pays off the loan sooner than expected. When interest rates decline, borrowers tend to pay off high interest loans with money borrowed at a lower interest rate, which shortens the average maturity of ABS. However, there is some prepayment risk even if interest rates rise, such as when an owner pays off a mortgage when the house is sold or an auto loan is paid off when the car is sold.

Reinvestment Risk: Since prepayment risk increases when interest rates decline, this also introduces reinvestment risk, which is the risk that the principal can only be reinvested at a lower rate.

Risks associated with investments in Derivatives

- The Scheme may invest in derivative products in accordance with and to the extent permitted under the Regulations and by RBI. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of a derivative requires an understanding not only of the underlying instrument but of the derivative itself. Trading in derivatives carries a high degree of risk although they are traded at a relatively small amount of margin which provides the possibility of great profit or loss in comparison with the principal investment amount. Thus, derivatives are highly leveraged instruments. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- The derivatives market in India is nascent and does not have the volumes that may be seen in other developed markets, which may result in volatility to the values.
- Investment in derivatives also requires the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. Even a small price movement in the underlying security could have an impact on their value and consequently, on the NAV of the Units of the Scheme.
- The Scheme may face execution risk, whereby the rates seen on the screen may not be the rate at which the ultimate execution of the derivative transaction takes place.
- The Scheme may find it difficult or impossible to execute derivative transactions in certain circumstances. For example, when there are insufficient bids or suspension of trading due to price limit or circuit breakers, the Scheme may face a liquidity issue.
- The options buyer's risk is limited to the premium paid, while the risk of an options writer is unlimited. However the gains of an options writer are limited to the premiums earned.
- The exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio.
- The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price.
- Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.
- The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.
- The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets.
- There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the "counter party") to comply with the terms of the derivatives contract. The counter party may default on a transaction before settlement and therefore, the Scheme is compelled to negotiate with another counterparty at the then prevailing (possibly unfavourable) market price.
- Derivatives also carry a market liquidity risk where the derivatives cannot be sold (unwound) at prices that reflect the underlying assets, rates and indices.
- Where derivatives are used for hedging, such use may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.
- Other risks in using derivatives include the risk of mispricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.
- Derivative products are leveraged instruments and can provide disproportionate gains as well as disproportionate losses to the investor / unitholder. Execution of investment strategies depends upon the ability of the fund manager(s) to identify such opportunities which may not be available at all times. Identification and execution of the strategies to be pursued by the fund manager(s) involve uncertainty and decision of fund manager(s) may not always be profitable. No assurance can be given

that the fund manager(s) will be able to identify or execute such strategies.

- The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments.

The following are certain additional risks involved with use of fixed income derivatives:

Interest rate risk: Derivatives carry the risk of adverse changes in the price due to change in interest rates.

Liquidity risk: During the life of the derivative, the benchmark might become illiquid and might not be fully capturing the interest rate changes in the market, or the selling, unwinding prices might not reflect the underlying assets, rates and indices, leading to loss of value of the portfolio.

Risks associated with Covered Call Strategy

The risk associated with covered calls is the loss of upside, i.e. if the shares are assigned (called away), the option seller forgoes any share price appreciation above the option strike price.

The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.

The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.

The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

Risk Factors Associated with Investments in REITs and InvITs:

- **Price-Risk or Interest-Rate Risk:** REITs & InvITs run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices is a function of the existing coupon, days to maturity and the increase or decrease in the level of interest rates.
- **Credit Risk:** In simple terms this risk means that the issuer of a debenture/ bond or a money market instrument may default on interest payment or even in paying back the principal amount on maturity. REITs & InvITs are likely to have volatile cash flows as the repayment dates would not necessarily be pre scheduled.
- **Liquidity or Marketability Risk:** This refers to the ease with which a security can be sold at or near to its valuation yield-to-maturity (YTM). The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer. As these products are new to the market they are likely to be exposed to liquidity risk.
- **Reinvestment Risk:** Investments in REITs & InvITs may carry reinvestment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.
- **Risk of lower than expected distributions:** The distributions by the REIT or InvIT will be based on the net cash flows available for distribution. The amount of cash available for distribution principally depends upon the amount of cash that the REIT/ InvITs receives as dividends or the interest and principal payments from portfolio assets.

The above are some of the common risks associated with investments in REITs & InvITs. There can be no assurance that investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

Risks associated with Repo transactions in Corporate Bonds

The Scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However, in repo transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk is further mitigated through over-collateralization (the value of the collateral being more than the repo amount).

Risks associated with segregated portfolio

1. Investor holding units of segregated portfolio may not be able to liquidate their holding till the time recovery of money from the issuer.
2. Security comprises of segregated portfolio may not realise any value.
3. Listing of units of segregated portfolio on recognised stock exchange does not necessarily guarantee their liquidity. There may not be active trading of units in the stock market. Further trading price of units on the stock market may be significantly lower than the prevailing NAV.

Risk Factor associated with debt instruments having credit enhancement:

The Scheme may invest in debt instruments having credit enhancement backed by equity shares/guarantees or other any assets as collateral. The profile of these issuers tend to be relatively weak and there may be a pledge of shares of a related party to enhance credit quality or guarantees provided or any other asset provided as security acceptable to lenders.

Where equity shares are provided as collateral there is the risk of sharp price volatility of underlying securities which may lead to erosion in value of collateral which may affect the ability of the fund to enforce collateral and recover capital and interest obligations. Also there is a possibility of guarantor going insolvent which also can impact the recovery value of exposure. In case of credit enhanced structures backed by equity share the liquidity of the underlying shares may be low leading to a lower recovery and a higher impact cost of liquidation. In case of other assets provided recovery value and enforce ability of asset can also be a risk factor which can lower the recovery value.

Risks associated with Short Selling & Securities Lending

Securities Lending is lending of securities through an approved intermediary to a borrower under an agreement for a specified period with the condition that the borrower will return equivalent securities of the same type or class at the end of the specified period along with the corporate benefits accruing on the securities borrowed. There are risks inherent in securities lending, including the risk of failure of the other party, in this case the approved intermediary to comply with the terms of the agreement. Such failure can result in a possible loss of rights to the collateral, the inability of the approved intermediary to return the securities deposited by the lender and the possible loss of corporate benefits accruing thereon.

Short-selling is the sale of shares or securities that the seller does not own at the time of trading. Instead, he borrows it from someone who already owns it. Later, the short seller buys back the stock/security he shorted and returns the stock/security to the lender to close out the loan. The inherent risks are Counterparty risk and liquidity risk of the stock/security being borrowed. The security being short sold might be illiquid or become illiquid and covering of the security might occur at a much higher price level than anticipated, leading to losses.

Risks associated with investing in foreign securities

- Subject to necessary approvals and within the investment objectives of the Scheme, the Scheme may invest in overseas markets which carry risks related to fluctuations in the foreign exchange rates, the nature of the securities market of the country, repatriation of capital due to exchange controls and political circumstances.
- Since the Scheme would invest only partially in foreign securities, there may not be readily available and widely accepted benchmarks to measure performance of such Scheme. To manage risks associated with foreign currency and interest rate exposure, the Scheme may use derivatives for efficient portfolio management and hedging and portfolio rebalancing and in accordance with conditions as may be stipulated under the Regulations and by RBI from time to time.
- Investment in Foreign Securities involves a currency risk. To the extent that the assets of the Scheme will be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital to India may also be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment.
- In respect of investments in ADRs/GDRs, the risks associated with underlying stocks remain the same except for the additional risk of the exchange rate of the Indian rupee vis-à-vis the currency in which ADRs/GDRs are denominated. In case of other offshore investments the risk shall be exchange rate of the Indian rupee vis-à-vis the currency in which such securities are issued and the country risk associated with an investment. Country risk would include events such as introduction of extraordinary exchange control, economic deterioration and bilateral conflict leading to immobilization of the assets.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme shall have a minimum of 20 Investors and no single Investor shall account for more than 25% of the corpus of the Scheme. However, if such limit is breached during the NFO of the Scheme, the Fund will endeavour to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme does not have a minimum of 20 Investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme shall be wound up and the units would be redeemed at Applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by

SEBI. If there is a breach of the 25% limit by any Investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said Investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic Redemption by the Mutual Fund at the Applicable NAV on the 15th day of the notice period. The Scheme shall adhere to the requirements prescribed by SEBI from time to time in this regard.

C. SPECIAL CONSIDERATIONS, if any

- Prospective investors should study this Scheme Information Document and Statement of Additional Information carefully in its entirety and should not construe the contents hereof as advice relating to legal, taxation, financial, investment or any other matters and are advised to consult their legal, tax, financial and other professional advisors to determine possible legal, tax, financial or other considerations of subscribing to or redeeming Units, before making a decision to invest/redeem/hold Units.
- The Scheme related documents i.e. SID/ KIM/ SAI or the units of the Fund are not registered in any jurisdiction including the United States of America nor in any provincial/ territorial jurisdiction in Canada. The distribution of the Scheme related document in certain jurisdictions may be restricted or subject to registration requirements and, accordingly, persons who come into possession of the Scheme related documents are required to inform themselves about, and to observe any such restrictions. No persons receiving a copy of this Scheme related documents or any accompanying application form in such jurisdiction may treat these Scheme related documents or such application form as constituting an invitation to them to subscribe for units, nor should they in any event use any such application form, unless in the relevant jurisdiction such an invitation could lawfully be made to them and such application form could lawfully be used without compliance with any registration or other legal requirements. Accordingly, the Scheme related documents do not constitute an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not lawful or in which the person making such offer or solicitation is not qualified to do so or to anyone to whom it is unlawful to make such offer or solicitation as per applicable law.
- The AMC, Trustee or the Mutual Fund have not authorized any person to issue any advertisement or to give any information or to make any representations, either oral or written, other than that contained in this Scheme Information Document or the Statement of Additional Information or as is provided by the AMC in connection with this offering. Prospective investors are advised not to rely upon any information or representation not incorporated in the Scheme Information Document or Statement of Additional Information or provided by the AMC as having been authorized by the Mutual Fund, the AMC or the Trustee.
- Redemption due to change in the fundamental attributes of the Scheme or due to any other reasons may entail tax consequences. The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any such tax consequences that may arise due to such redemptions.
- The Trustee, AMC, Mutual Fund, their directors or their employees shall not be liable for any of the tax consequences that may arise, in the event that the Scheme is wound up for the reasons and in the manner provided in Statement of Additional Information.
- The tax benefits described in this Scheme Information Document and Statement of Additional Information are as available under the present taxation laws and are available subject to relevant conditions. The information given is included only for general purpose and is based on advice received by the AMC regarding the law and practice currently in force in India as on the date of this Scheme Information Document and the Unit holders should be aware that the relevant fiscal rules or their interpretation may change. As is the case with any investment, there can be no guarantee that the tax position or the proposed tax position prevailing at the time of an investment in the Scheme will endure indefinitely. In view of the individual nature of tax consequences, each Unit holder is advised to consult his / her own professional tax advisor.
- The Mutual Fund may disclose details of the investor's account and transactions thereunder to those intermediaries whose stamp appears on the application form or who have been designated as such by the investor. In addition, the Mutual Fund may disclose such details to the bankers, as may be necessary for the purpose of effecting payments to the investor. The Fund may also disclose such details to regulatory and statutory authorities/bodies as may be required or necessary.
- In case the AMC or its Sponsor or its Shareholders or their affiliates/associates or group companies make substantial investment, either directly or indirectly in the Scheme, redemption of Units by these entities may have an adverse impact on the performance of the Scheme. This may also affect the ability of the other Unit holders to redeem their units.
- As the liquidity of the Scheme's investments may sometimes be restricted by trading volumes and settlement periods, the time taken by the Fund for Redemption of Units may be significant in the event of an inordinately large number of Redemption Requests or of a restructuring of the Scheme's portfolio. In view of this, the Trustee has the right, in its sole discretion, to limit redemptions under certain circumstances - please refer to the paragraph "Suspension/Restriction on redemption of Units of the Scheme".
- Pursuant to the provisions of Prevention of Money Laundering Act, 2002, if after due diligence, the AMC believes that any transaction is suspicious in nature as regards money laundering, on failure to provide required documentation, information, etc. by the Unit holder the AMC shall have absolute discretion to report such suspicious transactions to FIU-IND and / or to freeze the folios of the investor(s), reject any application(s)/redemptions / allotment of units.

D. DEFINITIONS

II. INFORMATION ABOUT THE SCHEME

A. TYPE OF THE SCHEME

An Open ended equity scheme investing in companies demonstrating sustainable practices across Environment, Social and Governance (ESG) theme.

The emphasis lies on sustainable and responsible investment (SRI) strategies and there has been an increasing awareness towards environmental stability, socio-economic development and adherence to ethical standards. With the increasing threat from global warming, activism on social issues etc. there has been a consensus towards the importance of holistic growth and responsible investments. A strategy that has gained popularity among investors is environmental, social and governance based investing.

Through this style, we can identify & quantify the intangible value possessed by socially responsible, environmentally friendly firms with robust governance policies in place. These firms are believed to exhibit better risk management measures on ESG parameters which in turn creates value for investors with long-lasting sustainable business models.

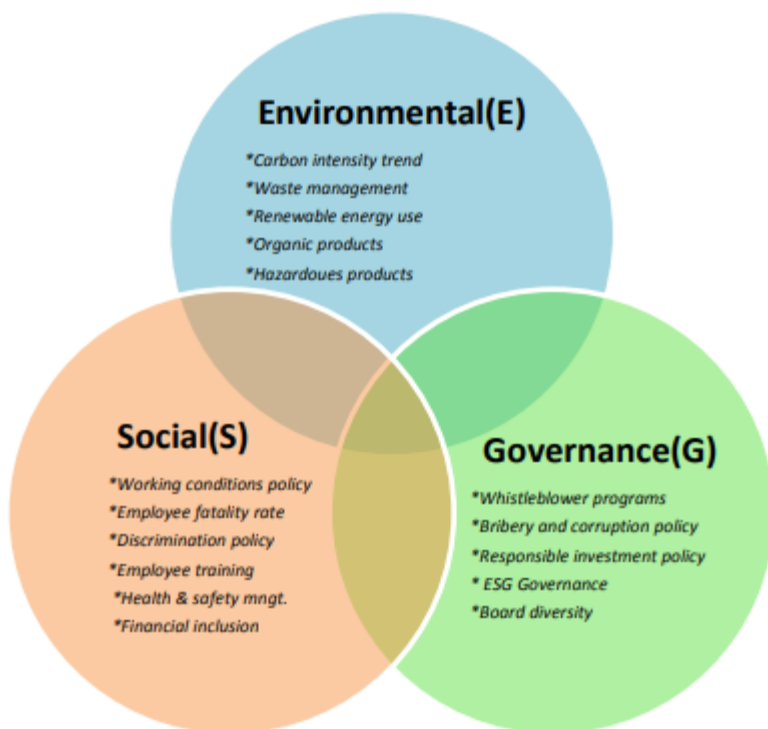

History of ESG Funds: ESG based investment philosophy has a rich history with its roots in United States and Europe set in 1960-70. In Europe, the first SRI fund was launched in Sweden in 1960s whereas socio-political movements in US led to start of socially responsible investments in 1970s. Globally, as of 2018, there was a total of \$30.68 trillion worth of assets professionally managed under SRI theme, a 34% increase in just two years.

ESG Framework: **Environmental (E), Social (S) and Governance (G).**

Environmental: Environmental factors cover the impact of the firm's activity on environment which includes carbon intensity trend, recycling & waste management process, development of renewable energy etc.

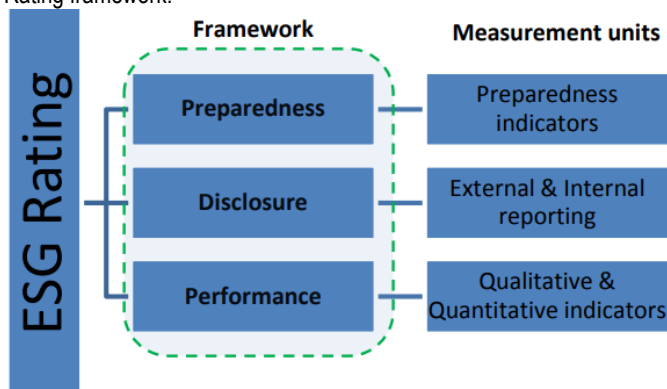

Social: Social factors cover the policies and impact of a firm's activity on working conditions, human rights, health and safety norms, financial inclusion etc.

Governance: Governance factors measures the effectiveness of processes and policies pertaining to corporate governance, business ethics, fraud and anti-corruption measures, public policy etc.

Rating framework:

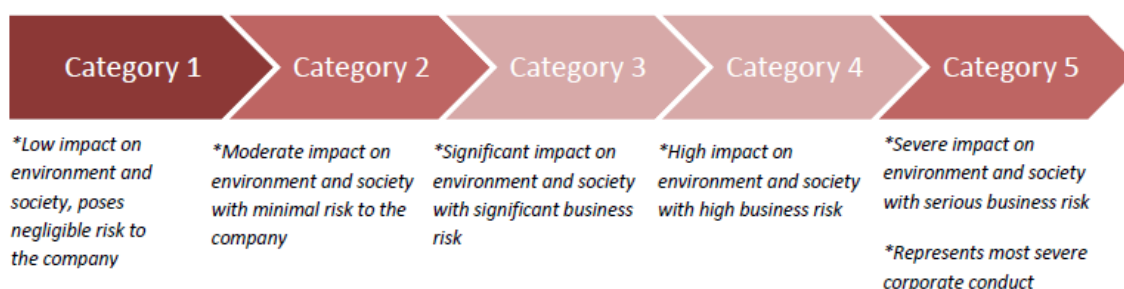

Source: Sustainalytics

In the rating framework, on each E, S, G pillar, a firm is rated based on 3 main areas: **Preparedness, Disclosure and Performance**. Preparedness indicators measure effectiveness of a firm's policy, programmes and structures, Disclosure indicators measure the effectiveness of a firm's standard and reporting process and Performance indicators capture firm's controversies/incidents and its response.

On each applicable indicator, a company is assigned a score of 0 to 100. The weight of each indicator depends upon the relevance and importance of the indicator in the sector in which the company operates. Based on the raw score and weight of all applicable indicators across E, S and G pillar, a weighted average company level ESG score is determined, which ranges from 0 to 100.

Controversy analysis:

Source: Sustainalytics

A key component of ESG research focuses on assessing a company's involvement in incidents and controversies which can point to the lack of ESG compliance and imply potentially higher risk to investors. Controversy analysis highlights the incidents that have reputational risk and captures the severity of the event.

Events are classified into 10 areas across E, S and G Pillars and are scored on a scale from one to five, depending on the reputational risk to the company and potential impact on stakeholders. "Category 1" controversy event has low impact whereas "Category 5" controversy event has the highest, indicating a severe impact on the involved stakeholders

ESG performance of Indian companies

As on February 2018, out of NIFTY 100 companies, 23 Indian companies had an ESG score of below 50, but then only 2 Indian companies had an ESG score of above 80. This highlights the fact that approx. 70% of Indian large cap companies lie in 3rd quartile on the basis of ESG score. The average ESG score of NIFTY 100 companies is ~58.

NIFTY ESG 100 vs NIFTY 100

*Rebased to 100 for simplicity

NIFTY100 ESG indices have given comparable returns vis-à-vis their parent NIFTY 100 index since 2011, though both NIFTY100 Enhanced ESG and NIFTY100 ESG indices have marginally outperformed NIFTY 100 Index.

In summary, ESG based investment strategy has gained popularity across global investors with emphasis on investment in companies which have sustainable and responsible business models. The underlying drive behind ESG theme based investing lies in generating returns from socially responsible, environment friendly and ethical firms by reducing the company specific risk associated with ESG controversies.

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

To generate long term capital appreciation by investing in a diversified portfolio of companies demonstrating sustainable practices across Environmental, Social and Governance (ESG) parameters. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Other Limits

The investment by the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the scheme:

- a. Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and
- b. Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

These limits shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.

Investment in Short Term Deposits

Pending deployment of the funds in securities in terms of investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of the Scheduled Commercial Banks, subject to the guidelines issued by SEBI from time to time.

The Scheme shall not invest in Credit Default Swaps.

The Scheme retains the flexibility to invest across all the securities in the equity, debt, money markets instruments, units issued by REITs & InvITs and mutual fund units.

Subject to the SEBI Regulations, the asset allocation pattern indicated above may change from time to time, keeping in view market conditions, market opportunities, applicable regulations and political and economic factors. It must be clearly understood that the percentages stated above are only indicative and not absolute. These proportions can vary substantially depending upon the perception of the fund manager; the intention being at all times to seek to protect the interests of the Unit holders. Such changes in the investment pattern will be for short term and for defensive considerations only. In case of deviation, the portfolio would be rebalanced within 30 days from the date of deviation. In case the same is not aligned to the above asset allocation pattern within 30 days, justification shall be provided to the Investment Review Committee and reasons for the same shall be recorded in writing. The Investment Review Committee shall then decide on the course of action.

D. WHERE WILL THE SCHEME INVEST?

The corpus of the Scheme, subject to the enabling provisions of asset allocation pattern, will be invested in securities/ instruments which will include but not limited to:

Equity and Equity Related Instruments

1. Equity share is a security that represents ownership interest in a company.
2. Equity Related Instruments are securities which give the holder of the security right to receive Equity Shares on pre agreed terms. It includes convertible bonds, convertible debentures, equity warrants, convertible preference shares, etc.
3. Foreign Equity and Equity Related Instrument as may be permitted by SEBI/RBI from time to time.
4. Equity Derivatives are financial instruments, generally traded on an exchange, the price of which is directly dependent upon (i.e., "derived from") the value of equity shares or equity indices. Derivatives involve the trading of rights or obligations based on the underlying, but do not directly transfer property.

i. Futures

Futures are exchange-traded contracts to sell or buy financial instruments for future delivery at an agreed price. There is an agreement to buy or sell a specified quantity of financial instrument on a designated future date at a price agreed upon by the buyer and seller at the time of entering into a contract. To make trading possible, the exchange specifies certain standardized features of the contract. A futures contract involves an obligation on both the parties to fulfill the terms of the contract.

SEBI has permitted futures contracts on indices and individual stocks with maturity of 1 month, 2 months and 3 months on a rolling basis. The futures contracts are settled on last Thursday (or immediately preceding trading day if Thursday is a trading holiday) of each month. Currently, the futures are settled in cash. The final settlement price is the closing price of the underlying stock(s)/index.

ii. Options

Option is a contract which provides the buyer of the option (also called holder) the right, without the obligation, to buy or sell a specified asset at the agreed price on or upto a particular date. For acquiring this privilege, the buyer pays premium (fee) to the seller. The seller on the other hand has the obligation to buy or sell specified asset at the agreed price and for this obligation he receives premium. The premium is determined considering number of factors such as the market price of the underlying asset/security, number of days to expiry, risk free rate of return, strike price of the option and the volatility of the underlying asset. Option contracts are of two types viz:

- Call Option - The option that gives the buyer the right but not the obligation to buy specified quantity of the underlying asset at the strike price is a call option. The buyer of the call option (known as the holder of call option) can call upon the seller of the option (writer of the option) and buy from him the underlying asset at the agreed price at any time on or before the expiry of the option.

The seller (writer of the option) on the other hand has the obligation to sell the underlying asset if the buyer of the call option decides to exercise his option to buy.

- **Put Option** – The option that gives the buyer the right but not the obligation to sell is called put option. A Put option gives the holder (buyer) the right to sell specified quantity of the underlying asset at the strike price. There are two kind of options based on the date of exercise of right. The first is the European Option which can be exercised only on the maturity date. The second is the American Option which can be exercised on or before the maturity date.

Debt Instruments & Money Market Instruments

1. Certificate of Deposit (CD)

Certificate of Deposit (CD) is a negotiable money market instrument issued by scheduled commercial banks and select all-India Financial Institutions that have been permitted by the RBI to raise short term resources. The maturity period of CDs issued by the Banks is between 7 days to one year, whereas, in case of FIs, maturity is one year to 3 years from the date of issue.

2. Commercial Paper (CP)

Commercial Paper (CP) is an unsecured negotiable money market instrument issued in the form of a promissory note, generally issued by the corporates, primary dealers and all India Financial Institutions as an alternative source of short term borrowings. CP is traded in secondary market and can be freely bought and sold before maturity.

3. Treasury Bill (T-Bill)

Treasury Bills (T-Bills) are issued by the Government of India to meet their short term borrowing requirements. T-Bills are issued for maturities of 14 days, 91 days, 182 days and 364 days. The Scheme may also invest in Cash Management Bill (CMB) issued by the Government of India to meet their short term borrowing requirements. CMB are generally issued for maturities of less than 91 days.

4. Commercial Usance Bills

Bill (bills of exchange/promissory notes of public sector and private sector corporate entities) Rediscounting, usance bills and commercial bills.

Repos

Repo (Repurchase Agreement) or Reverse Repo is a transaction in which two parties agree to sell and purchase the same security with an agreement to purchase or sell the same security at a mutually decided future date and price. The transaction results in collateralized borrowing or lending of funds. Presently in India, corporate debt securities, Government Securities, State Government Securities and T-Bills are eligible for Repo/Reverse Repo.

Tri-party repo means a repo contract where a third entity (apart from the borrower and lender), called a Tri-Party Agent, acts as an intermediary between the two parties to the repo to facilitate services like collateral selection, payment and settlement, custody and management during the life of the transaction.

The Scheme may undertake repo or reverse repo transactions in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed by the Board of Directors of the Asset Management Company and Trustee Company.

Securities created and issued by the Central and State Governments as may be permitted by RBI, securities guaranteed by the Central and State Governments (including but not limited to coupon bearing bonds, zero coupon bonds and treasury bills). State Government securities (popularly known as State Development Loans or SDLs) are issued by the respective State Government in co-ordination with the RBI.

Non -Convertible Debentures

Non convertible debentures are securities issued by companies / institutions promoted / owned by the Central or State Governments and statutory bodies which may or may not carry a Central/State Government guarantee, Public and private sector banks, all India Financial Institutions and Private Sector Companies. These instruments may be secured or unsecured against the assets of the Company and generally issued to meet the short term and long term fund requirements. These instruments may have fixed or floating rate coupon. The Scheme may also invest in the non convertible part of convertible debt securities.

Securitized Assets

Securitization is a structured finance process which involves pooling and repackaging of cash flow producing financial assets into securities that are then sold to investors. They are termed as Asset Backed Securities (ABS) or Mortgage Backed Securities (MBS). ABS are backed by other assets such as credit card, automobile or consumer loan receivables, retail installment loans or participations in pools of leases. Credit support for these securities may be based on the underlying assets and/or provided through credit enhancements by a third party. MBS is an asset backed security whose cash flows are backed by the principal and interest payments of a set of mortgage loans. Such Mortgage could be either residential or commercial properties. ABS/MBS instrument reflect the undivided interest in the underlying assets and do not represent the obligation of the issuer of ABS/MBS or the originator of underlying receivables. Securitization often utilizes the services of SPV.

- Pass through Certificate (PTC)

(Pay through or other Participation Certificates) represents beneficial interest in an underlying pool of cash flows. These cash flows represent dues against single or multiple loans originated by the sellers of these loans. These loans are given by banks or financial institutions to corporates. PTCs may be backed, but not exclusively, by receivables of personal loans, car loans, two wheeler loans and other assets subject to applicable regulations.

The following are certain additional disclosures w.r.t. investment in securitized debt:

1. How the risk profile of securitized debt fits into the risk appetite of the Scheme

Securitized debt is a form of conversion of normally non-tradable loans to transferable securities. This is done by assigning the loans to a special purpose vehicle (a trust), which in turn issues Pass-Through-Certificates (PTCs). These PTCs are transferable securities with fixed income characteristics. The risk of investing in securitized debt is similar to investing in debt securities. However it differs in two respects.

Typically the liquidity of securitized debt is less than similar debt securities. For certain types of securitized debt (backed by mortgages, personal loans, credit card debt, etc.), there is an additional pre-payment risk. Pre-payment risk refers to the possibility that loans are repaid before they are due, which may reduce returns if the re-investment rates are lower than initially envisaged.

Because of these additional risks, securitized debt typically offers higher yields than debt securities of similar credit rating and maturity. If the fund manager judges that the additional risks are suitably compensated by the higher returns, he may invest in securitized debt up to the limits specified in the asset allocation table above.

2. Policy relating to originators based on nature of originator, track record, NPAs, losses in earlier securitized debt, etc

The originator is the person who has initially given the loan. The originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). An analysis of the originator is especially important in case of retail loans as this affects the credit quality and servicing of the PTC. The key risk is that of the underlying assets and not of the originator. For example, losses or performance of earlier issuances does not indicate quality of current series. However such past performance may be used as a guide to evaluate the loan standards, servicing capability and performance of the originator.

Originators may be: Banks, Non Banking Finance Companies, Housing Finance Companies, etc. The fund manager / credit analyst evaluates originators based on the following parameters

- Track record
- Willingness to pay, through credit enhancement facilities etc.
- Ability to pay
- Business risk assessment, wherein following factors are considered:
 - Outlook for the economy (domestic and global)
 - Outlook for the industry
 - Company specific factors

In addition a detailed review and assessment of rating rationale is done including interactions with the originator as well as the credit rating agency.

The following additional evaluation parameters are used as applicable for the originator / underlying issuer for pool loan and single loan securitization transactions:

- Default track record/ frequent alteration of redemption conditions / covenants
- High leverage ratios of the ultimate borrower (for single-sell downs) – both on a standalone basis as well on a consolidated level/ group level
- Higher proportion of reschedulement of underlying assets of the pool or loan, as the case may be
- Higher proportion of overdue assets of the pool or the underlying loan, as the case may be
- Poor reputation in market
- Insufficient track record of servicing of the pool or the loan, as the case may be.

3. Risk mitigation strategies for investments with each kind of originator

An analysis of the originator is especially important in case of retail loans as the size and reach affects the credit quality and servicing of the PTC. In addition, the quality of the collection process, infrastructure and follow-up mechanism; quality of MIS; and credit enhancement mechanism are key risk mitigants for the better originators / servicers.

In case of securitization involving single loans or a small pool of loans, the credit risk of the underlying borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk. The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of evaluating the performance potential of the PTC. Securitization transactions may include some risk mitigants (to reduce credit risk). These may include interest subvention (difference in interest rates on the underlying loans and the PTC serving as margin against defaults), overcollateralization (issue of PTCs of lesser value than the underlying loans, thus even if some loans default, the PTC continues to remain protected), presence of an equity / subordinate tranche (issue of PTCs of differing seniority when it comes to repayment - the senior tranches get paid before the junior tranche) and / or guarantees.

4. The level of diversification with respect to the underlying assets, and risk mitigation measures for less diversified investments

In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. In case of diversified pools of loans, the overall characteristic of the loans is analyzed to determine the credit risk.

The credit analyst looks at ageing (i.e. how long the loan has been with the originator before securitization) as one way of judging the performance potential of the PTC. Additional risk mitigants may include interest subvention, over collateralization, presence of an equity / subordinate tranche and / or guarantees. The credit analyst also uses analyses by credit rating agencies on the risk profile of the securitized debt.

Currently, the following parameters are used while evaluating investment decision relating to a pool securitization transaction. The Investment Review Committee may revise the parameters from time to time.

Characteristics/Type of Pool	Mortgage Loan	Commercial Vehicle and Construction Equipment	CAR	2 wheelers	Micro Finance Pools *	Personal Loans *	Single Sell Downs	Others
Approximate Average maturity (in Months)	Up to 10 years	Up To 3 years	Up to 3 years	Up to 3 years	NA	NA	Refer Note 1	Refer Note 2
Collateral margin (including cash, guarantees, excess interest spread, subordinate tranche)	>10%	>10%	>10%	>10%	NA	NA	"	"
Average Loan to Value Ratio	<90%	<80%	<80%	<80%	NA	NA	"	"
Average seasoning of the Pool	>3 months	>3 months	>3 months	>3 months	NA	NA	"	"
Maximum single exposure range	<1%	<1%	<1%	<1%	NA	NA	"	"
Average single exposure range %	<1%	<1%	<1%	<1%	NA	NA	"	"

* Currently, the Scheme will not invest in these types of securitized debt.

Note 1: In case of securitization involving single loans or a small pool of loans, the credit risk of the borrower is analyzed. The investment limits applicable to the underlying borrower are applied to the single loan sell-down.

Note 2: Other investments will be decided on a case-to-case basis

The credit analyst may consider the following risk mitigating measures in his analysis of the securitized debt:

- Size of the loan
- Average original maturity of the pool
- Loan to Value Ratio
- Average seasoning of the pool
- Default rate distribution
- Geographical Distribution
- Credit enhancement facility
- Liquid facility
- Structure of the pool

5. Minimum retention period of the debt by originator prior to securitization

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements. In addition, RBI has proposed minimum holding period of between nine and twelve months for assets before they can be securitized. The minimum holding period depends on the tenor of the securitization transaction. The Scheme will invest in securitized debt that are compliant with the laws and regulations.

6. Minimum retention percentage by originator of debts to be securitized

Issuance of securitized debt is governed by the Reserve Bank of India. RBI norms cover the "true sale" criteria including credit enhancement and liquidity enhancements, including maximum exposure by the originator in the PTCs. In addition, RBI has proposed minimum retention requirement of between five and ten percent of the book value of the loans by the originator. The minimum retention requirement depends on the tenor and structure of the securitization transaction. The Fund will invest in securitized debts that are compliant with the laws and regulations.

7. The mechanism to tackle conflict of interest when the mutual fund invests in securitized debt of an originator and the originator in turn makes investments in that particular scheme of the fund

The key risk is securitized debt relates to the underlying borrowers and not the originator. In a securitization transaction, the originator is the seller of the debt(s) and the fund is the buyer. However, the originator is also usually responsible for servicing the loan (i.e. collecting the interest and principal payments). As the originators may also invest in the scheme, the fund manager shall ensure that the investment decision is based on parameters as set by the Investment Review Committee (IRC) of the Asset Management Company and IRC shall review the same at regular interval.

8. The resources and mechanism of individual risk assessment with the AMC for monitoring investment in securitized debt

The fund management team including the credit analyst has the experience to analyze securitized debt. In addition, credit research agencies provide analysis of individual instruments and pools. On an on-going basis (typically monthly) the servicer provides reports regarding the performance of the pool. These reports would form the base for ongoing evaluation where applicable. In addition, rating reports indicating rating changes would be monitored for changes in rating agency opinion of the credit risk.

Real Estate Investment Trust (REITs) & Infrastructure Investment Trust (InvIT)

REIT/ InvITs is a trust which holds real estate or infrastructure assets respectively which is managed by an investment manager. The unitholders in the trust have proportional interest in the underlying holdings of the trust.

Debt derivative instruments

- i. **Interest Rate Swap** - An Interest Rate Swap (IRS) is a financial contract between two parties exchanging or swapping a stream of interest payments for a "notional principal" amount on multiple occasions during a specified period. Such contracts generally involve exchange of a "fixed to floating" or "floating to fixed rate" of interest. Accordingly, on each payment date that occurs during the swap period, cash payments based on fixed/ floating and floating rates are made by the parties to one another.
- ii. **Forward Rate Agreement** - A Forward Rate Agreement (FRA) is a financial contract between two parties to exchange interest payments for a 'notional principal' amount on settlement date, for a specified period from start date to maturity date. Accordingly, on the settlement date, cash payments based on contract (fixed) and the settlement rate, are made by the parties to one another. The settlement rate is the agreed bench-mark/ reference rate prevailing on the settlement date.
- iii. **Interest Rate Futures**
A futures contract is a standardized, legally binding agreement to buy or sell a commodity or a financial instrument in a designated future month at a market determined price (the futures price) by the buyer and seller. The contracts are traded on a futures exchange. An Interest Rate Future is a futures contract with an interest bearing instrument as the underlying asset.

Characteristics of Interest Rate Futures

1. Obligation to buy or sell a bond at a future date
2. Standardized contract.
3. Exchange traded
4. Physical settlement
5. Daily mark to market

Foreign Securities

The Scheme may also invest in suitable investment avenues in foreign securities in overseas financial markets for the purpose of diversification, commensurate with the Scheme objectives and subject to necessary stipulations by SEBI / RBI. Towards this end, the Mutual Fund may also appoint overseas investment advisors and other service providers, to the extent permissible under the Regulations.

The Scheme may, with the approval of SEBI / RBI, where required invest in:

- ADRs (American Depository Receipts)/ GDRs (Global Depository Receipts) issued by Indian or foreign companies
- Equity of overseas companies listed on recognized stock exchanges overseas
- Initial and follow on public offerings for listing at recognized stock exchanges overseas
- Foreign debt securities in the countries with fully convertible currencies, short term as well as long term debt instruments with rating not below investment grade by accredited/registered credit rating agencies
- Money market instruments rated not below investment grade
- Repos in the form of investment, where the counterparty is rated not below investment grade; repos shall not however, involve any borrowing of funds by the mutual funds
- Government securities where the countries are rated not below investment grade
- Derivatives traded on recognized stock exchanges overseas only for hedging and portfolio balancing with underlying as securities
- Short term deposits with banks overseas where the issuer is rated not below investment grade
- Units/securities issued by overseas mutual funds or unit trusts registered with overseas regulators and investing in (a) aforesaid securities, or (b) unlisted overseas securities (not exceeding 10% of their net assets).

Note: The Scheme will not invest in foreign securitized debt.

As per SEBI Circular SEBI/IMD/CIR No.7/104753/07 dated September 26, 2007, mutual funds can make overseas investments (other than overseas ETF) subject to a maximum of US \$300 million and in overseas ETF subject to a maximum \$50 million or such limits as may be prescribed by SEBI from time to time. Subject to the approval of RBI / SEBI and conditions as may be prescribed by them, the Mutual Fund may open one or more foreign currency accounts abroad either directly, or through the custodian/sub-custodian, to facilitate investments and to enter into/deal in forward currency contracts, currency futures, interest rate futures / swaps, currency options for the purpose of hedging the risks of assets of a portfolio or for its efficient management. However, the use of such instruments shall be as permitted from time to time. All the requirement of the SEBI circular dated September 26, 2007, would be adhered to by the AMC for investment in foreign securities.

Investment in overseas securities shall be made in accordance with the requirements including appointment of a dedicated Fund Manager stipulated by SEBI and RBI from time to time.

Short Term Deposits

Pending deployment of funds as per the investment objective of the Scheme, the Funds may be parked in short term deposits of the Scheduled Commercial Banks, subject to guidelines and limits specified by SEBI.

Units of Mutual Fund schemes

The scheme may invest in units of debt and liquid mutual fund schemes of quant AMC or in the Scheme of other mutual funds in conformity with the investment objective of the Scheme and in terms of the prevailing SEBI (MF) Regulations. Provided that such investment will be within the limits specified under SEBI (MF) Regulations and will be done for cash management purposes.

The securities / instruments mentioned above and such other securities the Scheme is permitted to invest in could be listed, unlisted, privately placed, secured, unsecured, rated or unrated and of any maturity.

The securities may be acquired through initial public offering (IPOs), secondary market, private placement, rights offers, negotiated deals etc. Further investments in debentures, bonds and other fixed income securities will be in instruments which have been assigned investment grade rating by the Credit Rating Agency.

Investment in unrated debt instruments shall be subject to complying with the norms as specified by Board from time to time. For applicable regulatory investment limits please refer paragraph "Investment Restrictions".

The Fund Manager may invest in any other security as maybe permitted from time to time and which are in line with the investment objectives of the Scheme.

E. WHAT ARE THE INVESTMENT STRATEGIES?

ESG represents factors viz. Environmental (such as impact of business on natural resources), Social (such as business having social impact) and Governance (being the way in which the company is run).

Quality companies with a competitive advantage, sustainable business model and visibility of earnings growth are the best avenues for long term wealth generation. ESG factors can complement traditional tools of evaluating and identifying quality businesses and thus improve the overall understanding of the company.

Typically, it is seen that the companies that have strong ESG metrics are companies that are well governed and treat their responsibilities to the environment and society seriously and as a result are likely to avoid negative external shocks that can impact their business models.

The investment strategy of the Scheme will be to invest in a basket of securities based on combining existing traditional fundamental, bottom-up financial analysis along with a rigorous analysis on the environmental, social and governance aspects of the company. The ESG analysis will be based on a comprehensive ESG framework adopted from some of the global best practices. The ESG process will be executed at various levels.

Sector level screening:

The scheme will exclude sectors/themes that are deemed harmful from a societal perspective. We will avoid investment in companies operating in those industries and maintain that exclusion on an ongoing basis. For example we will not invest in companies involved in Cluster Munitions, Anti- Personnel Mines, and Chemical and Biological Weapons. We will not hold any security that is involved in the production, stockpiling, transfer and use of these weapons.

Stock level screening:

Apart from sector exclusion list, we will not invest in stocks which throw up ESG red flags as a part of our review, even if the company is from a sector that is not a part of exclusion list.

Portfolio Construction:

We believe that evaluating a company from an ESG perspective requires a detailed qualitative approach that should complement our existing fundamental based investment process workings rather than a simplistic standalone scoring based inclusion/exclusion matrix for individual stocks. We intend to be active owners of the companies in which we invest and to reflect environmental, social and governance (ESG) value drivers within our investment process by following below steps.

Step 1: Initial detailed ESG assessment of every company at the time of its inclusion in the investment universe will be carried out. The assessment will be based on a detailed sector- specific questionnaire that will be completed by the analyst in discussion with the company. Thus every company will undergo a detailed ESG due diligence in addition to the fundamental ground work before entering the universe.

Step 2: Ongoing detailed assessment and evaluation of ESG issues or concerns will be carried out periodically to ensure that changes to the operating environment are captured. In case of any concerns on ESG front indicating any risk that may be detrimental to the long term shareholder value or in case of no evidence of any steps taken to strengthen safety measures, may lead to exclusion of the security from the universe.

Step 3: In case of any specific ESG issue facing the company, a detailed review of the same to be carried out by the analyst and the impact discussed with the company management.

Step 4: Active engagement with the company management, ownership in terms of improved disclosure of ESG matters and voting on proxy items keeping ESG aspect in mind.

While the more traditional financial indicators and the analysis of business strategy form the basis of investment decisions, ESG factors may impact the investments in two ways – first through size of position given its impact on the inherent risk to our financial forecasts and secondly through our view of the ultimate long term value of company based on its readiness to face some of these issues, from both an upside and downside perspective. We will primarily focus on the longer term impact of ESG issues rather than unduly weighting factors which are currently occupying market attention.

Derivatives Strategy

The Scheme may invest in various derivative instruments which are permissible under the applicable regulations. Such investments shall be subject to the investment objective and strategy of the Scheme and the internal limits if any, as laid down from time to time. These include but are not limited to futures (both stock and index) and options (stock and index).

Derivatives are financial contracts of pre-determined fixed duration, like stock futures/options and index futures and options, whose values are derived from the value of an underlying primary financial instrument such as: interest rates, exchange rates, commodities, and equities.

Derivatives can be either exchange traded or can be over the counter (OTC). Exchange traded derivatives are listed and traded on stock exchanges whereas OTC derivative transactions are generally structured between two counterparties.

The objectives of the various strategies include earning option premium/ hedge stock / portfolio against market gyrations.

Risks

The risks associated with derivatives are similar to those associated with underlying investments. The additional risks of using derivative strategies could be on account of:

- Illiquidity;
- Potential mis - pricing of the Futures/Options;
- Lack of opportunity;
- Inability of derivatives to correlate perfectly with the underlying (Indices, Assets, Exchange Rates);
- Cost of hedge can be higher than adverse impact of market movements;
- An exposure to derivatives in excess of the hedging requirements can lead to losses;
- An exposure to derivatives can also limit the profits from a genuine investment transaction;
- The prices which are seen on the screen need not be the same at which execution will take place.
- In case of option writing, the downside of the strategy could be more than the option premium earned.

For detailed risks associated with use of derivatives, please refer paragraph "Scheme Specific Risk Factors". Exchange traded derivatives Contracts in stocks and indices in India are currently cash settled at the time of maturity.

Derivatives allowed for mutual funds are only exchange traded and not OTC. Concepts and Examples of derivatives which may be used by the fund manager:

Futures

Futures (Index & Stocks) are forward contracts traded on the exchanges & have been introduced both by BSE and NSE. Generally futures of 1 month (near month), 2 months (next month) and 3 months (far month) are presently traded on these exchanges. These futures expire on the last working Thursday of the respective months.

Illustration with Index Futures

In case the Nifty 50 near month future contract is trading at say, Rs. 5,830, and the fund manager has a view that it will depreciate going forward; the Scheme can initiate a sale transaction of Nifty futures at Rs. 5,830 without holding a portfolio of equity stocks or any other underlying long equity position. Once the price falls to Rs. 4,500 after say, 20 days, the Scheme can initiate a square-up transaction by buying the said futures and book a profit of Rs. 1,330.

Correspondingly, if the fund manager has a positive view he can initiate a long position in the index / stock futures without an underlying cash/ cash equivalent subject to the extant regulations.

There are futures based on stock indices as mentioned above as also futures based on individual stocks. The profitability of index /stock future as compared to an individual security will inter-alia depends upon:

- The carrying cost,
- The interest available on surplus funds, and
- The transaction cost.

Example of a typical future trade and the associated costs

Particulars	Index Future	Actual Purchase of Stocks
Index at the beginning of the month	5500	5500
Price of 1 month future	5830	
A. Execution cost: Carry and other index future costs	10	
B. Brokerage cost: Assumed at	7.02	8.75
0.2% of Index Future		
0.25% for spot Stocks		
C. Gains on surplus fund: (Assumed 8% p.a. return on 85% of the money left after paying 15% margin) $(8\% \times 5500 \times 85\% \times 30 \text{ days} / 365)$	30.74	0
Total Cost (A+B-C)	-13.72	8.75

Some strategies that employ stock /index futures and their objectives:

(a) Arbitrage

(1) Selling spot and buying future: In case the Scheme holds the stock of a company "A" at say Rs. 100 while in the futures market it trades at a discount to the spot price say at Rs. 98, then the Scheme may sell the stock and buy the futures.

On the date of expiry of the stock future, the Scheme may reverse the transactions (i.e. buying at spot & selling futures) and earn a risk-free Rs. 2 (2% absolute) on its holdings without any dilution of the view of the fund manager on the underlying stock.

Further, the Scheme can still benefit from any movement of the price in the upward direction, i.e. if on the date of expiry of the futures, the stock trades at Rs. 110 which would be the price of the futures too, the Scheme will have a benefit of Rs 10 whereby the Scheme gets the 10% upside movement together with the 2% benefit on the arbitrage and thus getting a total return of 12%. The corresponding return in case of holding the stock would have been 10%.

Note: The same strategy can be replicated with a basket of Nifty- 50 stocks (Synthetic Nifty) and the Nifty future index.

(2) Buying spot and selling future: Where the stock of a company "A" is trading in the spot market at Rs. 100 while it trades at Rs. 102 in the futures market, then the Scheme may buy the stock at spot and sell in the futures market thereby earning Rs. 2.

Buying the stock in cash market and selling the futures results into a hedge where the Scheme has locked in a spread and is not affected by the price movement of cash market and futures market. The arbitrage position can be continued till expiry of the future contracts when there is a convergence between the cash market and the futures market. This convergence enables the Scheme to generate the arbitrage return locked in earlier.

Risk: On the date of expiry, when the arbitrage is to be unwound, it is not necessary for the stock price and its future contract to coincide. There could be a discrepancy in their prices even a minute before the market closes. Thus, there is a possibility that the arbitrage strategy gets unwound at different prices.

(b) Buying/ Selling Stock future

When the Scheme wants to initiate a long position in a stock whose spot price is at say, Rs.100 and futures is at 98, then the Scheme may just buy the futures contract instead of the spot thereby benefiting from a lower cost.

In case the Scheme has a bearish view on a stock which is trading in the spot market at Rs.98 and the futures market at say Rs. 100, the Scheme may subject to regulations, initiate a short position in the futures contract. In case the prices align with the view and the price depreciates to say Rs. 90, the Scheme can square up the short position thereby earning a profit of Rs.10 vis a vis a fall in stock price of Rs 8.

Risk: There is risk of not being able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme. The risks associated with the use of derivatives are different from or possibly greater than, the risks associated with investing directly in securities and other traditional investments. The risk of loss in trading futures contracts can be substantial, because of the low margin deposits required, the extremely high degree of leverage involved in futures pricing and the potential high volatility of the futures markets. Investments in index futures face the same risk as the investments in a portfolio of shares representing an index. The extent of loss is the same as in the underlying stocks.

(c) Hedging

The Scheme may use exchange-traded derivatives to hedge the equity portfolio. Both index and stock futures and options may be used to hedge the stocks in the portfolio.

Risk: This may involve a basis risk where the instrument used as a hedge does not match the movement in the instrument/underlying asset being hedged. The risk may be inter-related also e.g. interest rate movements can affect equity prices, which could influence specific issuer/industry assets.

(d) Alpha Strategy

The Scheme will seek to generate alpha by superior stock selection and removing market risks by selling appropriate index. For example, one can seek to generate positive alpha by buying a bank stock and selling Bank Nifty future.

Risk: Execution of these strategies depends upon the ability of the fund manager to identify and execute based on such opportunities. These involve significant uncertainties and decision of fund manager may not always be profitable. No assurance can be given that the fund manager will be able to identify or execute such strategies.

Option Contracts (Stock and Index)

An Option gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed-upon price during a certain period of time or on a specific date.

Options are used to manage risk or as an investment to generate income. The price at which underlying security is contracted to be purchased or sold is called the Strike Price.

Options that can be exercised on or before the expiration date are called American Options while, Options that can be exercised only on the expiration date are called European Options.

Options Risk / Return Pay-off Table

	Stock / Index Options	Buy Call	Sell Call	Buy Put	Sell Put
1	View on underlying	Positive	Negative	Negative	Positive
2	Premium	Pay	Receive	Pay	Receive
3	Risk Potential	Limited to premium paid	Unlimited	Limited to premium paid	Unlimited
4	Return Potential	Unlimited	Premium Received	Unlimited	Premium Received

Option contracts are of following two types - Call and Put.

Call Option: A call option gives the buyer, the right to buy specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of call option however, has the obligation to sell the underlying asset if the buyer of the call option decides to exercise the option to buy.

Put Option: A put option gives the buyer the right to sell specified quantity of the underlying asset at the set strike price on or before expiration date and the seller (writer) of put option however, has the obligation to buy the underlying asset if the buyer of the put option decides to exercise his option to sell.

Risk: The options buyer's risk is limited to the premium paid. However the gains of an options writer are limited to the premiums earned. The exchange may impose restrictions on exercise of options and may also restrict the exercise of options at certain times in specified circumstances and this could impact the value of the portfolio. The writer of a call option bears a risk of loss if the value of the underlying asset increases above the exercise price. The Scheme bears a risk that it may not be able to correctly forecast future market trends or the value of assets, indices or other financial or economic factors in establishing derivative positions for the Scheme.

Index Options / Stock Options

Index options / Stock options are termed to be an efficient way of buying / selling an index/stock compared to buying / selling a portfolio of physical shares representing an index for ease of execution and settlement. The participation can be done by buying / selling either Index futures or by buying a call/put option.

The risk are also different when index /stock futures are bought/sold vis-a-vis index/ stocks options as in case of an index future there is a mark to market variation and the risk is much higher as compared to buying an option, where the risk is limited to the extent of premium paid.

The illustration below explains how one can gain using Index call / put option. These same principles of profit / loss in an Index option apply in totality to that for a stock option.

Call Option

Suppose an investor buys a Call option on 1 lot of Nifty 50 (Lot Size: 50 units)

- Nifty index (European option).
- Nifty 1 Lot Size: 50 units
- Spot Price (S): 3500
- Strike Price (x): 3550 (Out-of-Money Call Option)
- Premium: 100

Total Amount paid by the investor as premium $[50 \times 100] = 5,000$

There are two possibilities i.e. either the index moves up over the strike price or remains below the strike price.

Case 1- The index goes up

- An investor sells the Nifty Option described above before expiry:

Suppose the Nifty 50 Index moves up to 3600 in the spot market and the premium has moved to Rs. 200 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty call option as the option now is In the Money.

His gains are as follows:

- Nifty Spot: 3600
- Current Premium: Rs.200
- Premium paid: Rs.100
- Net Gain: $\text{Rs.}200 - \text{Rs.}100 = \text{Rs.}100$ per unit
- Total gain on 1 lot of Nifty (50 units) = $\text{Rs.}5,000$ (50×100)

In this case the premium of Rs.200 has an intrinsic value of Rs.50 per unit and the remaining Rs.150 is the time value of the option.

- An investor exercises the Nifty Option at expiry

Suppose the Nifty index moves up to 3700 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty call option as the option now is in the Money.

His gains are as follows:

- Nifty Spot: 3700
- Premium paid: Rs.100
- Exercise Price: 3550
- Receivable on exercise: $3700 - 3550 = 150$
- Total Gain: $\text{Rs.}2500 \{ (150 - 100) \times 50 \}$

In this case the realised gain is only the intrinsic value, which is Rs.50, and there is no time value.

Case 2- The Nifty index moves to any level below 3550

Then the investor does not gain anything but on the other hand his loss is limited to the premium paid:

Net Loss is Rs.5,000 (Loss is capped to the extent of Premium Paid) ($\text{Rs. } 100 \text{ Premium paid} \times \text{Lot Size: } 50 \text{ units}$).

Put Option

Suppose an investor buys a Put option on 1 lot of Nifty 50.

- Nifty 1 Lot Size: 50 units
- Spot Price (S): 3,500
- Strike Price (x): 3,450 (Out-of-Money Put Option)
- Premium: 30
- Total Amount paid by the investor as premium $[50 \times 30] = \text{Rs. } 1,500$

There are two possibilities i.e. either the index moves over the strike price or moves below the strike price.

Let us analyze these scenarios. Case 1 – The index goes down

- An investor sells the Nifty Option before expiry:

Suppose the Nifty 50 Index moves down to 3400 in the spot market and the premium has moved to Rs. 80 and there are 15 days more left for the expiry. The investor decides to reverse his position in the market by selling his 1 Nifty Put option as the option now is in the Money.

His gains are as follows:

- Nifty Spot: 3,400
- Premium paid: Rs.30

- Net Gain: Rs.80 - Rs.30 = Rs.50 per unit
- Total gain on 1 lot of Nifty (50 units) = Rs.2,500 (50*50)

In this case the premium of Rs.80 has an intrinsic value of Rs.50 per unit and the remaining Rs.30 is the time value of the option.

An investor exercises the Nifty Option at expiry (It is an European Option)

Suppose the Nifty index moves down to 3400 in the spot market on the expiry day and the investor decides to reverse his position in the market by exercising the Nifty Put Option as the option now is in the Money.

His gains are as follows:

- Nifty Spot: 3400
- Premium paid: Rs.30
- Exercise Price: 3450
- Gain on exercise: 3450-3400 = 50
- Total Gain: Rs.1,000 {(50-30)*50}

In this case the realised amount is only the intrinsic value, which is Rs.50, and there is no time value in this case.

Case 2 - If the Nifty 50 index stays over the strike price which is 3450, in the spot market then the investor does not gain anything but on the other hand his loss is limited to the premium paid.

- Nifty Spot: >3450
- Net Loss Rs.1500 (Loss is capped to the extent of Premium Paid) (Rs 30 Premium paid*Lot Size: 50 units).

Covered Call Strategy

The covered call strategy is a strategy where a fund manager writes call options against an equivalent long position in an underlying stock thereby giving up a part of the upside from the long position. The strategy allows the fund manager to earn premium income from the option writing in addition being able to capture the remaining part of the upside.

Assumptions:

Current price of stock A: Rs. 27.87 per share 1 contract = 100 shares

Total no of contracts: 10 Strike price: Rs. 30/- per share Premium: Rs. 0.35 per share

Suppose, on October 6, 2018, the writer of the call owns 1,000 shares of Company A, which is currently trading at Rs. 27.87 per share. The writer of the call writes 10 call option contracts for company A with a strike price of Rs. 30 per share that expires in January 2019. The writer receives premium of 0.35 per share for the calls, which equals Rs. 35.00 per contract for a total of Rs. 350.00.

Total premium = (Rs. 0.35 per share) * (100 shares per contract) * (10 contracts) = Rs. 350. The following can be the scenarios reflecting risks and benefits at the end of the option expiry:

Case 1 - Stock falls below current price of Rs. 27.87 per share: The option expires worthless. Hence the loss from the stock position gets reduced to the extent of the premium income.

Case 2 - Stock goes up above current price but remains below Rs. 30 per share (strike price): The option expires worthless. Hence the income from the gains in the stock price gets further boosted to the extent of the premium income.

Case 3 - Stock goes above Rs. 30 per share: Option position goes out of the money for the writer. Here the return from the position is equal to the return from stock upto the strike price of Rs. 30 per share and the premium income from the option.

Benefits of using Covered Call Strategy in Mutual Funds:

The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. The strategy offers the following benefits:

- Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.
- Generating additional returns in the form of option premium in a range bound market. Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction

Risk associated with covered calls

The risk associated with covered calls is the loss of upside, i.e. if the shares are assigned (called away), the option seller forgoes any share price appreciation above the option strike price. Please refer risk factors section on detail derivatives risk factors.

Fixed Income Derivative Instruments

The Scheme may use Derivative instruments like interest rate swaps like overnight indexed swaps (OIS), forward rate agreements, interest rate futures (as and when permitted) or such other Derivative instruments as may be permitted under the applicable regulations. Derivatives will be used for the purpose of hedging, and portfolio balancing or such other purpose as may be permitted under the regulations and guidelines from time to time.

The Fund will be allowed to take exposure in interest rate swaps only on a non-leveraged basis. A swap will be undertaken only if there is an underlying asset in the portfolio. In terms of circular no. MFD.BC.191/07.01.279/1999-2000 and MPD.BC.187/07.01.279/1999 - 2000 dated November 1, 1999 and July 7, 1999 respectively issued by RBI permitting participation by Mutual Funds in interest rate swaps and forward rate agreements, the Scheme will use Derivative instruments for the purpose of hedging and portfolio balancing. The Scheme may also use derivatives for such purposes as maybe permitted from time to time. Further, the guidelines issued by RBI from time to time for forward rate agreements and interest rate swaps and other derivative products would be adhered to by the Mutual Fund.

IRS and FRAs do also have inherent credit and settlement risks. However, these risks are substantially reduced as they are limited to the interest streams and not the notional principal amounts.

Investments in Derivatives will be in accordance with the extant SEBI Regulations / guidelines. Presently Derivatives shall be used for hedging and / or portfolio balancing purposes, as permitted under the Regulations. The circumstances under which such transactions would be entered into would be when, for example using the IRS route it is possible to generate better returns / meet the objective of the Scheme at a lower cost. e.g. if buying a 2 Yr MIBOR based instrument and receiving the 2 Yr swap rate yields better return than the 2 Yr AAA corporate, the Scheme would endeavor to do that. Alternatively, the Scheme would also look to hedge existing fixed rate positions if the view on interest rates is that it would likely rise in the future.

The following information provides a basic idea as to the nature of the Derivative instruments proposed to be used by the Scheme and the benefits and risks attached therewith. Please note that the examples have been given for illustration purposes only.

Using Overnight Indexed Swaps

In a rising interest rate scenario, the Scheme may enhance returns for the Investor by hedging the risk on its fixed interest paying assets by entering into an OIS contract where the Scheme agrees to pay a fixed interest rate on a specified notional amount, for a pre determined tenor and receives floating interest rate payments on the same notional amount. The fixed returns from the Scheme assets and the fixed interest payments to be made by the Scheme on account of the OIS transaction offset each other and the Scheme benefits on the floating interest payments that it receives. The Scheme may enter into an opposite position in case of a falling interest rate scenario, i.e. to hedge the floating rate assets in its portfolio the Scheme enters into an OIS transaction wherein it receives a fixed interest rate on a specified notional amount for a specified time period and pays a floating interest rate on the same notional amount. The floating interest payments that the Scheme receives on its floating rate securities and the floating interest payments that the Scheme has to pay on account of the OIS transaction offset each other and the Scheme benefits on the fixed interest payments that it receives in such a scenario.

Swap

Assume that the Scheme has a Rs. 20 crore floating rate investment linked to MIBOR (Mumbai Inter Bank Offered Rate). Hence, the Scheme is currently running an interest rate risk and stands to lose if the interest rate moves down. To hedge this interest rate risk, the Scheme can enter into a 6 month MIBOR swap. Through this swap, the Scheme will receive a fixed predetermined rate (assume 12%) and pays the "benchmark rate" (MIBOR), which is fixed by the NSE or any other agency such as Reuters. This swap would effectively lock-in the rate of 12% for the next 6 months, eliminating the daily interest rate risk. This transaction is usually routed through an intermediary who runs a book and matches deals between various counterparties.

The steps will be as follows:

Assuming the swap is for Rs. 20 Crores for June 1, 2009 to December 1, 2009. The Scheme is a fixed rate receiver at 12% and the counterparty is a floating rate receiver at the overnight rate on a compounded basis (say NSE MIBOR).

On June 1, 2009 the Scheme and the counterparty will exchange only a contract of having entered this swap. This documentation would be as per International Swap Dealers Association (ISDA) norms.

On a daily basis, the benchmark rate fixed by NSE will be tracked by them. On December 1, 2009 they will calculate the following:

- The Scheme is entitled to receive interest on Rs. 20 Crores at 12% for 184 days i.e. Rs. 1.21 Crores, (this amount is known at the time the swap was concluded) and will pay the compounded benchmark rate.

- The counterparty is entitled to receive daily compounded call rate for 184 days & pay 12% fixed.
- On December 1, 2009, if the total interest on the daily overnight compounded benchmark rate is higher than Rs. 1.21 Crores, the Scheme will pay the difference to the counterparty. If the daily compounded benchmark rate is lower, then the counterparty will pay the Scheme the difference.
- Effectively the Scheme earns interest at the rate of 12% p.a. for six months without lending money for 6 months fixed, while the counterparty pays interest @ 12% p.a. for 6 months on Rs. 20 Crores, without borrowing for 6 months fixed.

The above example illustrates the use of Derivatives for hedging and optimizing the investment portfolio. Swaps have their own drawbacks like credit risk, settlement risk. However, these risks are substantially reduced as the amount involved is interest streams and not principal.

Forward Rate Agreement

Assume that on June 30, 2009, the 30 day Commercial Paper (CP) rate is 4% and the Scheme has an investment in a CP of face value Rs. 50 Crores, which is going to mature on July 31, 2009. If the interest rates are likely to remain stable or decline after July 31, 2009, and if the fund manager, who wants to re-deploy the maturity proceeds for 1 more month does not want to take the risk of interest rates going down, he can then enter into a following Forward Rate Agreement (FRA) say as on June 30, 2009:

He can receive 1 X 2 FRA on June 30, 2009 at 4.00% (FRA rate for 1 months lending in 1 months time) on the notional amount of Rs. 50 Crores, with a reference rate of 30 day CP benchmark. If the CP benchmark on the settlement date i.e. July 30, 2009 falls to 3.75%, then the Scheme receives the difference 4.00 – 3.75 i.e. 25 basis points on the notional amount Rs. 50 Crores.

Interest Rate Futures

Assume that the Scheme holds an Indian ten year benchmark and the fund manager has a view that the yields will go up in the near future leading to decrease in value of the investment and subsequent decrease in Net Asset Value of the Scheme. The fund manager decides to use Interest Rate Futures to mitigate the risk of decline of Net Asset Value of the Scheme.

12th October 2009

- The benchmark ten year paper 6.88 2009, is trading at INR 98.00 at a yield of 7.19%.
- December 2009 futures contract on the ten year notional 7% coupon bearing Government paper is trading at a yield of 7.29% at a price of INR 98.50.
- The mutual fund decides to hedge the exposure by taking a short position in December 2009 interest rate futures contract.

25th November 2009

- As expected by the fund manager the yield of the benchmark ten year paper has increased to 8% and the price has decreased to 92.70.
- The December 2009 futures contract is trading at a price of INR 93.17 indicating a yield of 8.05%
- The mutual fund unwinds the short position by buying the December 2009 futures contract. The transaction results in profit from the futures position, against the corresponding loss from the Government of India security position.

Portfolio Turnover

The Scheme is an open-ended scheme. It is expected that there would be a number of subscriptions and redemptions on a daily basis. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

There may be an increase in transaction cost such as brokerage paid, if trading is done frequently. However, the cost would be negligible as compared to the total expenses of the Scheme. Frequent trading may increase the profits which will offset the increase in costs. The fund manager will endeavor to optimize portfolio turnover to maximize gains and minimize risks keeping in mind the cost associated with it. However, it is difficult to estimate with reasonable accuracy, the likely turnover in the portfolio of the Scheme. The Scheme has no specific target relating to portfolio turnover.

Debt and Money Markets in India

The Indian debt market is today one of the largest in Asia and includes securities issued by the Government (Central & State Governments), public sector undertakings, other government bodies, financial institutions, banks and corporates. Government and public sector enterprises are the predominant borrowers in the markets. The major players in the Indian debt markets today are banks, financial institutions, mutual funds, insurance companies, primary dealers, trusts, pension funds and corporates. The Indian debt market is the largest segment of the Indian financial markets. The debt market comprises broadly two segments, viz. Government Securities market or G-Sec market and corporate debt market. The latter is further classified as market for PSU bonds and private sector bonds.

The Government Securities (G-Secs) market, consists of G-Sec outstanding of Rs. 58,19,997.04 cr as on Sep 03, 2019 (State Govt securities - Rs 24,02,242 cr, Source: CCIL), is the oldest and the largest component (50% share in market cap) of the Indian debt market in terms of market capitalization, outstanding securities and trading volumes. The G-Secs market plays a vital role in the Indian economy as it provides the benchmark for determining the level of interest rates in the country through the yields on the Government Securities which are referred to as the risk-free rate of return in any economy. Over the years, there have been new products

introduced by the RBI like zero coupon bonds, floating rate bonds, inflation indexed bonds, etc.

The corporate bond market, in the sense of private corporate sector raising debt through public issuance in capital market, is only an insignificant part of the Indian Debt Market. The market capitalization of corporate debt market as on March 31, 2016 is Rs. 4,35,743.204 Cr (Source: NSE). A large part of the issuance in the non-Government debt market is currently on private placement basis.

The money markets in India essentially consist of the call money market (i.e. market for overnight and term money between banks and institutions), repo transactions (temporary sale with an agreement to buy back the securities at a future date at a specified price), commercial papers (CPs, short term unsecured promissory notes, generally issued by corporates), certificate of deposits (CDs, issued by banks) and Treasury Bills (issued by RBI). In a predominantly institutional market, the key money market players are banks, financial institutions, insurance companies, mutual funds, primary dealers and corporates. In money market, activity levels of the Government and non-government debt vary from time to time. Instruments that comprise a major portion of money market activity include but not limited to:

- Overnight Call
- Tri Party Repo
- Repo/Reverse Repo Agreement
- Treasury Bills
- Government securities with a residual maturity of < 1 year.
- Commercial Paper
- Certificate of Deposit

Apart from these, there are some other options available for short tenure investments that include MIBOR linked debentures with periodic exit options and other such instruments. Though not strictly classified as Money Market Instruments, PSU / DFI / Corporate paper with a residual maturity of < 1 year, are actively traded and offer a viable investment option.

The market has evolved in past 2-3 years in terms of risk premia attached to different class of issuers. Bank CDs have clearly emerged as popular asset class with increased acceptability in secondary market. PSU banks trade the tightest on the back of comfort from majority government holding. Highly rated manufacturing companies also command premium on account of limited supply. However, there has been increased activity in papers issued by private/foreign banks/NBFCs/companies in high-growth sector due to higher yields offered by them. Even though companies across these sectors might have been rated on a same scale, the difference in the yield on the papers for similar maturities reflects the perception of their respective credit profiles.

The following table gives approximate yields prevailing on December 23, 2019 on some of the instruments and further illustrates this point.

Instrument	Current Yield range (%)
Tri-party Repo	4.80%-4.90%
Repo	4.80%-4.90%
3M T-bill	5.00%-5.05%
1Y T-bill	5.25%-5.30%
10Y G-sec	6.60%-6.65%
3m PSU Bank CD	5.10%-5.15%
3m Manufacturing co. CP	5.20%-5.30%
1Y PSU Bank CD	6.05%-6.10%
1Y NBFC CP	6.70%-6.75%
1Y Manufacturing co. CP	6.20%-6.25%
5Y AAA Institutional Bond	6.90%-6.95%
10Y AAA Institutional Bond	7.55%-7.60%

These yields are indicative and do not indicate yields that may be obtained in future as interest rates keep changing consequent to changes in macro-economic conditions and RBI policy. The price and yield on various debt instruments fluctuate from time to time depending upon the macro economic situation, inflation rate, overall liquidity position, foreign exchange scenario etc. Also, the price and yield vary according to maturity profile, credit risk etc.

Risk Control

Risk management is going to be an integral part of the investment process. Effective risk management is critical to fund management for achieving financial soundness. The investment team of the AMC will carry out rigorous in depth credit evaluation of the money market and debt instruments (other than G-Secs) proposed to be invested in. The credit evaluation will essentially be a bottom up approach and include a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer. The AMC would incorporate adequate safeguards for

controlling risks in the portfolio construction process, which would be periodically evaluated. The Scheme will also use derivatives and other hedging instruments, as may be permitted by RBI, from time to time, in order to protect the value of the portfolio. Investments by the Scheme shall be made as per the investment objectives of the Scheme and provisions of SEBI regulations. AMC has implemented the Bloomberg Portfolio Order Management System as Front Office System (FOS). The system has incorporated all the investment restrictions as per SEBI guidelines and “soft” warning alerts at appropriate levels for preemptive monitoring. The system enables identifying & measuring the risk through various risk measurement tools like various risk ratios, average duration and analyzes the same and acts in a preventive manner.

F. FUNDAMENTAL ATTRIBUTES

Following are the Fundamental Attributes of the Scheme, in terms of Regulation 18 (15A) of the SEBI (MF) Regulations:

(i) Type of a Scheme

An Open ended equity scheme investing in companies demonstrating sustainable practices across Environment, Social and Governance (ESG) theme.

Investment Objective Main Objective: To generate long term capital appreciation by investing in a diversified portfolio of companies demonstrating sustainable practices across Environmental, Social and Governance (ESG) parameters. However, there can be no assurance that the investment objective of the Scheme will be achieved.

Investment Pattern: Please refer to sub - section C ‘How will the Scheme Allocate its Assets?’ under the section II ‘INFORMATION ABOUT THE SCHEME’.

(ii) Terms of Issue

- Liquidity provisions such as listing, repurchase, redemption. (please refer to relevant provisions on listing, repurchase, redemption in section III ‘Units and Offer’)
- Aggregate fees and expenses charged to the scheme (please refer to section IV ‘FEES and EXPENSES’).
- Any safety net or guarantee provided (Not applicable for the Scheme).

In accordance with Regulation 18(15A) of the SEBI (MF) Regulations, the Trustees shall ensure that no change in the fundamental attributes of the Scheme and the Plan(s) / Option(s) thereunder or the trust or fee and expenses payable or any other change which would modify the Scheme and the Plan(s) / Option(s) thereunder and affect the interests of Unitholders is carried out unless:

- A written communication about the proposed change is sent to each Unitholder and an advertisement is given in one English daily newspaper having nationwide circulation as well as in a newspaper published in the language of the region where the Head Office of the Mutual Fund is situated; and
- The Unitholders are given an option for a period of 30 days to exit at the prevailing Net Asset Value without any exit load.

G. HOW WILL THE SCHEME BENCHMARK ITS PERFORMANCE?

Nifty 100 ESG TRI

Justification of benchmark:

The NIFTY 100 ESG TRI index is designed to reflect the performance of companies that are part of NIFTY 100 index based on environmental, social and governance score. The weight of constituents in the index is tilted based on ESG score assigned to the company, i.e. the constituent weight is derived from its free float market capitalization and ESG score.

This index excludes companies engaged in the business like tobacco, alcohol, controversial weapons and gambling operations. The companies that are involved in any major environmental, social or governance controversy are not considered for selection in the index.

The constituents of the Index reflect the fund's universe in the best possible way.

The Trustee/AMC reserves the right to change the benchmark for the evaluation of the performance of the Scheme from time to time, keeping in mind the investment objective of the Scheme and the appropriateness of the benchmark, subject to SEBI guidelines and other prevalent guidelines.

I. WHAT ARE THE INVESTMENT RESTRICTIONS?

Pursuant to Regulations, specifically the Seventh Schedule and amendments thereto, the following investment restrictions are currently applicable to the Scheme:

1. The Scheme shall not invest more than 10 per cent of its NAV in the equity shares or equity related instruments of any company. All investments by the Scheme in equity shares and equity related instruments shall only be made provided such securities are listed or to be listed.
2. The Mutual Fund under all its Scheme(s) shall not own more than ten per cent of any company's paid up capital carrying voting rights. Provided, investment in the asset management company or the trustee company of a mutual fund shall be governed by clause (a), of sub-regulation (1), of regulation 7B.
3. The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer, which are rated not below investment grade by a credit rating agency authorized to carry out such activity under the SEBI Act, 1992. Such investment limit may be extended to 12% of the

NAV of the Scheme with the prior approval of the Trustee and the Board of Directors of AMC.

Such limit shall not be applicable for investment in Government Securities, treasury bills and collateralized borrowing and lending obligations.

Provided further that investments within such limit can be made in the mortgaged backed securitised debt, which are rated not below investment grade by a credit rating agency, registered with SEBI.

4. The Scheme shall not invest in unlisted debt instruments including commercial papers, except Government Securities and other money market instruments:

Provided that the Scheme may invest in unlisted non-convertible debentures up to a maximum of 10% of the debt portfolio of the Scheme subject to such conditions as may be specified by the Board from time to time:

Provided further that the Scheme shall comply with the norms under this clause within the time and in the manner as may be specified by the Board:

Provided further that the norms for investments by the Scheme in unrated debt instruments shall be as specified by the Board from time to time.

5. The investment by the Scheme in the following instruments shall not exceed 10% of the debt portfolio of the scheme and the group exposure in such instruments shall not exceed 5% of the debt portfolio of the scheme:

- a). Unsupported rating of debt instruments (i.e. without factoring-in credit enhancements) is below investment grade and
- b). Supported rating of debt instruments (i.e. after factoring-in credit enhancement) is above investment grade.

These limits shall not be applicable on investments in securitized debt instruments, as defined in SEBI (Public Offer and Listing of Securitized Debt Instruments) Regulations 2008.

6. Investment in debt instruments, having credit enhancements backed by equity shares directly or indirectly, shall have a minimum cover of 4 times considering the market value of such shares.
7. The Scheme may invest in other schemes of the Mutual Fund or any other mutual fund without charging any fees, provided the aggregate inter-scheme investment made by all the schemes under the same management or in schemes under the management of any other asset management company shall not exceed 5% of the Net Asset Value of the Fund.
8. The Scheme shall not make any investment in:
 - any unlisted security of an associate or group company of the sponsor; or
 - any security issued by way of private placement by an associate or group company of the sponsor; or
 - the listed securities of group companies of the sponsor which is in excess of 25% of the net assets.
9. The Mutual Fund shall get the securities purchased transferred in the name of the Fund on account of the concerned Scheme, wherever investments are intended to be of a long-term nature.
10. Transfer of investments from one scheme to another scheme in the same Mutual Fund is permitted provided:
 - a) such transfers are done at the prevailing market price for quoted instruments on spot basis (spot basis shall have the same meaning as specified by a Stock Exchange for spot transactions); and
 - b) the securities so transferred shall be in conformity with the investment objective of the scheme to which such transfer has been made.
11. The Mutual Fund shall buy and sell securities on the basis of deliveries and shall in all cases of purchases, take delivery of relevant securities and in all cases of sale, deliver the securities:

Provided that the Mutual Fund may engage in short selling of securities in accordance with the framework relating to short selling and securities lending and borrowing specified by the Board:

Provided further that the Mutual Fund may enter into derivatives transactions in a recognized stock exchange, subject to the framework specified by SEBI.

Provided further that sale of government security already contracted for purchase shall be permitted in accordance with the guidelines issued by the Reserve Bank of India in this regard.

12. The Scheme shall not make any investment in any fund of funds scheme.
13. The Scheme will comply with the following restrictions for trading in exchange traded derivatives, as specified by SEBI vide its circular no. DNPd/Cir-29/2005 dated September 14, 2005, circular no. DNPd/Cir-30/2006 dated January 20, 2006, circular no. DNPd/Cir-31/2006 dated September 22, 2006, circular no. Cir/IMD/DF/11/2010 dated August 18, 2010 and circular no. SEBI/HO/MRD/DP/CIR/P/2016/143 dated December 27, 2016:

i. Position limit for the Mutual Fund in equity index options contracts

- a. The Mutual Fund position limit in all index options contracts on a particular underlying index shall be Rs. 500 crores or 15% of the total open interest of the market in index options, whichever is higher, per stock exchange.
- b. This limit would be applicable on open positions in all options contracts on a particular underlying index.

ii. Position limit for the Mutual Fund in equity index futures contracts:

- a. The Mutual Fund position limit in all index futures contracts on a particular underlying index shall be Rs. 500 crores or 15% of the total open interest of the market in index futures, whichever is higher, per stock exchange.
- b. This limit would be applicable on open positions in all futures contracts on a particular underlying index.

iii. Additional position limit for hedging

In addition to the position limits at point (i) and (ii) above, the Mutual Fund may take exposure in equity index derivatives subject to the following limits:

- a. Short positions in index derivatives (short futures, short calls and long puts) shall not exceed (in notional value) the Mutual Fund's holding of stocks.
- b. Long positions in index derivatives (long futures, long calls and short puts) shall not exceed (in notional value) the Mutual Fund's holding of cash, government securities, Treasury Bills and similar instruments.

iv. Position limit for Mutual Fund for stock based derivative contracts

The combined futures and options position limit shall be 20% of the applicable Market Wide Position Limit (MWPL).

v. Position limit for each scheme of a Mutual Fund

The scheme-wise position limit / disclosure requirements shall be:

- i. For stock option and stock futures contracts, the gross open position across all derivative contracts on a particular underlying stock of a scheme of a Mutual Fund shall not exceed the higher of 1% of the free float market capitalization (in terms of number of shares)

or

5% of the open interest in the derivative contract on a particular underlying stock (in terms of number of contracts).

- ii. This position limits shall be applicable on the combined position in all derivative contracts on an underlying stock at a Stock Exchange.
- iii. For index based contracts, Mutual Funds shall disclose the total open interest held by its scheme or all schemes put together in a particular underlying index, if such open interest equals to or exceeds 15% of the open interest of all derivative contracts on that underlying index.

14. Pending deployment of the funds of the Scheme in securities in terms of the investment objective of the Scheme, the AMC may park the funds of the Scheme in short term deposits of scheduled commercial banks, subject to the guidelines issued by SEBI:

The Scheme will comply with the following guidelines/restrictions for parking of funds in short term deposits:

- i. "Short Term" for such parking of funds by the Scheme shall be treated as a period not exceeding 91 days. Such short-term deposits shall be held in the name of the Scheme.
- ii. The Scheme shall not park more than 15% of the net assets in short term deposit(s) of all the scheduled commercial banks put together. However, such limit may be raised to 20% with prior approval of the Trustee.
- iii. Parking of funds in short term deposits of associate and sponsor scheduled commercial banks together shall not exceed 20% of total deployment by the Mutual Fund in short term deposits.
- iv. The Scheme shall not park more than 10% of the net assets in short term deposit(s), with any one scheduled commercial bank including its subsidiaries.
- v. The Scheme shall not park funds in short term deposit (STD) of a bank which has invested in that Scheme. Further Trustees/AMCs shall also ensure that the bank in which the Scheme has STD do not invest in the said scheme until the Scheme has STD with such bank.
- vi. The AMC will not charge any investment management and advisory fees for funds parked in short term deposits of scheduled commercial banks.

However, the above provisions will not apply to term deposits placed as margins for trading in cash and derivatives market.

15. The Scheme shall not advance any loans.

16. The Scheme shall not borrow except to meet temporary liquidity needs of the Scheme for the purpose of repurchase / redemption of Units or payment of interest and/or dividend to the Unit holders.

Provided that the Fund shall not borrow more than 20% of the net assets of the individual Scheme and the duration of the borrowing shall not exceed a period of 6 months.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time.

17. SEBI vide its circular no. Cir/IMD/DF/11/2010 dated August 18, 2010 has prescribed the following investment restrictions w.r.t. investment in derivatives:

S. No.	Particulars								
1	The cumulative gross exposure through equity, debt, units issued by REITs & InvITs and derivative positions shall not exceed 100% of the net assets of the Scheme. Cash or cash equivalents with residual maturity of less than 91 days shall be treated as not creating any exposure.								
2	The total exposure related to option premium paid shall not exceed 20% of the net assets of the scheme.								
3	Exposure due to hedging positions may not be included in the above mentioned limits subject to the following: <ol style="list-style-type: none"> Hedging positions are the derivative positions that reduce possible losses on an existing position in securities and till the existing position remains. Hedging positions cannot be taken for existing derivative positions. Exposure due to such positions shall have to be added and treated under limits mentioned in Point 1. Any derivative instrument used to hedge has the same underlying security as the existing position being hedged. The quantity of underlying associated with the derivative position taken for hedging purposes does not exceed the quantity of the existing position against which hedge has been taken.								
4	Exposure due to derivative positions taken for hedging purposes in excess of the underlying position against which the hedging position has been taken, shall be treated under the limits mentioned in point 1.								
5	Each position taken in derivatives shall have an associated exposure as defined under. Exposure is the maximum possible loss that may occur on a position. However, certain derivative positions may theoretically have unlimited possible loss. Exposure in derivative positions shall be computed as follows: <table border="1"> <thead> <tr> <th>Position</th><th>Exposure</th></tr> </thead> <tbody> <tr> <td>Long Future</td><td>Futures Price * Lot Size * Number of Contracts</td></tr> <tr> <td>Short Future</td><td>Futures Price * Lot Size * Number of Contracts</td></tr> <tr> <td>Option bought</td><td>Option Premium Paid * Lot Size * Number of Contracts.</td></tr> </tbody> </table>	Position	Exposure	Long Future	Futures Price * Lot Size * Number of Contracts	Short Future	Futures Price * Lot Size * Number of Contracts	Option bought	Option Premium Paid * Lot Size * Number of Contracts.
Position	Exposure								
Long Future	Futures Price * Lot Size * Number of Contracts								
Short Future	Futures Price * Lot Size * Number of Contracts								
Option bought	Option Premium Paid * Lot Size * Number of Contracts.								
6	The Scheme may enter into plain vanilla interest rate swaps for hedging purposes. The counter party in such transactions has to be an entity recognized as a market maker by RBI. Further, the value of the notional principal in such cases shall not exceed the value of respective existing assets being hedged by the Scheme. Exposure to a single counterparty in such transactions shall not exceed 10% of the net assets of the Scheme.								

18. The Scheme may write call options only under a covered call strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:

- The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- At all points of time the Mutual Fund scheme shall comply with the provisions at paragraph (i) and (ii) above. In case of any passive breach of the requirement at paragraph (i), the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- In case the Scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (i) and (ii) above while selling the securities.
- In no case, the scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- The premium received shall be within the requirements prescribed in terms of paragraph 5 of SEBI circular dated August 18, 2010 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of paragraph 3 of SEBI Circular no. Cir/IMD/DF/11/2010 dated August 18, 2010.
 - The Scheme shall participate in repos in corporate debt securities as per the guidelines issued by SEBI and/ or RBI

from time to time and the guidelines framed by the Board of Directors of Trustee Company and the Asset Management Company, from time to time.

At present the following conditions and norms shall apply to repo in corporate debt securities:

- (i) The gross exposure of the Scheme to repo transactions in corporate debt securities shall not be more than 10% of the net assets of the Scheme.
- (ii) The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt, units issued by REITs & InvITs and derivatives shall not exceed 100% of the net assets of the Scheme.
- (iii) The Scheme shall participate in repo transactions only in AA and above rated corporate debt securities.
- (iv) The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.
- (v) The Trustee and the Asset Management Company have framed guidelines inter alia considering the following aspects:
 - i. Category of counterparty
 - ii. Credit rating of counterparty
 - iii. Tenor of collateral
 - iv. Applicable haircuts
- (vi) Counterparty selection & credit rating
The counterparty must be an acceptable counterparty for debt transactions. The Mutual Fund follows a counterparty empanelment process for fixed income transactions and the same shall be used for selection of counterparties for corporate bond repos. All repo transactions in corporate bonds will be governed by a repo agreement as specified by FIMMDA and / or other specified authorities.
- (vii) Collateral tenor & quality
The exposure limit/investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds. The Scheme shall further follow guidelines framed by Trustee and the AMC from time to time.
- (viii) Applicable haircuts
Currently mutual funds are permitted to carry out repo transactions in government securities without any haircuts. The Reserve Bank of India has notified a minimum haircut based on rating of the corporate bond and other securities. In addition, the Fixed Income and Money Market Dealers Association (FIMMDA) would maintain a rating-haircut matrix on an ongoing basis. The Scheme shall further follow guidelines framed by Trustee and the AMC from time to time.

The haircuts seek to protect the lender of funds from the event of the counterparty failing to honor the repurchase leg of the repo. In such a circumstance, the Fund would suffer a loss if the value of the collateral depreciates by more than the haircut. The fall in the value of the collateral could be on account of higher yields and/ or deterioration of credit quality.

As the typical tenor of repos is short (typically overnight), the haircuts represent a relatively high degree of safety in relation to the interest rate risk on the collateral. The risk of collateral depreciation based on historical volatility is given in the table below:

Bond Tenor (yrs)	1	3	5	10
Price Volatility (%) (annualized)	0.6	1.2	1.7	3.4
Repo Tenor	Number of standard deviations needed to lose 10%			
1 day	258	136	94	48
7 days	98	52	36	18

In the above table, the price volatility of a 10-year bond is about 3.4% annualized. That is a 10% price move represents nearly a 3-sigma event on an annualized basis. For overnight tenors, this represents a 48-sigma event (for comparison a 6-sigma event occurs about once in a million observations).

It is apparent that the haircuts stipulated by RBI are more than sufficient to mitigate interest rate risk. Credit event risk remains (the collateral could default during the tenor of the repo). This risk is to be mitigated by ensuring that the collateral is acceptable from a credit point of view.

19. The mutual fund under all its schemes shall not own more than 10% of units issued by a single issuer of REIT and InvIT.

20. The Scheme shall not invest –

- i. more than 10% of its NAV in the units of REIT and InvIT; and
- ii. more than 5% of its NAV in the units of REIT and InvIT issued by a single issuer.

- a. The Mutual Fund/AMC shall make investment out of the NFO proceeds only on or after the closure of the NFO period. The Mutual Fund/ AMC can however deploy the NFO proceeds in TREPS before the closure of NFO period. However, AMCs shall not charge any investment management and advisory fees on funds deployed in TREPS during

the NFO period. The appreciation received from investment in TREPS shall be passed on to investors.

Further, in case the minimum subscription amount is not garnered by the scheme during the NFO period, the interest earned upon investment of NFO proceeds in TREPS shall be returned to investors, in proportion of their investments, along-with the refund of the subscription amount.

The exposure limit/ investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate bonds.

The Scheme will comply with the other Regulations applicable to the investments of Mutual Funds from time to time.

All the investment restrictions will be applicable at the time of making investments.

The AMC/Trustee may alter these above stated restrictions from time to time to the extent the Regulations change, so as to permit the Scheme to make its investments in the full spectrum of permitted investments for mutual funds to achieve its respective investment objective.

J. CREATION OF SEGREGATED PORTFOLIO

Creation of segregated portfolio shall be subject to guidelines specified by SEBI from time to time and includes the following:

In this regard, the term 'segregated portfolio' shall mean a portfolio comprising of debt or money market instrument affected by a credit event, that has been segregated in a mutual fund scheme. The term 'main portfolio' shall mean the scheme portfolio excluding the segregated portfolio. The term 'total portfolio' shall mean the scheme portfolio including the securities affected by the credit event.

Credit Event

a. For rated debt or money market instruments

- 1) Segregated portfolio may be created, in case of a credit event at issuer level i.e. downgrade in credit rating by a SEBI registered Credit Rating Agency (CRA), as under:
 - a. Downgrade of a debt or money market instrument to 'below investment grade', or
 - b. Subsequent downgrades of the said instruments from 'below investment grade', or
 - c. Similar such downgrades of a loan rating
- 2) In case of difference in rating by multiple CRAs, the most conservative rating shall be considered. Creation of segregated portfolio shall be based on issuer level credit events as mentioned above and implemented at the ISIN level.
- 3) Creation of segregated portfolio is optional and is at the discretion of quant Money Managers Limited ('quant AMC'/'the AMC')

b. For unrated debt or money market instruments

Segregated portfolio of unrated debt or money market instruments may be created only in case of actual default of either the interest or principal amount by the issuer. Credit event in this case shall be 'actual default' by the issuer of such instruments and shall be considered for creation of segregated portfolio.

Process for Creation of Segregated Portfolio

- 1) On the date of credit event, the AMC shall decide on creation of segregated portfolio. Once AMC decides to segregate portfolio, it shall:
 - a. seek approval of trustees prior to creation of the segregated portfolio.
 - b. immediately issue a press release disclosing its intention to segregate such debt and money market instrument and its impact on the investors. quant Mutual Fund shall disclose that the segregation shall be subject to Trustee approval. Additionally, the said press release shall be prominently disclosed on the website of the AMC.
 - c. ensure that till the time the Trustee approval is received, which in no case shall exceed 1 business day from the day of credit event, the subscription and redemption in the Scheme shall be suspended for processing with respect to creation of units and payment on redemptions.
- 2) Once Trustee approval is received by the AMC:
 - a. Segregated portfolio shall be effective from the day of credit event
 - b. AMC shall issue a press release immediately with all relevant information pertaining to the segregated portfolio. The said information will also be submitted to SEBI.
 - c. An e-mail or SMS shall be sent to all unit holders of the Scheme.
 - d. The NAV of both segregated and main portfolios shall be disclosed from the day of the credit event.

- e. All existing investors in the Scheme as on the day of the credit event shall be allotted equal number of units in the segregated portfolio as held in the main portfolio.
 - f. No redemption and subscription shall be allowed in the segregated portfolio. AMC shall enable listing of units of segregated portfolio on the recognized stock exchange within 10 working days of creation of segregated portfolio and also enable transfer of such units on receipt of transfer requests
- 3) If the trustees do not approve the proposal to segregate portfolio, AMC will issue a press release immediately informing investors of the same.

Valuation

Notwithstanding the decision to segregate the debt and money market instrument, the valuation shall take into account the credit event and the portfolio shall be valued based on the principles of fair valuation (i.e. realizable value of the assets) in terms of the relevant provisions of SEBI (Mutual Funds) Regulations, 1996 and circular(s) issued thereunder.

Processing of Subscription and Redemption Proceeds

All subscription and redemption requests for which NAV of the day of credit event or subsequent day is applicable will be processed as under:

- i. Upon trustees' approval to create a segregated portfolio -
 - Investors redeeming their units will get redemption proceeds based on the NAV of main portfolio and will continue to hold the units of segregated portfolio.
 - Investors subscribing to the Scheme will be allotted units only in the main portfolio based on its NAV.
- ii. In case trustees do not approve the proposal of segregated portfolio, subscription and redemption applications will be processed based on the NAV of total portfolio.

Disclosure

In order to enable the existing as well as the prospective investors to take informed decision, the following shall be adhered to:

- a. A statement of holding indicating the units held by the investors in the segregated portfolio along with the NAV of both segregated portfolio and main portfolio as on the day of the credit event shall be communicated to the investors within 5 working days of creation of the segregated portfolio.
- b. Adequate disclosure of the segregated portfolio shall be made in all scheme related documents, in monthly and half-yearly portfolio disclosures and in the annual report of the mutual fund and the Scheme.
- c. The Net Asset Value (NAV) of the segregated portfolio shall be declared on daily basis.
- d. The information regarding number of segregated portfolios created in the Scheme shall appear prominently under the name of the Scheme at all relevant places such as SID, KIM-cum- Application Form, advertisement, AMC and AMFI websites, etc.
- e. The Scheme performance required to be disclosed at various places shall include the impact of creation of segregated portfolio. The Scheme performance should clearly reflect the fall in NAV to the extent of the portfolio segregated due to the credit event and the said fall in NAV along with recovery(ies), if any, shall be disclosed as a footnote to the Scheme performance.
- f. The disclosures at paragraph (d) and (e) above regarding the segregated portfolio shall be carried out for a period of at least 3 years after the investments in segregated portfolio are fully recovered/ written-off.
- g. The investors of the segregated portfolio shall be duly informed of the recovery proceedings of the investments of the segregated portfolio. Status update may be provided to the investors at the time of recovery and also at the time of writing-off of the segregated securities.

TER for the Segregated Portfolio

- 1) quant AMC shall not charge investment and advisory fees on the segregated portfolio. However, TER (excluding the investment and advisory fees) can be charged, on a pro-rata basis only upon recovery of the investments in segregated portfolio.
- 2) The TER so levied shall not exceed the simple average of such expenses (excluding the investment and advisory fees) charged on daily basis on the main portfolio (in % terms) during the period for which the segregated portfolio was in existence.
- 3) The legal charges related to recovery of the investments of the segregated portfolio may be charged to the segregated portfolio in proportion to the amount of recovery. However, the same shall be within the maximum TER limit as applicable to the main portfolio. The legal charges in excess of the TER limits, if any, shall be borne by the AMC.
- 4) The costs related to segregated portfolio shall in no case be charged to the main portfolio.

Monitoring by Trustees

In order to ensure timely recovery of investments of the segregated portfolio, Trustees shall ensure that:

- a. The AMC puts in sincere efforts to recover the investments of the segregated portfolio.
- b. Upon recovery of money, whether partial or full, it shall be immediately distributed to the investors in proportion to their holding in the segregated portfolio. Any recovery of amount of the security in the segregated portfolio even after the write off shall be distributed to the investors of the segregated portfolio.

- C. The Trustees shall monitor the compliance of this circular and disclose in the half-yearly trustee reports filed with SEBI, the compliance in respect of every segregated portfolio created.

In order to avoid mis-use of segregated portfolio, Trustees shall ensure to have a mechanism in place to negatively impact the performance incentives of Fund Managers, Chief Investment Officers (CIOs), etc. involved in the investment process of securities under the segregated portfolio, mirroring the existing mechanism for performance incentives of the AMC, including claw back of such amount to the segregated portfolio of the Scheme.

All the plans will have common portfolio.</p> <p>Options under each Plan(s)</p> <ul style="list-style-type: none"> - Growth - Dividend (Payout and Re-investment Facility)

a. Growth Option

Dividends will not be declared under this option. The income attributable to Units under this option will continue to remain invested in the Scheme and will be reflected in the NAV of Units under this option.

b. Dividend Option

Under this option, dividends will be declared (subject to deduction of tax at source, if any) at specified frequencies at the discretion of the Trustee, subject to availability of distributable surplus calculated in accordance with SEBI (MF) Regulations. On payment of dividend, the NAV of the Unit under dividend option will fall to the extent of the dividend payout and applicable statutory levies, if any.

It must be distinctly understood that the actual declaration of dividend and frequency thereof is at the sole discretion of the Board of Directors of Trustee Company. There is no assurance or guarantee to the Unit holders as to the rate of dividend distribution nor that will the dividend be paid regularly. The Trustee reserves the right to declare a dividend at any other frequency in addition to the frequencies mentioned above.

If dividend payable under Dividend Payout option is equal to or less than Rs. 500/- then the dividend would be compulsorily reinvested in the option of the Scheme.

Dividend Payout Facility

Under this facility, dividend declared, if any, will be paid (subject to deduction of dividend distribution tax and statutory levy, if any) to those Unit holders, whose names appear in the register of Unit holders on the notified record date.

Dividend Re-investment Facility

Under this facility, the dividend due and payable to the Unit holders will be compulsorily and without any further act by the Unit holder, reinvested in the Dividend option at a price based on the prevailing ex-dividend Net Asset Value per Unit. The amount of dividend re-invested will be net of tax deducted at source, wherever applicable. The dividends so reinvested shall constitute a constructive payment of dividends to the Unit holders and a constructive receipt of the same amount from each Unit holder for Re-investment in Units.

On re-investment of dividends, the number of Units to the credit of Unit holder will increase to the extent of the dividend reinvested divided by the Applicable NAV. There shall, however, be no Load on the dividend so reinvested.

The Investors should indicate the option for which Subscription is made by indicating the choice in the appropriate box provided for this purpose in the application form. In case of valid application received without any choice of option/facility, the following default option/facility will be considered:

Foreign Account Tax Compliance Act and Common Reporting Standards requirements

As a part of various ongoing tax and regulatory developments around the globe [e.g. information exchange laws such as Foreign Account Tax Compliance Act ('FATCA') and Common Reporting Standard ('CRS')], financial institutions like quant Mutual Fund ('quant MF' or 'the Fund') are being cast with additional investor and counterparty account related due diligence requirements.

The Central Board of Direct Taxes (CBDT) has notified Rules 114F to 114H, as part of the Income-tax Rules, 1962, which Rules require Indian financial institutions such as the Banks, Mutual Funds, etc. to seek additional personal, tax and beneficial owner information and certain certifications and documentation from all our investors and counterparties. According to the FATCA-CRS Rules, financial institutions in India are required to report tax information about account holders that are tax resident of U.S. and other foreign countries, to the CBDT/ Indian Government which will, in turn, relay that information to the US Internal Revenue Service (IRS) and governments of other foreign countries.

These developments have resulted in compliance and reporting obligations on Financial Institutions like quant MF. In relevant cases, information will have to be reported to tax authorities/appointed agencies. Towards compliance, the Fund may also be required to provide information to any institutions such as withholding agents for the purpose of ensuring appropriate withholding from the account or any proceeds in relation thereto. As may be required by domestic or overseas regulators/ tax authorities, we may also be constrained to withhold and pay out any sums from your account or close or suspend your account(s). quant MF may also have to comply with other similar laws as and when applicable.

Prospective investors and Unit holders will therefore be required to comply with the request of the Fund to furnish such information / documentation / declarations as and when deemed necessary by the Investment Manager in accordance with Applicable Laws. In case prospective investor / Unit holder fails to furnish the relevant information / documentation / declarations in accordance with Applicable Laws, the Fund reserves the right to reject the application or redeem the Units held directly or beneficially and may also require reporting of such accounts and/or levy of withholding tax on payments made to the Unit holders / investor and/or take any other action/s in accordance with Applicable Laws. FATCA-CRS provisions are relevant not only at on-boarding stage of Unit holders but also throughout the life cycle of investment with the Fund. Unit holders therefore should intimate to the Fund/the Investment Manager, any change in their status with respect to any FATCA-CRS related information / documentation / declarations provided by them previously, including but not limited to any declarations provided in respect of residency of the Unit holders for tax purposes promptly, i.e. within 30 days. Further, if the Fund and/or the Investment Manager is required by Applicable Laws, to provide information regarding the Fund and/or the unit holders / investors to any regulatory authority and/or the Fund Investments and/or income therefrom, and the Fund and/or the Investment Manager complies with such request in good faith, whether or not it was in fact enforceable, they shall not be liable to the Unit holders / investors or to any other party as a result of such compliance or in connection with such compliance.

Prospective investors / Unit holders should consult their own advisors to understand the implications of FATCA-CRS provisions/requirements. Please note that quant MF will be unable to provide advice to any investor or counterparty about their tax status or FATCA/CRS classification relevant to their account. It is the responsibility of the investor or counterparty to ensure that they record their correct tax status / FATCA/ CRS classification. Investor/ counterparty may seek advice from their tax advisor in this regard. The onus to provide accurate, adequate and timely inputs in this regard would be that of the investor or counterparty. Any changes in earlier information provided must be intimated within 30 days of such change.

Investors are requested to provide all the necessary information / declarations to facilitate compliance, considering India's commitment to implement CRS and FATCA under the relevant international treaties.

Implementation of KYC requirements

SEBI vide circular no. MIRSD/SE/Cir-21/2011 dated October 5, 2011 had mandated (i) Standard KYC form with uniform KYC guidelines and supporting documents to be used by SEBI registered intermediaries and (ii) Centralized KYC registration through KYC Registration Agencies (KRAs) registered with SEBI, w.e.f. January 1, 2012, to bring about uniform KYC process in the securities market, based on SEBI prescribed norms and the KYC details are shared with all SEBI registered intermediaries by the KRAs.

Subsequently, SEBI, vide its circular no. MIRSD/Cir-5/2012 dated April 13, 2012 advised various intermediaries to upload KYC data of its existing customers into the KRA system. While uploading KYC data into the KRA system, intermediaries were also required to highlight such 'Missing/Not Available' KYC information of a customer, which was either not required or not taken previously, but was mandatory as per uniform KYC guidelines issued by SEBI.

In accordance with AMFI best practices guidelines circular no. 62/2015-16 dated September 18, 2015, it is mandatory for all new/existing investors to provide additional KYC information such as Income details, Occupation, association with politically exposed person, net worth etc. as mentioned in the application form. Subscription requests, without providing these details, are liable to be rejected. No subscriptions (whether fresh or additional) and switches pertaining to 'KYC on-hold' cases are accepted, unless the investor / unitholder also submits relevant KYC missing / updated information, which is appropriately updated on the KRA - KYC.

Further, it is mandatory for existing customers to complete In-Person Verification process and provide the missing KYC information failing which their applications / transaction requests for additional subscription (including switches) is liable to be rejected.

	<p>Central KYC Process</p> <p>Central Registry of Securitisation and Asset Reconstruction and Security interest of India ('CERSAI') has been authorised by Government of India to act as Central KYC Records Registry under Prevention of Money- Laundering (Maintenance of Records) Rules, 2005 ('PMLA Rules').</p> <p>SEBI vide its circular no. CIR/MIRSD/66/2016 dated July 21, 2016 and circular no. CIR/MIRSD/120/2016 dated November 10, 2016 has prescribed that the Mutual Fund/ AMC should capture KYC information for sharing with CKYCR as per the KYC template prescribed by CERSAI for uniform and smooth implementation of CKYC norms for onboarding of new investors in Mutual Funds.</p> <p>In accordance with the aforesaid SEBI circulars and AMFI best practice guidelines for implementation of CKYC norms with effect from February 1, 2017:</p> <ol style="list-style-type: none"> Individual investors who have never done KYC process under KRA regime i.e. a new investor who is new to KRA system and whose KYC is not registered or verified in the KRA system shall be required to provide KYC details in the CKYC Form to the Mutual Fund/ AMC. Individual investor who fills old KRA KYC Form, should provide additional / missing information using Supplementary KYC Form or fill CKYC Form. The said form is available on quant Mutual Fund website www.quantmutual.com. Details of investors shall be uploaded on the system of CKYCR and a 14 digit unique KYC Identification Number ('KIN') will be generated for such customer. New investors, who have completed CKYC process & have obtained KIN may quote their KIN in the application form instead of submitting CKYC Form/ Supplementary KYC Form. AMC/ Mutual Fund shall use the KIN of the investor to download the KYC information from CKYCR system and update its records. If the PAN of investor is not updated on CKYCR system, the investor should submit self-certified copy of PAN card to the Mutual Fund/ AMC. <p>The AMC reserves the right to reject transaction application in case the investor(s) fails to submit information and/or documentation as mentioned above. In the event of non-compliance of KYC requirements, the Trustee / AMC reserves the right to freeze the folio of the investor(s).</p> <p>Submission of Aadhar Number</p> <p>Pursuant to requirement under Prevention of Money Laundering (Maintenance of Records) Rules, 2005 as amended from time to time, proof of possession of Aadhar can be accepted as a valid document for proof of address or proof of identity of investors, provided the investor redact or blackout his Aadhar number while submitting the applications for investments.</p> <p>The aforesaid guidelines will be subject to change as per the directives issued by the concerned regulatory/ government authority from time to time.</p> <p>For further details refer to SAI.</p>

Special Products available	<p>SYSTEMATIC INVESTMENT PLAN (SIP) Unit holder can enroll for the SIP facility by submitting duly completed Enrolment Form at the Official Point(s) of Acceptance. An Investor shall have the option of choosing any date of the Month as his SIP date. Minimum amount and minimum installments for monthly and yearly frequency under SIP Facility is as follows:</p>

Particulars	Minimum Amounts
Initial Investment amount	Rs. 5,000/-
Subsequent Investment amount	Rs. 1,000/- and in multiples of Re. 1/-
SIP (Systematic Investment Plan) / Micro SIP amount	
- Monthly	Rs. 1,000/-
- Quarterly	Rs. 3,000/-
Redemption amount	Rs. 1,000/-

If the SIP period is not specified by the unit holder then the SIP enrolment will be deemed to be for perpetuity and processed accordingly.

In case of SIP investments, where the entire installment amount is not available in bank account, the SIP for that month would be rejected. Allocation to a particular scheme or pro - rata allocation to schemes will not be carried out.

i. SIP through post-dated cheques

The date of the first cheque shall be the same as the date of the application while the remaining cheques shall be post dated cheques which shall be dated uniformly. Investors can invest in SIP by providing post-dated cheques to Official Point(s) of Acceptance. An Investor is eligible to issue only one cheque for each month in the same SIP enrolment form. All SIP cheques should be of the same amount and same date option. Cheques should be drawn in favour of the Fund and "A/c Payee only". A Letter will be forwarded to the Investor on successful registration of SIP. The Post Dated cheques will be presented on the dates mentioned on the cheque and subject to realization of the cheque.

ii. SIP through National Automated Clearing House (NACH) Platform / Direct Debit facility

Investors / Unit holders may enroll for SIP Direct Debit Facility available with specified Banks / Branches. In order to enroll for SIP Direct Debit Facility, an Investor must fill up the Application Form for SIP Direct Debit facility.

In case of SIP with payment mode as Direct Debit, Investors shall be required to submit a cancelled cheque or a photocopy of a cheque of the bank account for which the debit mandate is provided. The Facility will also be available through standing instructions/direct debit given by the investor (with all payment installments being made through standing instructions/direct debit). However, the SIP facility with direct debit will be available through selected Banks. The Asset Management Company reserves the right to add/modify/delete from the list of banks through whom such facility will be available to the investors.

The unit holders can also make payment of SIP instalments through NACH facility. NACH is a centralized system, launched by National Payments Corporation of India (NPCI) with an aim to consolidate multiple NACH mandates. This facility will enable the unit holders of the Fund to make SIP investments through NACH by filling up the SIP Registration cum mandate form. A Unique number will be allotted to every mandate registered under NACH called as Unique Mandate Reference Number ("UMRN") which can be used for SIP transactions. The NACH facility shall be available subject to terms and conditions contained in the SIP registration Mandate Form and as prescribed by NPCI from time to time.

All SIP cheques/payment instructions should be of the same amount and same date (excluding first cheque). However, there should be a gap of 30 days between first SIP Installment and the second installment in case of SIP started during ongoing offer.

	<p>Investors will have the right to discontinue the SIP facility at any time by sending a written request to any of the Official Point(s) of Acceptance. Notice of such discontinuance should be received at least 20 days prior to the due date of the next debit. On receipt of such request, the SIP facility will be terminated. It is clarified that if the Fund fails to get the proceeds from three Installments out of a continuous series of Installments submitted at the time of initiating a SIP (Subject to a minimum under SIP i.e. 36 months), the SIP is deemed as discontinued.</p> <p>Investors can avail of the SIP facility during the NFO period as well. However, in such a case the SIP must be through the NACH or Direct Debit. The first investment in SIP during the NFO shall be through a cheque only.</p> <p>Units will be allotted at the Applicable NAV of the respective dates on which the investments are sought to be made. In case the date falls on a Non-business day or falls during a Book Closure period, the immediate next Business Day will be considered for this purpose.</p> <p>An extension of an existing SIP will be treated as a new SIP on the date of such application, and all the above conditions need to be met with. The Load structure prevailing at the time of submission of the SIP application (whether fresh or extension) will apply for all the Installments indicated in such application.</p> <p>The installment after the NFO period should be dated after the date of declaration of first NAV. Any payments intended for the interim period will not be processed and will be treated void.</p> <p>For applicable Load on purchases through SIP, please refer paragraph 'Load Structure' given in the document.</p> <p>The AMC reserves the right to change / modify Load structure and other terms and conditions under the SIP prospectively at a future date. Please refer to the SIP Enrolment Form for terms & conditions before enrolment.</p> <p>Systematic Investment Plan (SIP) Switch Facility: Unit holders having registered SIP in the specified scheme(s) of the Fund can use SIP Switch Facility to terminate SIP in the existing scheme and initiate SIP in another specified scheme.</p> <p>Facility to Switch-In to the scheme shall be available to all the unit holders of all the open ended schemes of fund house and also to the free units of quant Tax Plan. Free units are defined as units finished lock in period of 3 years.</p> <p>The terms and conditions of SIP Switch Facility are as below:</p> <ol style="list-style-type: none"> 1. SIP Switch Facility can be availed by unit holders only after completion of minimum installments specified for SIP registration in the Switch-out (existing) scheme. 2. 11. The allotment of units of Switch-in scheme shall be in the same folio.
12. SIP Switch Facility is not available for SIP subscribed with post-dated cheques.
13. Investors will have the option of changing the distributor code from direct to regular/ regular to direct.
14. Unit holder must submit request for SIP Switch at least 21 days before the SIP due date.

Multiple SIPs Registration Mandate

Unitholder can enroll multiple SIPs in different schemes by submitting one single application form/ payment instruction. All other terms and conditions applicable to SIP Facility shall be applicable for the Facility.

The facility is available under all schemes offering SIP. All other terms and conditions applicable to SIP Facility shall be applicable for Multiple SIP registration facility.

1. The gap between SIP registration and first Top-Up request under 'As & When' frequency and two instructions under 'As & When' frequency should be at least 3 months.
2. The Facility shall continue till the end date of the SIP. The Facility can be discontinued only by cancelling the SIP.

All other terms and conditions applicable to SIP Facility shall be applicable for the Facility.

SYSTEMATIC TRANSFER PLAN (STP)

Investors can opt for the Systematic Transfer Plan by investing a lumpsum amount in one scheme of the Fund and providing a standing instruction to transfer sums at following intervals into any other scheme (as may be permitted by the Scheme Information Document of the respective schemes) of the Fund.

STP Frequency	Cycle Date	Minimum Amount* (in Rs.)	Minimum Installment
Monthly	1 st , 7 th , 10 th , 15 th or 25 th	1,000/-	6
Quarterly	1 st , 7 th , 10 th , 15 th or 25 th	3,000/-	2

In case Day of Transfer has not been indicated under Daily and Weekly frequencies, Wednesday shall be treated as Default day. Further, in case of Monthly and Quarterly Frequency, if the STP date and Frequency has not been indicated, Monthly frequency shall be treated as Default frequency and 10th shall be treated as Default Date.

In case none of the frequencies have been selected then Monthly frequency shall be treated as Default frequency and 10th shall be treated as Default Date.

Investors could also opt for STP from an existing account by quoting their account / folio number. A minimum period of 7 working days shall be required for registration under STP. Units will be allotted/redeemed at the applicable NAV of the respective dates of the Scheme in which such investments/withdrawals are sought from the Scheme.

The requests for discontinuation of STP shall be subject to an advance notice of 15 days before the next due date for STP and it will terminate automatically if all Units are liquidated or

withdrawn from the account or upon the Funds' receipt of notification of death or incapacity of the Unit holder.

The AMC reserves the right to introduce STPs at any other frequencies or on any other dates as the AMC may feel appropriate from time to time. In the event that such a day is a Holiday, the transfer would be affected on the next Business Day.

Further, in case where the balance amount in a folio is less than the STP amount, the entire amount will be transferred to the transferee scheme.

For further details/clarifications investors may contact the distributor(s) or the ISCs of the AMC.

SYSTEMATIC WITHDRAWAL PLAN (SWP)

Existing Unitholders have the benefit of availing the choice of SWP on pre- specified dates. The SWP allows the Unitholder to withdraw a specified sum of money each month/quarter from his investments in the Scheme.

The amount thus withdrawn by redemption will be converted into Units at Applicable NAV based prices and the number of Units so arrived at will be subtracted from the Units balance to the credit of that Unitholder.

Unitholders may start the facility/change the amount of withdrawals or the period of withdrawals by giving a 15 days written intimation/notice. The SWP may be terminated by a Unitholder by giving 15 days written intimation/notice and it will terminate automatically if all the Units are liquidated or withdrawn from the account or the holdings fall below the SWP installment amount.

There are four options available under SWP viz. Monthly option, quarterly option, Half Yearly and Yearly option. The details of which are given below:

	Monthly Option	Quarterly Option	Half Yearly Option	Yearly Option
Minimum value of SWP	Rs. 1,000/-			
Additional amount in multiples of	Re.1			
Dates of SWP Installment	1/5/10/15/25*			
Minimum No of SWP	Six	Four	Four	Two

*In the event that such a day is a holiday, the withdrawals would be affected on the next business day.

Exit Load, if any, is applicable to SWP.

The AMC reserves the right to accept SWP applications of different amounts, dates and frequency.

Unitholders can enroll themselves for the facility by submitting the duly completed Systematic Withdrawal enrolment Form at any of the Investor Service Centres (ISCs)/Official Points of Acceptance (OPAs). The AMC / Trustee reserve the right to change / modify the terms and conditions under the SWP prospectively at a future date.

SWITCHING OPTIONS

(a) Inter – Scheme Switching option

Unit holders under the Scheme have the option to switch part or all of their Unit holdings in the Scheme to any other scheme offered by the Mutual Fund from time to time. The Mutual Fund also provides the Investors the flexibility to switch their investments from any other scheme(s) / plan (s) offered by the Mutual Fund to this Scheme. This option will be useful to Unit holders who wish to alter the allocation of their investment among the scheme(s) / plan(s) of the Mutual Fund in order to meet their changed investment needs.

The Switch will be effected by way of a Redemption of Units from the Scheme at Applicable NAV, subject to Exit Load, if any and reinvestment of the Redemption proceeds into another scheme offered by the Mutual Fund at Applicable NAV and accordingly the switch must comply with the Redemption rules of the switch out scheme and the Subscription rules of the Switch in Scheme.

(b) Intra –Scheme Switching option

Unit holders under the Scheme have the option to switch their Units holding from one plan/option to another plan/option (i.e. Regular to Direct or Growth to Dividend and vice-versa). The Switches would be done at the Applicable NAV based prices and the difference between the NAVs of the two options will be reflected in the number of Units allotted.

Switching shall be subject to the applicable “Cut off time and Applicable NAV” stated elsewhere in the Scheme Information Document. In case of “Switch” transactions from one scheme to another, the allocation shall be in line with Redemption payouts.

PURCHASE / REDEMPTION OF UNITS THROUGH STOCK EXCHANGE INFRASTRUCTURE

Investors can subscribe to the Units of quant Mutual Fund through the mutual fund trading platforms of the Bombay Stock Exchange (“BSE”) and National Stock Exchange (“NSE”) with NSDL and CDSL as depositories for such units of the mutual fund.

NSE has introduced Mutual Fund Service System (“MFSS”) Platform and BSE has introduced BSE StAR MF Platform.

The following are the salient features of the MFSS / BSE StAR MF Platform:

1. The facility i.e. purchase/redemption/SIP (Systematic Investment Plan) is available for both existing and new investors.
2. The Investors will be eligible to purchase/redeem units of the Scheme.
3. **Maximum subscription:**
The investors can purchase units of the Scheme by using NSE MFSS/ BSE StAR Platform for transaction value less than Rs. 1 Crore.
4. **List of additional Official Point of Acceptance**
The following shall be the additional Official Point of Acceptance of Transactions for the Scheme:

All trading members of BSE & NSE who are registered with AMFI as Mutual Fund Advisors and also registered with BSE &/or NSE as Participants (“AMFI registered stock exchange brokers”) will be eligible to offer this facility to investors and shall be treated as official point of acceptance.

Units of mutual fund schemes shall be permitted to be transacted through clearing members of the registered Stock Exchanges. Further, the Depository Participants of registered Depositories are permitted to process only redemption request of units held in demat form.

	<p>Clearing members and Depository participants will be considered as Official Points of Acceptance (OPA) of quant Mutual Fund and conditions stipulated in SEBI circular no. SEBI / IMD / CIR No.11/183204/2009 dated November 13, 2009 for stock brokers viz. AMFI / NISM certification, code of conduct prescribed by SEBI for Intermediaries of Mutual Fund, shall be applicable for such Clearing members and Depository participants as well.</p> <ol style="list-style-type: none"> 5. The units of the Scheme are not listed on BSE & NSE and the same cannot be traded on the Stock Exchange. The window for purchase/redemption of units on MFSS / BSE StAR Platform will be available between 9 a.m. and 3 p.m. or such other timings as may be decided. 6. Transactions only in demat mode will be currently permitted through MFSS / BSE StAR MF Platform. 7. Investors will be able to purchase/redeem units in the Scheme in the following manner: <ol style="list-style-type: none"> (i) Investors shall receive redemption amount (if units are redeemed) and units (if units are purchased) through broker / clearing member's pool account. Accounts Statements	<ul style="list-style-type: none"> On acceptance of the application for subscription, an allotment confirmation specifying the number of units allotted by way of e-mail and/or SMS within 5 business days from the date of receipt of transaction request/allotment will be sent to the Unit Holders registered e-mail address and/or mobile number. In case of Unit Holders holding units in the dematerialized mode, the Fund will not send the account statement to the Unit Holders. The statement provided by the Depository Participant will be equivalent to the account statement. For those unit holders who have provided an e-mail address, the AMC will send the account statement by e-mail. Unit holders will be required to download and print the documents after receiving e-mail from the Mutual Fund. Should the Unit holder experience any difficulty in accessing the electronically delivered documents, the Unit holder shall promptly advise the Mutual Fund to enable the Mutual Fund to make the delivery through alternate means. It is deemed that the Unit holder is aware of all security risks including possible third party interception of the documents and contents of the documents becoming known to third parties. The Unit holder may request for a physical account statement by writing/calling the AMC/ISC/Registrar. In case of specific request received from the Unit Holders, the AMC/Fund will provide the Account Statement to the Investors within 5 business days from the receipt of such request. The AMC shall issue Unit certificates within 5 business days from the date of receipt of request where the applicant so desires.

Consolidated Account Statement (CAS)

CAS is an account statement detailing all the transactions and holding at the end of the month including transaction charges paid to the distributor, across all schemes of all mutual funds. CAS issued to investors shall also provide the total purchase value/cost of investment in each scheme.

Further, CAS issued for the half-year (September/ March) shall also provide

- a. The amount of actual commission paid by AMC/Mutual Fund to distributors (in absolute terms) during the half-year period against the concerned investor's total investments in each scheme.
- b. The Scheme's average Total Expense Ratio (in percentage terms) along with the break up between Investment and Advisory fees, Commission paid to the distributor and Other expenses for the period for each scheme's applicable plan (regular or direct or both) where the concerned investor has actually invested in.

The word transaction will include purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan and systematic transfer plan.

a) For Unitholders not holding Demat Account:

CAS for each calendar month shall be issued, on or before tenth day of succeeding month by the AMC.

The AMC shall ensure that a CAS for every half yearly (September/ March) is issued, on or before tenth day of succeeding month, detailing holding at the end of the six month, across all schemes of all mutual funds, to all such investors in whose folios no transaction has taken place during that period.

The AMC shall identify common investors across fund houses by their Permanent Account Number (PAN) for the purposes of sending CAS. In the event the account has more than one registered holder, the first named Unit Holder shall receive the Account Statement.

The AMC will send statement of accounts by e-mail where the Investor has provided the e-mail id. Additionally, the AMC may at its discretion send Account Statements individually to the investors.

b) For Unitholders holding Demat Account:

SEBI vide its circular no. CIR/MRD/DP/31/2014 dated November 12, 2014, in order to enable a single consolidated view of all the investments of an investor in Mutual Fund and securities held in demat form with Depositories, has required Depositories to generate and dispatch a single CAS for investors having mutual fund investments and holding demat accounts.

In view of the aforesaid requirement, for investors who hold demat account, for transactions in the schemes of quant Mutual Fund on or after February 1, 2015, a CAS, based on PAN of the holders, will be sent by Depositories to investors holding demat account, for each calendar month within 10th day of the succeeding month to the investors in whose folios transactions have taken place during that month.

CAS will be sent by Depositories every half yearly (September/March), on or before 10th day of succeeding month, detailing holding at the end of the six month, to all such investors in whose folios and demat accounts there have been no transactions during that period.

CAS sent by Depositories is a statement containing details relating to all financial transactions made by an investor across all mutual funds viz. purchase, redemption, switch, dividend payout, dividend reinvestment, systematic investment plan, systematic withdrawal plan, systematic transfer plan (including transaction charges paid to the distributor) and transaction in dematerialized securities across demat accounts of the investors and holding at the end of the month.

	<p>In case of demat accounts with nil balance and no transactions in securities and in mutual fund folios, the depository shall send account statement in terms of regulations applicable to the depositories. Investors whose folio(s)/ demat account(s) are not updated with PAN shall not receive CAS.</p> <p>Consolidation of account statement is done on the basis of PAN. Investors are therefore requested to ensure that their folio(s)/ demat account(s) are updated with PAN. In case of multiple holding, it shall be PAN of the first holder and pattern of holding.</p> <p>For Unit Holders who have provided an e-mail address to the Mutual Fund or in KYC records, the CAS is sent by e-mail. However, where an investor does not wish to receive CAS through email, option is given to the investor to receive the CAS in physical form at the address registered in the Depository system.</p> <p>Investors who do not wish to receive CAS sent by depositories have an option to indicate their negative consent. Such investors may contact the depositories to opt out. Investors who do not hold demat account continue to receive CAS sent by RTA/AMC, based on the PAN, covering transactions across all mutual funds as per the current practice.</p> <p>In case an investor has multiple accounts across two depositories; the depository with whom the account has been opened earlier will be the default depository.</p> <p>The dispatches of CAS by the depositories constitute compliance by the AMC/ the Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations. However, the AMC reserves the right to furnish the account statement in addition to the CAS, if deemed fit in the interest of investor(s).</p> <p>Investors whose folio(s)/demat account(s) are not updated with PAN shall not receive CAS. Investors are therefore requested to ensure that their folio(s)/demat account(s) are updated with PAN.</p> <p>For folios not included in the CAS (due to non-availability of PAN), the AMC shall issue monthly account statement to such Unit holder(s), for any financial transaction undertaken during the month on or before 10th of succeeding month by mail or email.</p> <p>For folios not eligible to receive CAS (due to non-availability of PAN), the AMC shall issue an account statement detailing holding across all schemes at the end of every six months (i.e. September/March), on or before 10th day of succeeding month, to all such Unit holders in whose folios no transaction has taken place during that period shall be sent by mail/e-mail.</p> <p>Option to hold units in dematerialised (demat) form</p> <p>Investors shall have an option to receive allotment of Mutual Fund units in their demat account while subscribing to the Scheme in terms of the guidelines/ procedural requirements as laid by the Depositories (NSDL/CDSL) from time to time.</p> <p>Investors desirous of having the Units of the Scheme in dematerialized form should contact the ISCs of the AMC/Registrar.</p> <p>Where units are held by investor in dematerialized form, the demat statement issued by the Depository Participant would be deemed adequate compliance with the requirements in respect of dispatch of statements of account.</p> <p>In case investors desire to convert their existing physical units (represented by statement of account) into dematerialized form or vice versa, the request for conversion of units held in physical form into Demat (electronic) form or vice versa should be submitted alongwith a Demat/Remat Request Form to their Depository Participants. In case the units are desired to be held by investor in dematerialized form, the KYC performed by Depository Participant shall be considered compliance of the applicable SEBI norms.</p>
--	---

	<p>Units held in Demat form are freely transferable in accordance with the provisions of SEBI (Depositories and Participants) Regulations, as may be amended from time to time. Transfer can be made only in favour of transferees who are capable of holding units and having a Demat Account. The delivery instructions for transfer of units will have to be lodged with the Depository Participant in requisite form as may be required from time to time and transfer will be affected in accordance with such rules / regulations as may be in force governing transfer of securities in dematerialized mode.</p> <p>For details, Investors may contact any of the Investor Service Centres of the AMC.</p>
Dividend	<p>The Dividend warrants/cheque/demand draft shall be dispatched to the Unit holders within 30 days of the date of declaration of the Dividend.</p> <p>The Dividend proceeds will be paid by way of EFT / NEFT / RTGS / Direct credits/ any other electronic manner if sufficient banking account details are available with the Mutual Fund for the Investor.</p> <p>In case of specific request for Dividend by warrants/cheques/demand drafts or unavailability of sufficient details with the Mutual Fund, the Dividend will be paid by warrant/cheques/demand drafts and payments will be made in favour of the Unit holder (registered holder of the Units or, if there are more than one registered holder, only to the first registered holder) with bank account number furnished to the Mutual Fund (please note that it is mandatory for the Unit holders to provide the Bank account details as per the directives of SEBI).</p>
Redemption	<p>How to Redeem</p> <p>A Transaction Slip can be used by the Unit Holder to request for Redemption. The requisite details should be entered in the Transaction Slip and submitted at an ISC/Official Point of Acceptance. Transaction Slips can be obtained from any of the ISCs/Official Points of Acceptance. Investor can also place redemption through Telephone using Easy Call / Easy SMS facility or may redeem Online through the AMC's website subject to the terms and conditions as maybe stipulated from time to time.</p> <p>Procedure for payment of redemption.</p> <p>1. Resident Investors</p> <p>Redemption proceeds will be paid to the investor through Real Time Gross Settlement (RTGS), NEFT, Direct Credit, Cheque or Demand Draft.</p> <p>a) If investor had provided IFSC code in the application form, by default redemption proceeds shall be credited to Investor's account through RTGS/NEFT.</p> <p>b) If Investor has neither provided IFSC code nor the NEFT code but have a bank account with Banks with whom the Fund would have an arrangement for Direct Credit from time to time, the proceeds will be paid through direct credit.</p> <p>c) In case if investor bank account does not fall in the above a to b categories, redemption proceeds will be paid by cheques/demand drafts, marked "Account Payee only" and drawn in the name of the sole holder / first-named holder (as determined by the records of the Registrar).</p> <p>The bank name and bank account number, as specified in the Registrar's records, will be mentioned in the cheque/demand draft. The cheque will be payable at par at all bank branch or specific cities. If the Unit Holder resides in any other city, he will be paid by a demand draft payable at the city of his residence and the demand draft charges shall be borne by the AMC (please refer SAI for details).</p> <p>The redemption proceeds will be sent by courier or (if the addressee city is not serviced by the courier) by registered post/UCP. The dispatch for the purpose of delivery through the courier / postal department, as the case may be, shall be treated as delivery to the investor. The AMC / Registrar are not responsible for any delayed delivery or non-delivery or any consequences thereof, if the dispatch has been made correctly as stated in this paragraph.</p> <p>The AMC reserves the right to change the sequence of payment from (a) to (c) without any prior notice</p>

	<p>For Unit holders who have given specific request for Cheque/Demand Draft Redemption proceeds will be paid by cheque/demand drafts and payments will be made in favour of the Unit holder with bank account number furnished to the Mutual Fund.</p> <p>(Please note that it is mandatory for the Unit holders to provide the Bank account details as per the directives of SEBI). Redemption cheques will be sent to the Unit holder's address.</p> <p>The Trustee, at its discretion at a later date, may choose to alter or add other modes of payment.</p> <p>2. Non-Resident Investors/PIO/OCI</p> <p>For NRIs, Redemption proceeds will be remitted depending upon the source of investment as follows:</p> <p>(i) Repatriation basis</p> <p>When Units have been purchased through remittance in foreign exchange from abroad or by cheque / draft issued from proceeds of the Unit Holder's FCNR deposit or from funds held in the Unit Holder's Non Resident (External) account kept in India, the proceeds can also be sent to his Indian address for crediting to his NRE / FCNR / non-resident (Ordinary) account, if desired by the Unit Holder.</p> <p>(ii) Non-Repatriation basis</p> <p>When Units have been purchased from funds held in the Unit Holder's non-resident (Ordinary) account, the proceeds will be sent to the Unit Holder's Indian address for crediting to the Unit Holder's non-resident (Ordinary) account.</p> <p>(iii) FPIs</p> <p>For FPIs, the designated branch of the authorized dealer may allow remittance of net sale / maturity proceeds (after payment of taxes) or credit the amount to the Foreign Currency account or Non-resident Rupee account of the FPIs maintained in accordance with the approval granted to it by the RBI.</p> <p>The Fund will not be liable for any delays or for any loss on account of any exchange fluctuations, while converting the rupee amount in foreign exchange in the case of transactions with NRIs / FPIs. The Fund may make other arrangements for effecting payment of redemption proceeds in future.</p> <p>Further, based on the list provided by the Depositories (NSDL/ CDSL) giving the details of the demat account holders and the number of Units held by them in electronic form on the Record date fixed for redemption of Units on the Maturity date, the Registrars and Transfer Agent will pay the redemption proceeds by forwarding a cheque or directly crediting the bank account linked to the demat account depending on the mode of receipt of redemption proceeds chosen by the Unit holders.</p> <p>Effect of Redemptions</p> <p>The number of Units held by the Unit Holder in his / her / its folio will stand reduced by the number of Units Redeemed. Units once redeemed will be extinguished and will not be re-issued.</p> <p>The normal processing time may not be applicable in situations where requisite details are not provided by investors/Unit holders. The AMC will not be responsible for any loss arising out of fraudulent encashment of cheques and/or any delay/loss in transit.</p> <p>AMC reserves the right to provide the facility of redeeming Units of the Scheme through an alternative mechanism including but not limited to online transactions on the Internet, as may be decided by the AMC from time to time. The alternative mechanism may also include electronic means of communication such as redeeming Units online through the AMC Website or any other website etc. The alternative mechanisms would be applicable to only those investors who opt for the same in writing and/or subject to investor fulfilling such conditions as AMC may specify from time to time.</p>
--	--

	<p>Signature mismatches If the AMC / Registrar finds a signature mismatch, while processing the redemption/ switch out request, then the AMC/ Registrar reserves the right to process the redemption only on the basis of supporting documents confirming the identity of the investors. List of such documents would be notified by AMC from time to time on its website.</p> <p>Important Note: All applicants for Purchase of Units /Redemption of Units must provide a bank name, bank account number, branch address, and account type in the Application Form.</p> <p>Unclaimed Redemptions and Dividends The unclaimed Redemption and dividend amounts shall be deployed by the Fund in money market instruments and such other instruments/securities as maybe permitted from time to time. The investment management fee charged by the AMC for managing such unclaimed amounts shall not exceed 50 basis points. The circular also specifies that investors who claim these amounts during a period of three years from the due date shall be paid at the prevailing NAV. Thus, after a period of three years, this amount can be transferred to a pool account and the investors can claim the said amounts at the NAV prevailing at the end of the third year. In terms of the circular, the onus is on the AMC to make a continuous effort to remind investors through letters to take their unclaimed amounts. The details of such unclaimed amounts shall be disclosed in the annual report sent to the Unit Holders.</p> <p>Further, according to circular no. D. COMPUTATION OF NAV

The Net Asset Value (NAV) per Unit under the Scheme will be computed by dividing the net assets of the Scheme by the number of Units outstanding on the valuation day. The Mutual Fund will value its investments according to the valuation norms, as specified in Schedule VIII of the SEBI (MF) Regulations, or such norms as may be specified by SEBI from time to time.

Valuation of Foreign Currency / Securities: On the valuation day, all the assets and liabilities denominated in foreign currency will be valued in Indian Rupees. The valuation price of the security will be converted to INR based on FBIL/any other designated agency, reference rate at the close of banking hours in India. If required, the AMC may change the source of determining the exchange rate. The Fund shall value its investments according to the valuation norms (Valuation Policy includes computation of NAV in case of investment in foreign securities), as specified in the Eighth Schedule of the Regulations, or such guidelines / recommendations as may be specified by SEBI from time to time. The broad valuation norms are detailed in the Statement of Additional Information.

The Net Assets Value (NAV) of the Units under the Scheme shall be calculated as shown below:

$$\text{NAV (Rs.)} = \frac{\begin{array}{r} \text{Market or Fair Value of} \\ \text{Scheme's Investments} \end{array} + \begin{array}{r} \text{Current Assets including} \\ \text{Accrued Income} \end{array} - \begin{array}{r} \text{Current Liabilities and} \\ \text{Provisions} \end{array}}{\text{No. of Units outstanding under Scheme on the Valuation Day}}$$

The NAV shall be calculated up to two decimal places. However the AMC reserves the right to declare the NAVs up to additional decimal places as it deems appropriate. Separate NAV will be calculated and disclosed for each Option. The NAVs of the Growth Option and the Dividend Option under each of the Plans will be different after the declaration of the first Dividend.

The AMC will calculate and disclose the first NAV of the Scheme within a period of 5 business days from the date of allotment. Subsequently, the NAVs will be calculated and disclosed on all the Business Days.

IV. FEES AND EXPENSES

This section outlines the expenses that will be charged to the Scheme.

A. NEW FUND OFFER (NFO) EXPENSES

These expenses are incurred for the purpose of various activities related to the NFO like sales and distribution fees paid marketing and advertising, registrar expenses, printing and stationary, bank charges etc.

Investors can refer 'Total Expense Ratio of Mutual Fund Schemes' section on <https://quantmutual.com/Total-Expense-Ratio> for Total Expense Ratio (TER) details.

Illustration of impact of expense ratio on scheme's returns

For any scheme, NAV is computed on a daily basis factoring in all the assets as well as liabilities of the Scheme (including expenses charged). Expenses charged to the Scheme bring down its NAV and hence the investor's net returns on a corresponding basis.

Illustration:

Particulars	Amount (in Rs.)	No of units	NAV per unit (in Rs.)
Invested on March 31, 2017 (A)	10,000	1,000	10.00
Value of above investment as on March 31, 2018 (gross of all expenses) (B)	11,500	1,000	11.50
Total Expenses charged during the year @2% p.a. (assumed) (C)	200		0.20
Value of above investment as on March 31, 2018 (net of all expenses) (D) = (B-C)	11,300	1,000	11.30
Returns (%) (gross of all applicable expenses) (E) = ((B/A)-1)		15.0%	
Returns (%) (net of all applicable expenses) (F) = ((D/A)-1)		13.0%	

Please Note:

- The purpose of the above illustration is purely to explain the impact of expense ratio charged to the Scheme and should not be construed as providing any kind of investment advice or guarantee of returns on investments.
- It is assumed that the expenses charged are evenly distributed throughout the year. The expenses of the Direct Plan under the Scheme may vary with that of the Regular Plan under the Scheme.
- Calculations are based on assumed NAVs, and actual returns on your investment may be more, or less.

- Any tax impact has not been considered in the above example, in view of the individual nature of the tax implications. Each investor is advised to consult his or her own financial advisor.

C. LOAD STRUCTURE

Load is an amount which is paid by the investor to redeem the Units from the Scheme. This amount is used by the AMC to pay commission to the distributors and to take care of other marketing and selling expenses. Load amounts are variable and are subject to change from time to time.
